

Fette Filter HRF-AP1

Fette Filter Replacement Set for Honeywell HPA300 Series Air Purifiers

Instruction Manual for 6 HEPA Filters + 8 Pre-Filters

1. INTRODUCTION

This manual provides essential information for the installation and maintenance of your Fette Filter replacement set. This set includes 6 HEPA filters and 8 activated carbon pre-filters, designed to maintain optimal air quality in your home when used with compatible Honeywell air purifiers.

2. PRODUCT OVERVIEW

The Fette Filter replacement set is engineered to capture airborne particles and odors, contributing to a cleaner indoor environment. It consists of two primary filter types:

- **HEPA Filters:** These filters are designed to capture up to 99.97% of airborne particles as small as 0.3 microns, including dust, pollen, pet dander, and smoke particles.
- **Activated Carbon Pre-Filters:** These pre-filters serve as the first line of defense, capturing larger particles and significantly reducing common household odors, smoke, and volatile organic compounds (VOCs).

3. COMPATIBILITY

This Fette Filter replacement set is compatible with the following Honeywell Air Purifier models:

- Honeywell HPA300
- Honeywell HPA304
- Honeywell HPA8350
- Honeywell HPA300VP
- Honeywell HPA5350
- Honeywell HPA5300B

These filters are designed as alternatives to Honeywell filter models HRF-R3, HRF-R2, HRF-R1, HRF-AP1, and HRF-A300.

4. PACKAGE CONTENTS

Your Fette Filter replacement set includes:

- 6 x HEPA Filters (Type R equivalent)
- 8 x Activated Carbon Pre-Filters (Type A equivalent)

Fette Filter **VALUE PACK** **14** **PIECE**

INCREDIBLE VALUE
This set provides enough clean replacement filters to improve the air quality in your home

PREMIUM QUALITY
True HEPA air performance purifiers captures up to 99.97 percent of particles

GREAT FIT
Compatible with Honeywell* 300* Air Purifiers
* Registered trademark / model number of product manufacturer

COMPLETE REPLACEMENTS
Our premium air purifier filter value pack helps you replace your filters more often.

5. INSTALLATION (FILTER REPLACEMENT)

Follow these general steps to replace the filters in your compatible Honeywell Air Purifier. Always refer to your specific air purifier's instruction manual for detailed, model-specific instructions.

1. **Power Off and Unplug:** Before attempting any filter replacement, ensure your air purifier is turned off and unplugged from the power outlet.
2. **Access Filter Compartment:** Open the front grille or access panel of your air purifier. This usually involves pressing release tabs or unlatching clips.
3. **Remove Used Pre-Filter:** Carefully remove the old activated carbon pre-filter. Dispose of it properly.
4. **Remove Used HEPA Filters:** Remove the old HEPA filters. Note their orientation for correct installation of the new filters. Dispose of them properly.
5. **Install New HEPA Filters:** Insert the new Fette Filter HEPA filters into the designated slots. Ensure they are seated correctly and securely. Some filters may have an arrow indicating airflow direction; ensure it matches the purifier's design.

6. **Install New Pre-Filter:** Place a new Fette Filter activated carbon pre-filter over the HEPA filters. The pre-filter should cover the entire surface of the HEPA filters. Ensure it lies flat.
7. **Close Compartment:** Close the front grille or access panel until it clicks securely into place.
8. **Reset Filter Indicator:** Plug in and power on your air purifier. Consult your air purifier's manual for instructions on how to reset the filter change indicator light, if applicable.

6. MAINTENANCE

Regular filter replacement is crucial for maintaining the performance of your air purifier and ensuring optimal air quality.

- **HEPA Filters:** It is recommended to replace the HEPA filters approximately every 12 months, depending on usage and air quality conditions.
- **Activated Carbon Pre-Filters:** The pre-filters should be replaced approximately every 3 months, or more frequently if noticeable odors persist or if the filter appears heavily soiled.

Note: These are general guidelines. Your air purifier's filter indicator light will also signal when a replacement is due. Do not attempt to wash or clean these filters; they are designed for replacement.

7. TROUBLESHOOTING

If you encounter issues after replacing your filters, consider the following:

- **Air Quality Not Improving:**

- Ensure all filters are installed correctly and securely.
- Verify that the air purifier's filter indicator light has been reset (refer to your air purifier's manual).
- Check for any obstructions around the air intake or output vents of the purifier.

- **Filters Not Fitting Properly:**

- Confirm that your air purifier model is listed in the compatibility section (Section 3).
- Ensure the filters are oriented correctly according to your air purifier's design.
- The pre-filters are designed to be flexible; ensure they are unfolded and laid flat before installation.

- **Unusual Odors After Replacement:**

- A slight initial odor from new carbon filters is normal and should dissipate quickly.
- If strong or persistent odors occur, ensure the pre-filter is correctly installed and not damaged.

For issues related to the air purifier unit itself (e.g., power failure, unusual noises), please consult the original manufacturer's manual for your Honeywell Air Purifier.

8. SPECIFICATIONS

Brand	Fette Filter
Model Number (Equivalent)	HRF-AP1
Compatible Devices	Honeywell HPA300, HPA304, HPA8350, HPA300VP, HPA5350, HPA5300B
Material Type	True HEPA, Activated Carbon
Product Dimensions	HEPA filters: 10.5"L x 1.6"W x 6.5"Th, Pre-filters: 14.2" x 17.2" x 0.2"
Item Weight	Approximately 3.54 pounds (entire set)
UPC	819470024566
Number of Items	14 (6 HEPA filters, 8 Pre-filters)
