

HUAWEI H112-372

HUAWEI H112-372 5G CPE Wi-Fi Router User Manual

Model: H112-372

1. INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your HUAWEI H112-372 5G CPE Wi-Fi Router. This device is designed to provide high-speed internet access using 5G cellular technology, converting it into a Wi-Fi signal for your home or office network. Please read this manual carefully before using the device to ensure proper functionality and safety.

2. PRODUCT OVERVIEW

The HUAWEI H112-372 is a 5G CPE (Customer Premises Equipment) Wi-Fi Router that supports 5G connectivity and dual-band Wi-Fi (802.11ac). It is designed for stable and fast wireless internet access.

2.1 Device Components

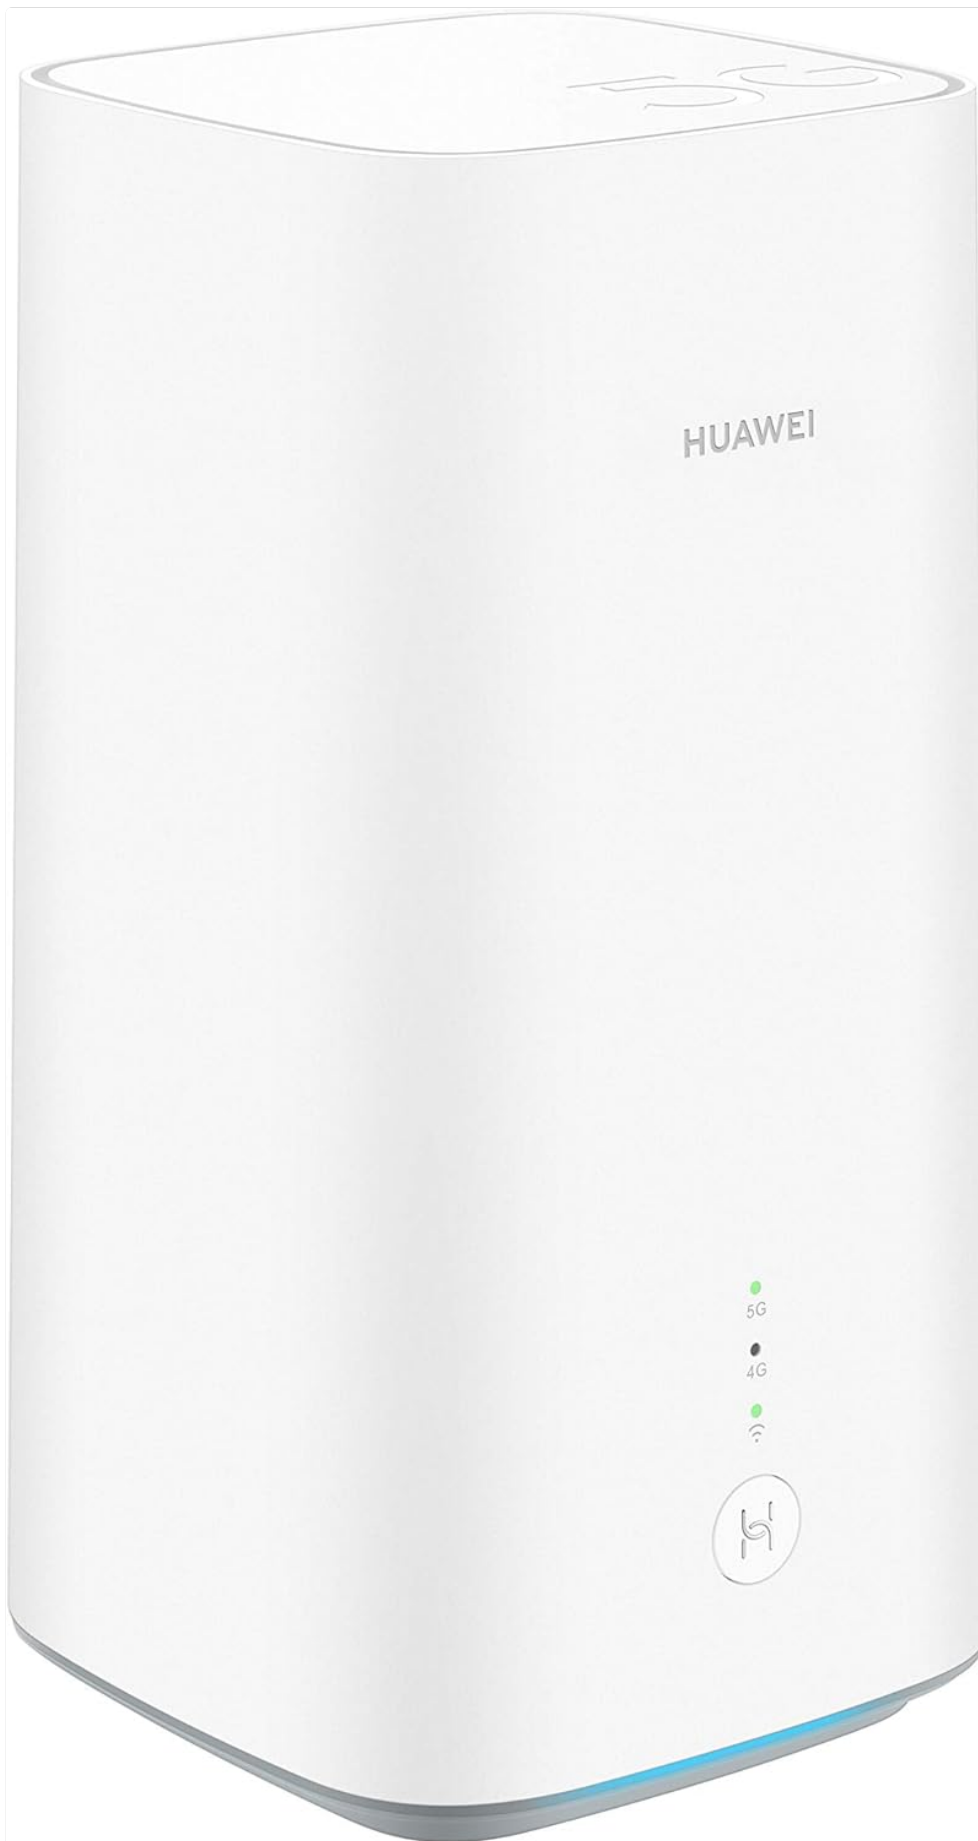

Figure 1: Front view of the HUAWEI H112-372 5G CPE Wi-Fi Router, showing the HUAWEI logo and indicator lights.

The router features a minimalist design with indicator lights on the front panel. The rear panel typically includes ports for power, Ethernet, and a SIM card slot.

2.2 Indicator Lights

- **5G Indicator:** Indicates 5G network status.

- **4G Indicator:** Indicates 4G network status.
- **Wi-Fi Indicator:** Shows Wi-Fi network activity.
- **Signal Strength Indicators:** Typically a series of lights indicating the strength of the cellular signal.
- **Power Indicator:** Indicates the power status of the device.

3. SETUP

Follow these steps to set up your HUAWEI H112-372 router.

3.1 SIM Card Installation

1. Locate the SIM card slot, usually on the bottom or rear panel of the router.
2. Insert a standard Nano-SIM card into the slot with the gold contacts facing down and the notched corner aligned correctly. Ensure it clicks into place.
3. Do not force the SIM card. If it does not fit, verify the orientation.

Figure 2: Side view of the router, illustrating where ports like the SIM card slot might be located.

3.2 Power Connection

1. Connect the power adapter to the router's power port.
2. Plug the power adapter into a wall outlet.
3. The power indicator light should turn on, indicating the device is receiving power.

3.3 Initial Network Connection

1. Wait for the router to power on and establish a cellular connection. The 5G or 4G indicator should turn solid.
2. On your computer or smartphone, search for available Wi-Fi networks.
3. Connect to the Wi-Fi network name (SSID) printed on the label at the bottom of your router.
4. Enter the Wi-Fi password (WPA Key) also found on the router's label.

4. OPERATING INSTRUCTIONS

4.1 Accessing the Web Management Interface

1. Ensure your device is connected to the router's Wi-Fi network or via an Ethernet cable.
2. Open a web browser and enter the default IP address (e.g., 192.168.8.1 or 192.168.1.1) or the web address (e.g., home.cpe) printed on the router's label.
3. Enter the username and password, also found on the router's label.
4. Follow the on-screen prompts for initial setup, including changing the default Wi-Fi name and password for security.

4.2 Basic Settings

- **Wi-Fi Name (SSID) and Password:** Navigate to the Wi-Fi settings to customize your network name and password. It is recommended to use a strong, unique password.
- **Network Mode:** The router supports 5G and 4G connectivity. You can typically configure preferred network modes (e.g., Auto, 5G Only, 4G Only) in the settings.
- **Access Point Mode:** This router supports Access Point Mode, allowing it to extend an existing wired network's Wi-Fi coverage. Refer to the web management interface for specific configuration steps if you wish to use this feature.
- **Security Protocol:** The device supports WPS (Wi-Fi Protected Setup) for easy connection, but for enhanced security, manual password entry is recommended.

5. MAINTENANCE

- **Regular Reboots:** Periodically restarting your router (e.g., once a month) can help maintain optimal performance and resolve minor network issues.
- **Firmware Updates:** Check the web management interface for available firmware updates. Keeping your router's firmware up-to-date ensures you have the latest features, security patches, and performance improvements.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the router. Avoid using liquid cleaners or abrasive materials. Ensure ventilation openings are free from dust.
- **Placement:** Place the router in an open area, away from obstructions, large metal objects, and other electronic devices that may cause interference. Optimal placement improves Wi-Fi signal strength and cellular reception.

6. TROUBLESHOOTING

6.1 Common Issues and Solutions

- **No Internet Connection:**
 - Check if the 5G/4G indicator is solid. If not, ensure the SIM card is correctly inserted and active.
 - Restart the router and your connected device.
 - Verify network settings in the web management interface.
 - Contact your mobile network provider to confirm service availability.
- **Slow Wi-Fi Speed:**
 - Ensure the router is placed in a central location, away from interference.
 - Check for other devices consuming bandwidth.
 - Restart the router.
 - Consider changing Wi-Fi channels in the web management interface to avoid congestion.
- **Cannot Access Web Management Interface:**

- Verify your device is connected to the router's Wi-Fi or via an Ethernet cable.
- Ensure you are using the correct IP address or web address.
- Clear your browser's cache or try a different browser.

6.2 Resetting the Router

If you encounter persistent issues, you may need to reset the router to its factory default settings. Locate the reset button (often a small pinhole) on the router. With the router powered on, use a pin or paperclip to press and hold the reset button for approximately 5-10 seconds until the indicators flash. The router will then restart with factory settings, requiring re-configuration.

7. SPECIFICATIONS

Feature	Detail
Brand	HUAWEI
Model Name	H112-372
Connectivity Technology	5G, Wi-Fi
Wireless Communication Standard	802.11ac
Frequency Band Class	Dual-Band
Operating System	RouterOS
Special Features	Access Point Mode
Security Protocol	WPS
Color	White
Item Weight	1.6 Kilograms
Manufacturer	Huawei

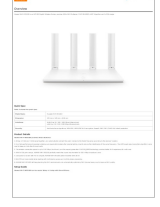

8. SAFETY INFORMATION

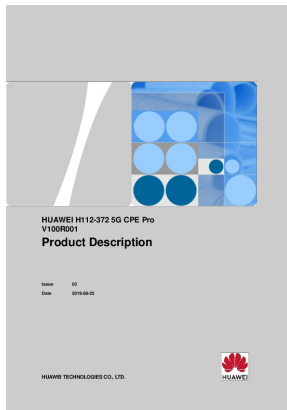

- Use only the original power adapter provided with the device.
- Do not expose the device to extreme temperatures, direct sunlight, or humid environments.
- Keep the device away from water and other liquids.
- Do not attempt to disassemble or repair the device yourself. Contact authorized service personnel for assistance.
- Ensure proper ventilation to prevent overheating.

9. WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the warranty card included with your product or visit the official HUAWEI support website. You can also contact HUAWEI customer service for assistance with product inquiries, troubleshooting, and service requests.

Xiaomi AX3600 Datasheet

Overview

Product Details

Model: AX3600 | Manufacturer: Xiaomi | Release Date: Q3 2023 | Status: Active

This document provides a comprehensive overview of the Xiaomi AX3600 router, detailing its features, specifications, and performance capabilities. It is intended for technical professionals and end-users seeking detailed information about this high-performance networking device.

Key Features & Benefits

Feature	Specification	Benefit	Impact
Processor	Quad-core ARM Cortex-A76	Enhanced processing power	Improved network management and stability
Memory	512MB DDR4	Increased storage capacity	Supports larger network buffers and faster data transfer
Antennas	6x High-Gain Antennas	Extended range and coverage	Ensures strong signal strength throughout the home
Ports	4x Gigabit Ethernet, 1x USB-C	High-speed connectivity	Enables fast data transfer and network expansion
Wireless Standards	Wi-Fi 6E (802.11ax)	Next-generation wireless technology	Offers faster speeds and lower latency than previous generations
Frequency Bands	2.4GHz, 5GHz, 6GHz	Multi-band operation	Reduces interference and improves overall network performance
Throughput	Up to 3.6 Gbps	High-speed data transfer	Supports multiple high-bandwidth applications simultaneously
Beamforming	4x4 MIMO	Targeted signal delivery	Optimizes signal strength for connected devices
Security	WPA3-Enterprise	Advanced security protocols	Protects network data and prevents unauthorized access
Management	Xiaomi Home App	Centralized control interface	Simplifies setup, configuration, and monitoring
Compatibility	Works with Xiaomi IoT ecosystem	Seamless integration	Enables smart home automation and control
Warranty	24-month warranty	Long-term support	Ensures reliability and peace of mind

System Requirements

For Best Performance

Ensure your system meets the following requirements:

Specifications

Model: AX3600 | Manufacturer: Xiaomi | Release Date: Q3 2023 | Status: Active

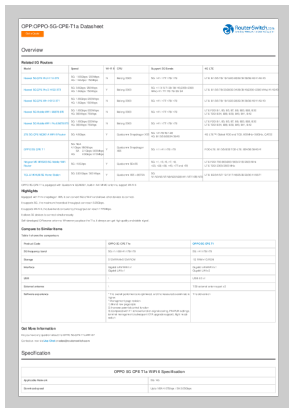

Category	Specification
General	- Model: AX3600 - Manufacturer: Xiaomi - Release Date: Q3 2023 - Status: Active
Processor	Quad-core ARM Cortex-A76
Memory	512MB DDR4
Ports	4x Gigabit Ethernet 1x USB-C
Wireless	- Wi-Fi 6E (802.11ax) 2.4GHz, 5GHz, 6GHz - Up to 3.6 Gbps
Security	WPA3-Enterprise
Management	Xiaomi Home App
Warranty	24-month warranty
Compliance	- CE Marked - FCC Part 15 - RoHS Compliant
Accessories	- Power Adapter - Ethernet Cable - User Manual
