Villeroy & Boch G6001200

Villeroy & Boch Finion LED Illuminated Mirror G6001200 User Manual

Model: G6001200

1. Introduction

Thank you for choosing the Villeroy & Boch Finion LED Illuminated Mirror G6001200. This manual provides essential information for the safe installation, operation, and maintenance of your new mirror. Please read these instructions carefully before installation and retain them for future reference. Proper installation and use will ensure optimal performance and longevity of your product.

2. Product Overview and Features

The Villeroy & Boch Finion LED Illuminated Mirror G6001200 is a high-quality, wall-mounted mirror designed for modern bathrooms. It features integrated LED lighting with adjustable color temperature, providing both functional illumination and ambient light.

Key Features:

- **Dimensions:** 1200 x 750 x 45 mm
- **LED Illumination:** Integrated LED lighting with two power outputs (1x 27W and 1x 53.9W).
- **Adjustable Color Temperature:** Ranging from 2700 K (warm white) to 6480 K (daylight white) for personalized ambiance.
- **IP Rating:** IP 44, providing protection against solid objects larger than 1mm and splashes of water from any direction.
- **Mounting:** Designed for secure wall mounting.
- **Material:** High-quality glass with a polished finish.
- **Included:** Fixing set for installation.

Image 1: The Villeroy & Boch Finion LED Illuminated Mirror G6001200 installed above a vanity in a contemporary bathroom. The mirror features a rectangular shape with integrated LED lighting around its perimeter, providing bright, even illumination. A wall-mounted toilet and shower area are visible in the background.

3. Safety Information

Please observe the following safety precautions to prevent injury or damage to the product:

- **Electrical Safety:** Installation must be carried out by a qualified electrician in accordance with local wiring regulations and standards. Ensure the main power supply is disconnected before commencing any installation or maintenance work.
- **Handling:** The mirror is made of glass and can be heavy. Handle with care to avoid breakage and injury. It is recommended that two people handle the mirror during installation.
- **Environment:** This mirror is rated IP44, making it suitable for use in bathroom zones 2 and 3. Do not install in areas where it may be directly exposed to water jets or immersion.
- **Cleaning:** Use only soft, damp cloths and mild, non-abrasive cleaners. Avoid harsh chemicals or abrasive materials that could damage the mirror surface or frame.
- **Children:** Keep packaging materials out of reach of children. This product is not a toy.

4. Setup and Installation

The Villeroy & Boch Finion LED Illuminated Mirror requires assembly and professional installation. A fixing set is included with your mirror.

Installation Steps:

1. **Unpacking:** Carefully unpack the mirror and all components. Inspect for any damage. Do not discard packaging until installation is complete and satisfactory.

2. **Power Disconnection:** Ensure the main electrical supply to the installation area is switched off at the consumer unit/fuse box.
3. **Positioning:** Determine the desired mounting height and location for the mirror. Mark the drilling points on the wall using the provided template or measurements from the fixing set. Ensure there are no hidden pipes or electrical cables in the wall at the drilling points.
4. **Drilling:** Drill holes at the marked positions using an appropriate drill bit for your wall type. Insert wall plugs (if required and provided) into the drilled holes.
5. **Mounting Brackets:** Secure the mounting brackets to the wall using the screws from the fixing set. Ensure they are level and securely fastened.
6. **Electrical Connection:** Connect the mirror's electrical wiring to the mains supply according to the wiring diagram provided in the fixing set and local electrical regulations. This step must be performed by a qualified electrician.
7. **Mounting the Mirror:** Carefully lift the mirror and hook it onto the wall-mounted brackets. Ensure it is securely seated and level.
8. **Final Check:** Once the mirror is securely mounted and wired, restore power and test the illumination functions.

Image 2: The Villeroy & Boch Finion LED Illuminated Mirror G6001200 in a bright bathroom with a large window. The mirror's rectangular form and integrated lighting complement the modern aesthetic, positioned above a double vanity with a rectangular basin. The lighting provides a soft glow, enhancing the room's ambiance.

5. Operating Instructions

The Villeroy & Boch Finion LED Illuminated Mirror features intuitive controls for its lighting functions.

Turning On/Off the Illumination:

Locate the touch sensor or switch, typically integrated into the mirror surface or frame. A single touch will turn the LED illumination on or off.

Adjusting Color Temperature:

If your mirror model includes color temperature adjustment, there will be a dedicated touch control or a sequence of touches on the main sensor. Typically, holding down the touch sensor for a few seconds or repeatedly tapping it will cycle through the available color temperature settings, from warm white (2700 K) to daylight white (6480 K). Release the sensor when the desired color temperature is achieved.

6. Maintenance

Regular cleaning and proper care will help maintain the appearance and functionality of your mirror.

- **Cleaning the Mirror Surface:** Use a soft, lint-free cloth dampened with water or a non-abrasive glass cleaner. Spray cleaner onto the cloth, not directly onto the mirror, to prevent liquid from seeping into the edges or electrical components. Wipe gently to avoid streaks.
- **Cleaning the Frame/Edges:** Use a soft, damp cloth with mild soap and water. Dry thoroughly with a clean, soft cloth.
- **Avoid:** Do not use abrasive cleaners, scouring pads, ammonia-based cleaners, or acidic/alkaline cleaning agents, as these can damage the mirror's surface, coating, or frame finish.
- **Electrical Components:** Ensure the mirror is switched off and disconnected from the power supply before cleaning near any electrical components. Do not spray water directly onto the mirror's electrical parts.

Image 3: The Villeroy & Boch Finion LED Illuminated Mirror G6001200 in a bathroom with dark grey walls and wooden accents. The mirror's bright LED frame stands out, providing ample light over a white countertop basin. The overall design emphasizes a sleek and modern aesthetic.

7. Troubleshooting

If you encounter issues with your mirror, please refer to the following common troubleshooting steps:

- **Light Does Not Turn On:**
  - Check if the main power supply to the mirror is switched on.
  - Verify that the electrical connections are secure (this should be checked by a qualified electrician).
  - Ensure the touch sensor is clean and unobstructed.
- **Light Flickers or Is Dim:**
  - Check for stable power supply.
  - If the issue persists, contact a qualified electrician to inspect the wiring and connections.
- **Color Temperature Adjustment Not Working:**
  - Ensure you are using the correct gesture (e.g., long press, multiple taps) as described in the operating instructions.
  - Clean the touch sensor area.

If these steps do not resolve the issue, please contact Villeroy & Boch customer support or a qualified service technician.
