Kraus FF-102BG

KRAUS Allyn 100% Lead-Free Kitchen Water Filter Faucet

Model: FF-102BG

Brand: Kraus

INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your KRAUS Allyn 100% Lead-Free Kitchen Water Filter Faucet, Model FF-102BG. Please read these instructions thoroughly before beginning installation or use to ensure proper function and longevity of your product. This faucet is designed to provide filtered cold water on demand and is compatible with various under-counter filtration systems (sold separately).

SAFETY INFORMATION

- Always turn off the main water supply before installing or performing any maintenance on the faucet.
- Wear appropriate personal protective equipment, such as safety glasses and gloves, during installation.
- Ensure all connections are secure to prevent leaks.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- This faucet is designed for cold water filtration systems only. Do not connect to hot water lines.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Allyn Water Filter Faucet (Model FF-102BG)
- Mounting Hardware

- Installation Instructions

SETUP AND INSTALLATION

The KRAUS Allyn FF-102BG faucet features a single-hole installation design. All necessary mounting hardware is included.

Pre-Installation Checks:

- **Water Supply:** Ensure the main water supply to your kitchen is turned off.
- **Countertop Hole:** Confirm your countertop has a single hole suitable for faucet installation. Refer to the dimensions image for specific requirements.
- **Filtration System:** This is a non-air gap faucet compatible with most under-counter Reverse Osmosis and simple filtration systems (not included). A recommended compatible system is the Kraus 2-Stage Carbon Block Under-Sink Water Filtration System (FS-1000).

Installation Steps:

1. **Prepare the Faucet:** Unpack the faucet and inspect all components for any damage.
2. **Mount the Faucet:** Insert the faucet body into the mounting hole on your countertop. Secure it from underneath using the provided mounting hardware (washer and nut). Tighten firmly but do not overtighten.
3. **Connect Water Line:** Connect the cold water supply line from your under-counter filtration system (not included) to the inlet on the faucet. Ensure a watertight seal.
4. **Test for Leaks:** Slowly turn on the main water supply and check all connections for leaks. If any leaks are detected, tighten the connections as needed.

DIMENSIONS

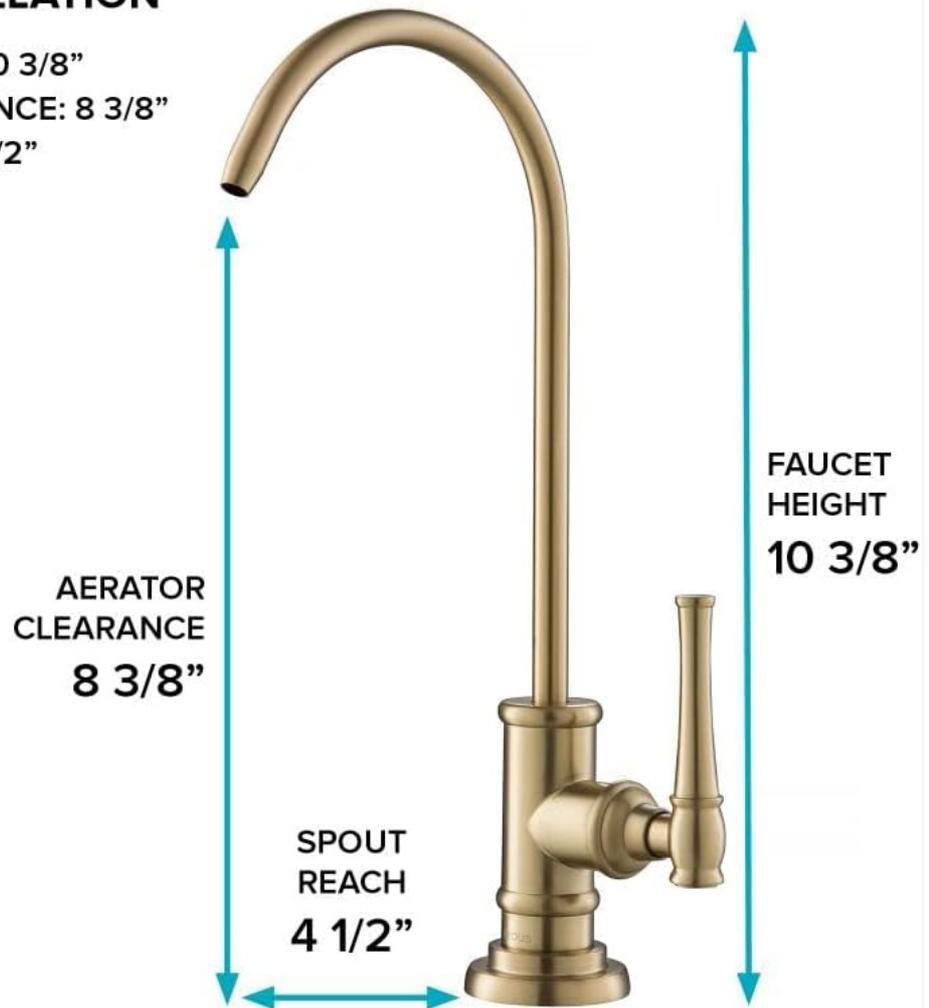

Kräus®

1 HOLE INSTALLATION

FAUCET HEIGHT: 10 3/8"

AERATOR CLEARANCE: 8 3/8"

OPERATING INSTRUCTIONS

The KRAUS Allyn FF-102BG features a single handle for easy control of filtered cold water.

- **Water Flow:** Move the single handle to the desired position to initiate and control the flow of filtered cold water.
- **Spout Rotation:** The high-arc spout rotates 360 degrees, providing complete sink access and making it convenient for filling glasses, pots, and reusable water bottles.

MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your KRAUS Allyn faucet.

- **Cleaning:** Clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the brushed gold finish.
- **Finish Care:** The flawless rust-resistant finish is designed to resist fading and tarnishing. For the Brushed Gold finish, gentle cleaning is sufficient to maintain its appearance.
- **Filter Replacement:** Follow the manufacturer's instructions for your specific under-counter filtration system regarding filter replacement schedules.

TROUBLESHOOTING

If you encounter issues with your faucet, refer to the following common troubleshooting steps:

- **Low Water Flow:**
 - Check if the water supply valve to the filtration system is fully open.

- Inspect the filter cartridge in your under-counter system; it may need replacement if clogged.
- Clean the aerator at the spout tip for any debris or mineral buildup.

- **Leaks:**

- Turn off the water supply immediately.
- Check all connections for tightness. Ensure all washers and seals are correctly seated.
- If the leak persists from the handle or spout, the internal ceramic cartridge may need inspection or replacement. Contact customer support for assistance.

- **No Water:**

- Verify that the main water supply is on.
- Ensure the water supply to the filtration system is open.
- Check if the filter cartridge is correctly installed and not completely clogged.
