## MAINTENANCE

### Cleaning

To clean the speaker, use a soft, damp cloth. Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the speaker's finish or internal components. Ensure the charging port is dry before charging after cleaning.

### Storage

Store the speaker in a cool, dry place away from extreme temperatures and direct sunlight. If storing for an extended period, ensure the battery is partially charged (around 50%) to help maintain battery health.

### Water Exposure Care

After exposure to water, especially saltwater or chlorinated water, rinse the speaker with fresh water and allow it to air dry completely before charging or using it again. Ensure the charging port cover is sealed tightly when not in use to maintain its waterproof integrity.
