3. SETUP

Connecting the Soundbar

The Genius Mini Soundbar 100 is designed for simple plug-and-play operation. Follow these steps to connect your soundbar:

1. **Connect the USB Power Cable:** Locate the USB-A connector on the soundbar's integrated cable. Plug this connector into an available USB port on your computer, laptop, or a USB power adapter (not included). The soundbar draws power directly from the USB connection.

2. **Connect the 3.5mm Audio Cable:** Locate the 3.5mm audio jack on the soundbar's integrated cable. Plug this jack into the 3.5mm audio output port (headphone jack) on your computer, laptop, smartphone, or television.

3. **Placement:** Place the soundbar on a stable, flat surface, such as a desk or TV stand, ensuring it is positioned for optimal sound projection.

4. OPERATING INSTRUCTIONS

Powering On/Off

The Genius Mini Soundbar 100 powers on automatically when connected to a powered USB port. There is no separate power button. To turn off the soundbar, simply disconnect the USB power cable.

Volume Control

The soundbar features an in-line volume control knob located on the audio cable. Rotate the knob clockwise to increase the volume and counter-clockwise to decrease it. You can also adjust the volume directly from your connected device (computer, smartphone, etc.).

Audio Playback

Once connected, the soundbar will function as the audio output device for your system. Ensure your device's audio output is set to the 3.5mm jack if you have multiple audio options. Play any audio content (music, videos, games) from your connected device, and the sound will be routed through the soundbar.

5. MAINTENANCE

To ensure the longevity and optimal performance of your Genius Mini Soundbar 100, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the soundbar. Do not use liquid cleaners, aerosols, or

abrasive solvents, as these may damage the finish or internal components.

- **Storage:** When not in use for extended periods, store the soundbar in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the soundbar or subjecting it to strong impacts. Do not attempt to disassemble the unit, as this will void the warranty.

6. TROUBLESHOOTING

If you encounter any issues with your soundbar, please refer to the following table for common problems and their solutions:

Problem	Possible Cause	Solution
No sound from the soundbar.	- USB power cable not connected or not receiving power. 3.5mm audio cable not connected properly. - Volume is too low or muted. - Incorrect audio output selected on your device.	- Ensure the USB cable is securely plugged into a working USB port. - Verify the 3.5mm audio cable is fully inserted into both the soundbar and your device's audio output. - Increase the volume using the in-line control and your device's volume settings. Ensure your device is not muted. - Check your device's sound settings and select the correct audio output (e.g., "Headphones" or "External Speakers").
Sound is distorted or unclear.	- Volume is too high. - Poor audio source quality. - Loose cable connection.	- Lower the volume on both the soundbar and your device. - Try playing audio from a different source or file to check if the issue persists. - Ensure all cables are securely connected.
Soundbar is not recognized by the computer.	- USB port issue. - Driver issue (unlikely for plug-and-play).	- Try connecting the USB cable to a different USB port on your computer. - Restart your computer.
