## SETUP

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify all components are present: main unit, telescopic pole, hanger, steam hose with nozzle, fabric brush, and collar helper.
2. **Assemble Pole and Hanger:** Insert the telescopic pole into the designated opening on the main unit. Secure the hanger assembly to the top of the telescopic pole.
3. **Attach Steam Hose:** Connect the steam hose to the steam outlet on the main unit, ensuring it is securely fastened.
4. **Fill Water Tank:** Remove the water tank from the main unit. Fill the tank with distilled or demineralized water. Do not exceed the maximum fill line. Reinsert the water tank securely into the main unit.
5. **Position Steamer:** Place the steamer on a flat, stable surface. Ensure the power cord is not obstructed and is within reach of a suitable electrical outlet.

## OPERATING INSTRUCTIONS

1. **Power On:** Plug the power cord into a standard 120V AC electrical outlet. Press the power button to turn on the steamer. The indicator light will illuminate.
2. **Heat Up:** Allow approximately 45 seconds for the steamer to heat up and produce steam. The indicator light may change or turn off once ready, depending on the model.
3. **Select Steam Setting:** The SF-562 offers two steam settings. Adjust the setting based on the fabric type. Use lower settings for delicate fabrics and higher settings for heavier materials.
4. **Prepare Garment:** Hang the garment on the integrated hanger. For best results, gently pull the fabric taut with one hand while steaming with the other.
5. **Begin Steaming:** Hold the steam nozzle a few inches from the fabric. Move the nozzle in a downward motion, allowing the steam to penetrate the fibers. For stubborn wrinkles, hold the nozzle closer or use the fabric brush attachment.
6. **Continuous Steam:** The steamer provides up to 96 minutes of continuous steam on a full 86-ounce tank.
7. **Power Off:** When finished, press the power button to turn off the steamer and unplug it from the outlet.
8. **Cool Down:** Allow the unit to cool completely before emptying the water tank or storing.

## MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your steamer.

- **Empty Water Tank:** After each use, empty any remaining water from the tank to prevent mineral buildup.
- **Cleaning Exterior:** Wipe the exterior of the steamer with a soft, damp cloth. Do not use abrasive cleaners.
- **Descaling (Monthly or as needed):** If you notice reduced steam output or mineral deposits, descaling is necessary.
  - a. Mix a solution of 50% white vinegar and 50% water.
  - b. Pour the solution into the water tank.
  - c. Run the steamer until half of the solution has been used.
  - d. Turn off and unplug the steamer, allowing it to sit for 30 minutes.
  - e. Repeat the steaming process until the tank is empty.
  - f. Rinse the tank thoroughly with fresh water and run a full tank of fresh water through the steamer to flush out any remaining vinegar.
- **Storage:** Store the steamer in a cool, dry place. Ensure the water tank is empty and the unit is completely cool before storing.
