AXA Resolute Cable Lock Model 59430602SC User Manual

Comprehensive instructions for the AXA Resolute Cable Lock.

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your AXA Resolute Cable Lock, Model 59430602SC. Please read these instructions carefully before using the product to ensure optimal security and longevity.

2. PRODUCT OVERVIEW

The AXA Resolute Cable Lock is designed to secure bicycles and other items. It features a flexible cable and a key-operated locking mechanism. The lock is constructed from durable aluminum and is designed for ease of use.

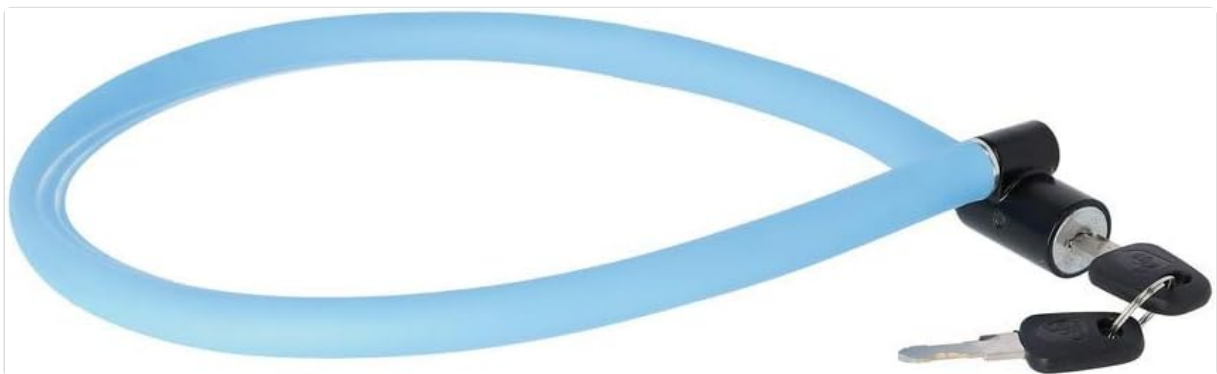

Figure 1: The AXA Resolute Cable Lock. This image displays the cable lock with its flexible blue cable and the key mechanism, accompanied by two keys.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- 1 x AXA Resolute Cable Lock (Model 59430602SC)

- 2 x Keys

4. SETUP

The AXA Resolute Cable Lock requires minimal setup. It is ready for use directly out of the package.

1. **Inspect the Lock:** Before first use, visually inspect the cable and the lock mechanism for any signs of damage or manufacturing defects.
2. **Key Identification:** Identify the two provided keys. Keep one key in a safe, accessible location and the other as a spare.
3. **Test Operation:** Insert a key into the lock cylinder and turn it to ensure smooth operation of the locking and unlocking mechanism.

5. OPERATING INSTRUCTIONS

Follow these steps to properly secure and unlock your items:

1. **To Lock:**
 - Wrap the cable around the item you wish to secure (e.g., bicycle frame, wheel) and a fixed, immovable object (e.g., bike rack, lamppost).
 - Insert the free end of the cable into the locking mechanism.
 - Push the cable end firmly into the lock until it clicks into place. The lock is now engaged.
 - Remove the key.
2. **To Unlock:**
 - Insert the key into the lock cylinder.
 - Turn the key clockwise (or counter-clockwise, depending on the lock) until the cable releases.
 - Remove the cable from the locking mechanism.
 - Remove the key.

Important: Always ensure the cable is securely fastened to a fixed object and the item you are protecting. Do not leave keys in the lock when not in use.

6. MAINTENANCE

Regular maintenance helps ensure the longevity and smooth operation of your cable lock:

- **Cleaning:** Wipe the cable and lock body with a damp cloth to remove dirt and grime. Avoid harsh chemicals.
- **Lubrication:** Periodically apply a small amount of graphite-based lubricant or a specialized lock lubricant into the keyhole to keep the mechanism working smoothly. Do not use oil-based lubricants as they can attract dirt.
- **Storage:** Store the lock in a dry environment when not in use to prevent corrosion.

7. TROUBLESHOOTING

If you encounter issues with your AXA Resolute Cable Lock, consider the following:

Problem	Possible Cause	Solution
Key is difficult to insert or turn.	Dirt or debris in the keyhole; lack of lubrication.	Apply lock lubricant to the keyhole. Gently wiggle the key while turning. Do not force the key.
Cable does not lock securely.	Cable not fully inserted; internal mechanism obstruction.	Ensure the cable end is pushed firmly until it clicks. Check for any visible obstructions.
Lock mechanism feels stiff.	Lack of lubrication; exposure to elements.	Lubricate the lock mechanism as described in the Maintenance section.

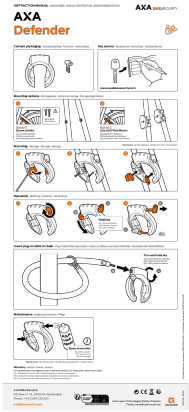

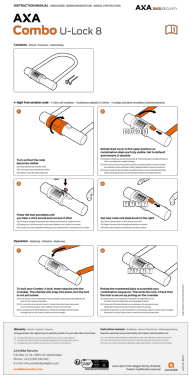

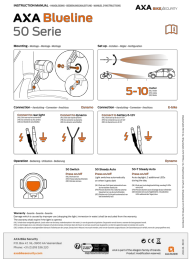

If problems persist, contact AXA customer support for further assistance.
