Sluban M38-B0711

Sluban Italy Army M14/41 Medium Tank 2-in-1 Building Set Instruction Manual

Model: M38-B0711

1. Product Overview

This instruction manual provides detailed guidance for assembling and maintaining your Sluban Italy Army M14/41 Medium Tank 2-in-1 building set. This set allows you to construct either an M14/41 Medium Tank or a Semovente da 75/18 self-propelled gun, offering versatile building options from a single kit.
The set consists of 463 plastic building blocks designed for easy assembly and storage. It promotes dexterity, classification skills, construction abilities, motor skills, and creative thinking.

2. Safety Information

WARNING: CHOKING HAZARD - Small parts.
This product contains small parts and is not suitable for children under 3 years of age. Adult supervision is recommended during assembly and play, especially for younger users.

- Keep all small parts away from infants and young children to prevent accidental ingestion.
- Ensure all connections are secure during assembly to avoid parts detaching during play.
- Do not modify the product in any way not described in these instructions.

3. Package Contents

Upon opening the box, please verify that all components are present. Your Sluban M38-B0711 building set includes:

- 463 assorted plastic building blocks.
- Detailed instruction booklet for assembly of both tank configurations.
- Additional accessories (e.g., figures, small weapons) as depicted on the packaging.

If any parts are missing or damaged, please contact customer support (see Section 9).

4. Setup and Assembly

Follow the step-by-step instructions provided in the included booklet for easy assembly. The set offers two distinct models

to build: the M14/41 Medium Tank or the Semovente da 75/18. Choose your desired model before starting assembly.

1. **Preparation:** Unpack all components and organize them by color and shape to facilitate assembly.
2. **Follow Instructions:** Refer to the detailed instruction booklet. Each step is illustrated to guide you through the building process.
3. **Secure Connections:** Ensure each block is firmly connected to the next to create a stable structure.
4. **Two-in-One Build:** The manual will indicate specific sections for building either the M14/41 tank or the Semovente. Pay close attention to these distinctions.

5. Operating the Model

Once assembled, your Sluban M14/41 Medium Tank or Semovente da 75/18 model is ready for display or imaginative play. This model is designed for static display and interactive play, allowing for movement of certain parts.

- **Movable Turret:** The tank's turret can typically rotate, allowing for dynamic posing.
- **Rolling Tracks:** The tracks are designed to roll, enabling the model to be moved across smooth surfaces.
- **Figures:** Position the included figures within or around the model to create various scenes.

Avoid applying excessive force to movable parts to prevent damage. This model does not require batteries for operation.

6. Maintenance

To ensure the longevity and appearance of your Sluban building set, follow these simple maintenance guidelines:

- **Cleaning:** The plastic blocks can be gently cleaned with a damp cloth and water. Avoid harsh chemicals or abrasive cleaners, as these may damage the plastic or printed details.
- **Storage:** When not on display, store the model in a cool, dry place away from direct sunlight to prevent discoloration or warping of the plastic. The set is designed for easy storage.
- **Dusting:** Regularly dust the model with a soft brush or cloth to prevent dust buildup in crevices.

7. Troubleshooting

If you encounter any issues during assembly or with the finished model, consider the following:

- **Missing or Damaged Parts:** Double-check all packaging materials. If parts are genuinely missing or damaged, contact Sluban customer support with your model number (M38-B0711) and a description of the issue.
- **Difficulty Connecting Blocks:** Ensure blocks are aligned correctly. Apply firm, even pressure. If a block is consistently difficult, check for any molding imperfections.
- **Model Instability:** Re-examine the assembly steps, particularly for the base and structural components. Ensure all blocks are fully pressed together.
- **Incorrect Model Built:** If you accidentally built the wrong model, carefully disassemble the relevant sections and re-assemble according to the instructions for your desired configuration.
