Westinghouse 7233800 Vintage Indoor Ceiling Fan with Light User Manual

Model: 7233800 | 52 Inch, Polished Brass Finish

1. INTRODUCTION

Thank you for choosing the Westinghouse 7233800 Vintage Indoor Ceiling Fan with Light. This 52-inch ceiling fan features a polished brass finish, reversible walnut and oak blades, and an integrated light kit with dimmable B11 LED bulbs. Designed for large rooms up to 225 square feet, this fan provides efficient air circulation and illumination. This manual provides essential information for safe installation, operation, and maintenance of your new ceiling fan.

2. IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before beginning installation. Failure to follow these instructions could result in electric shock, fire, or personal injury.

- **Electrical Safety:** Ensure power is disconnected at the circuit breaker before installation or servicing. All electrical wiring must be in accordance with national and local electrical codes.
- **Mounting:** The fan must be mounted to a structurally sound ceiling joist or an outlet box rated for fan support (at least

35 lbs).

- **Blade Clearance:** Maintain a minimum clearance of 7 feet from the floor to the fan blades. Ensure blades are clear of any obstructions.
- **Light Bulbs:** Use only the specified type and wattage of light bulbs. This model includes three candelabra base 4.5 watt B11 LED bulbs.
- **Cleaning:** Always turn off the fan and disconnect power before cleaning. Use a soft, damp cloth; never use abrasive cleaners.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Ceiling Fan Assembly
- Instruction Manual (this document)
- Mounting Hardware Kit
- Reversible Fan Blades (Walnut/Oak)
- Light Kit with Clear Ribbed Glass
- Three Candelabra Base 4.5 Watt B11 LED Bulbs

4. INSTALLATION

Installation should be performed by a qualified electrician or a knowledgeable individual following all local electrical codes. The fan can be installed using a combo mount, allowing for either a close-to-ceiling (hugger) installation or with a down rod, depending on your room's height.

4.1 Preparing for Installation

1. Turn off power at the circuit breaker.
2. Secure the mounting bracket to the ceiling outlet box. Ensure the box is rated for fan support.
3. Assemble the fan motor housing and down rod (if using) according to the detailed diagrams in the printed manual.

4.2 Attaching Fan Blades

Your fan includes reversible blades with walnut and oak finishes. Choose the finish that best suits your decor.

Image 2: Close-up of the dark walnut wood grain on one side of a reversible fan blade.

Image 3: Close-up of the lighter oak wood grain on the reverse side of a reversible fan blade.

4. Attach each fan blade to the blade arms using the provided screws.
5. Secure the blade assemblies to the motor housing.

4.3 Wiring and Light Kit Installation

6. Connect the electrical wires from the fan to the house wiring, matching colors (e.g., black to black, white to white, ground to ground).
7. Attach the light kit to the fan motor housing.
8. Install the three B11 LED bulbs into the light kit sockets.
9. Attach the clear ribbed glass shades to the light kit.

4.4 Installation Video Guide

For a visual guide on the installation process and key features, please refer to the official product video below:

Video 1: Official Westinghouse product video demonstrating the features and installation aspects of the Vintage Ceiling Fan.

5. OPERATION

Your Westinghouse ceiling fan is designed for ease of use and year-round comfort.

5.1 Fan Speed and Light Control

The fan speed and light are controlled by separate pull chains located on the fan's housing. Pull the chain for the fan to cycle through speed settings (High, Medium, Low, Off). Pull the chain for the light to turn it On/Off.

Image 5: Top-down perspective of the ceiling fan, showing the five blades and the central light fixture with three illuminated bulbs.

5.2 Reverse Airflow Switch

A reverse airflow switch is located on the motor housing. This switch allows you to change the direction of the fan blades for seasonal use:

- **Summer Operation:** Set the switch to allow blades to rotate counter-clockwise, creating a downward airflow that produces a cooling effect.
- **Winter Operation:** Set the switch to allow blades to rotate clockwise, creating an upward airflow that circulates warm air trapped near the ceiling, helping to warm the room.

Always turn off the fan and wait for the blades to stop completely before changing the direction of the reverse switch.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your ceiling fan.

- **Cleaning:** Periodically clean the fan blades and motor housing with a soft, lint-free cloth. Do not use water or harsh detergents.

- **Tighten Screws:** Check all screws on the blade attachments and motor housing annually to ensure they are secure.
- **Bulb Replacement:** Replace bulbs with the same type and wattage (candelabra base 4.5 watt B11 LED bulbs). Ensure power is off before replacing.

7. TROUBLESHOOTING

If you experience issues with your fan, consult the following common solutions:

Problem	Possible Cause	Solution
Fan does not start	No power to the fan; loose wire connections; motor issue.	Check circuit breaker; verify all wire connections are secure; contact a qualified electrician.
Light does not work	Bulb is faulty; loose wire connection; light kit issue.	Replace bulb; check wire connections in the light kit; ensure pull chain is fully engaged.
Fan wobbles	Loose blade screws; unbalanced blades; improper mounting.	Tighten all blade screws; use a balancing kit (not included) to balance blades; ensure mounting bracket is secure.
Noisy operation	Loose screws; motor bearings; blades hitting an obstruction.	Check and tighten all screws; ensure no obstructions are near blades; if noise persists, contact customer support.

8. SPECIFICATIONS

Feature	Detail
Brand	Westinghouse
Model Name	Vintage
Item Model Number	7233800
Color	Polished Brass
Size	52 Inch
Product Dimensions	52"D x 52"W x 18.43"H
Item Weight	18.45 Pounds
Power Source	AC
Voltage	120 Volts
Wattage (Light)	4.5 watts per bulb (LED)
Airflow (High Speed)	4036 CFM
Energy Usage (without lights)	58 W
Airflow Efficiency	69 CFM/W
Indoor/Outdoor Usage	Indoor
Control Method	Pull Chain
