BEFORE FIRST USE

1. Unpack the waffle maker and remove all packaging materials.
2. Wipe the cooking plates with a damp cloth or sponge to remove any dust or residue from manufacturing. Dry thoroughly.
3. For the first use, it is recommended to operate the waffle maker without food for a few minutes to burn off any manufacturing oils. A slight odor or smoke may be present; this is normal and will dissipate.

SETUP

1. Place the Mini Waffle Maker on a stable, flat, and heat-resistant surface. Ensure there is adequate ventilation around the appliance.
2. Ensure the power cord is not touching any hot surfaces and is positioned safely to avoid accidental pulling.

OPERATING INSTRUCTIONS

Follow these steps to prepare waffles:

1. **Preheat:** Plug the waffle maker into a standard electrical outlet. The indicator light will illuminate, signaling that the appliance is heating. Once the light turns off, the waffle maker is preheated and ready for use.
2. **Prepare Plates:** For best results and to prevent sticking, lightly grease the cooking plates with cooking spray or a small amount of oil before adding batter, especially for the first waffle.
3. **Add Batter:** Pour your waffle batter onto the center of the bottom cooking plate. Do not overfill, as the batter will expand.
4. **Close Lid:** Carefully close the lid. The indicator light may turn on again during cooking.
5. **Cook:** Allow the waffle to cook for approximately 3-6 minutes, or until golden brown and cooked to your desired crispness. The indicator light will typically turn off when the waffle is ready.
6. **Remove Waffle:** Use a heat-resistant, non-metallic utensil (e.g., plastic or wooden spatula) to carefully remove the cooked waffle from the plates. Do not use metal utensils, as they can damage the non-stick coating.
7. **Repeat:** If making multiple waffles, repeat steps 2-6. Unplug the appliance when finished.
