## 4. SETUP

Once assembled, place the bakers rack in your desired location. Consider the following for optimal setup:

- **Location:** Choose a flat, stable surface. For kitchen use, ensure it's near power outlets if you plan to place appliances like microwaves or coffee makers on it.
- **Leveling:** Utilize the adjustable feet at the bottom of the rack to ensure it is perfectly level and stable, preventing wobbling. Turn the feet clockwise or counter-clockwise to adjust height.
- **Weight Distribution:** Distribute heavier items on lower shelves to maintain stability. The main countertop is designed for heavier appliances like microwaves or stand mixers.
- **Clearance:** Ensure adequate clearance around the rack for easy access to items and proper ventilation for any appliances.

## 5. USAGE GUIDELINES

The Tribesigns 5-Tier Kitchen Bakers Rack is designed for static storage and display. Follow these guidelines for safe and effective use:

- **Load Capacity:** Do not exceed the recommended weight capacity for each shelf. Overloading can compromise the structural integrity of the unit.
- **Appliance Placement:** When placing electrical appliances, ensure their cords are managed safely and do not pose a tripping hazard or get pinched.
- **Stability Check:** Periodically check the stability of the rack, especially after moving it or rearranging items. Re-adjust the leveling feet if necessary.
- **Child Safety:** If children are present, consider securing the unit to a wall using anti-tip hardware (if provided or purchased separately) to prevent accidental tipping.

## 6. MAINTENANCE

To ensure the longevity and appearance of your Tribesigns Bakers Rack, follow these simple maintenance tips:

- **Cleaning:** Wipe with a dry cloth. For stubborn spots, a slightly damp cloth can be used, followed immediately by a dry cloth to prevent moisture damage to the engineered wood. Avoid harsh chemicals or abrasive cleaners.
- **Spills:** Clean up spills immediately to prevent staining or damage to the wood surfaces.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they are tight. Re-tighten if necessary to maintain structural integrity.

- **Avoid Direct Sunlight/Heat:** Prolonged exposure to direct sunlight or extreme heat can cause fading or warping of the wood.
