SETUP

Your Engel cooler comes ready for use with minimal setup required.

1. **Initial Cleaning:** Before first use, clean the interior and exterior of the cooler with mild soap and water. Rinse thoroughly and dry.
2. **Pre-Chill (Optional but Recommended):** For optimal ice retention, pre-chill your cooler by placing a bag of ice or frozen water bottles inside for several hours or overnight before loading it with contents.
3. **Drain Plug:** Ensure the one-twist drain plug is securely tightened to prevent leaks during transport and use.

OPERATING YOUR COOLER

Follow these guidelines to maximize the performance of your Engel cooler:

- **Loading Contents:** For best results, load the cooler with pre-chilled or frozen items. Fill any empty space with

ice to reduce air pockets, which can accelerate ice melt.

- **Ice Type:** Block ice melts slower than cubed ice. A combination of both can be effective.
- **Minimize Opening:** The more frequently the lid is opened, the faster the ice will melt. Plan your access to contents to keep the lid closed as much as possible.
- **Placement:** Keep the cooler in a shaded area whenever possible. Avoid direct sunlight or hot surfaces.
- **Capacity:** The ENG65 has a 58-quart capacity, capable of holding approximately 70 cans.

Using the Bottle Opener

Your Engel cooler features a convenient integrated bottle opener. Simply place the bottle cap under the opener and leverage the bottle downwards to remove the cap.

MAINTENANCE

Proper care will extend the life and performance of your cooler.

- **Cleaning:** After each use, drain any melted ice and clean the interior with mild soap and warm water. For stubborn stains, a mixture of baking soda and water can be used. Rinse thoroughly.
- **Odor Prevention:** To prevent odors, ensure the cooler is completely dry before storing. You may leave the lid slightly ajar during storage to allow for air circulation.
- **Gasket Care:** Periodically inspect the lid gasket for any signs of wear or damage. Keep the gasket clean to maintain an effective seal.
- **Storage:** Store your cooler in a cool, dry place away from direct sunlight when not in use.
