5. MAINTENANCE

Regular maintenance helps prolong the life of your washing machine and ensures optimal performance.

5.1 Cleaning the Detergent Dispenser

Periodically remove and clean the detergent dispenser drawer to prevent detergent residue buildup. Rinse it under running water and dry before reinserting.

5.2 Cleaning the Drum and Exterior

Wipe the exterior of the machine with a soft, damp cloth. For the drum, run a 'Drum Clean' cycle (if available) or a hot wash with no laundry and a cup of white vinegar or a washing machine cleaner.

5.3 Cleaning the Filter

Locate and clean the drain pump filter regularly (usually at the bottom front of the machine) to remove lint, coins, or other debris that may obstruct drainage.

5.4 Care for the Antibacterial Gasket

The antibacterial gasket helps prevent mold and mildew. After each wash, wipe the gasket dry with a cloth and leave the door slightly ajar to allow air circulation.
