

## Mad Mars

# Mad Mars 12V LED Motorcycle Scooter Turn Signals User Manual

Model: Mars

## 1. INTRODUCTION

This manual provides essential information for the safe and effective installation, operation, and maintenance of your Mad Mars 12V LED Motorcycle Scooter Turn Signals. Please read this manual thoroughly before installation and keep it for future reference.

## 2. SAFETY INFORMATION

- **Electrical Safety:** Always disconnect the vehicle's battery before performing any electrical work to prevent short circuits or electrical shock.
- **Professional Installation:** If you are not familiar with motorcycle or scooter electrical systems, it is highly recommended to have these turn signals installed by a qualified professional.
- **Voltage Compatibility:** These turn signals are designed for 12V DC systems only. Do not connect to higher voltage systems.
- **Secure Mounting:** Ensure the turn signals are securely mounted to prevent detachment during vehicle operation.
- **CE Homologation:** These turn signals are CE approved, indicating compliance with European safety standards.

## 3. PACKAGE CONTENTS

- One (1) Pair of Mad Mars 12V LED Motorcycle Scooter Turn Signals (Orange)

## 4. SPECIFICATIONS

| Feature | Specification |
|---------|---------------|
| Brand   | Mad           |
| Model   | Mars          |

|                           |                |
|---------------------------|----------------|
| Voltage                   | 12 Volts DC    |
| Light Source Type         | LED            |
| Light Color               | Orange         |
| Mounting Thread Diameter  | 8mm            |
| Length (excluding thread) | 64mm           |
| Depth                     | 22mm           |
| Height                    | 18mm           |
| Weight (per item)         | 100g (approx.) |
| Assembly Required         | Yes            |
| Certification             | CE Approved    |

## 5. SETUP AND INSTALLATION

Follow these steps carefully for proper installation. Professional installation is recommended.

- 1. Prepare Vehicle:** Ensure the vehicle's ignition is off and the battery is disconnected to prevent electrical hazards.
- 2. Remove Old Turn Signals:** Carefully remove the existing turn signals from your motorcycle or scooter. Note the wiring connections.
- 3. Mount New Turn Signals:** Insert the threaded bolt of the Mad Mars turn signal into the mounting hole. Secure it with the provided nut, ensuring it is tight but not overtightened. The thread diameter is 8mm.

Image 1: Mad Mars 12V LED Turn Signals. This image shows a pair of orange LED turn signals with their wiring and mounting hardware.

#### 4. Wiring Connection:

- Identify the positive wire of the Mad Mars turn signal (typically yellow or red) and the negative/ground wire (typically black).
- Connect the positive wire of the turn signal to the vehicle's positive turn signal wire.
- Connect the negative wire of the turn signal to the vehicle's negative or ground wire.
- Use appropriate electrical connectors (not included) and ensure all connections are secure and insulated to prevent short circuits.

5. **Repeat for Second Turn Signal:** Follow the same steps for the other turn signal.

6. **Reconnect Battery and Test:** Reconnect the vehicle's battery. Turn on the ignition and test both turn signals to ensure they flash correctly. If they do not flash or flash too quickly/slowly, you may need a load resistor or an LED flasher relay (not included).

Image 2: Mad Mars 12V LED Turn Signals (Alternate View). This image provides another view of the orange LED turn signals, highlighting their compact design.

## 6. OPERATING INSTRUCTIONS

Once properly installed, the Mad Mars 12V LED Turn Signals operate in conjunction with your motorcycle or scooter's existing turn signal switch. Activate the left or right turn signal switch as you normally would to indicate a turn or lane change. The LED lights will flash to provide clear visibility to other road users.

## 7. MAINTENANCE

- **Cleaning:** Clean the turn signal lenses periodically with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the plastic.
- **Inspection:** Regularly check the mounting bolts for tightness and inspect the wiring for any signs of wear, fraying, or corrosion. Ensure the connections remain secure.
- **LED Longevity:** LED lights have a long lifespan and typically do not require replacement under normal operating conditions.

## 8. TROUBLESHOOTING

- **Turn Signals Not Lighting Up:**

- Check all wiring connections for proper contact and insulation.
- Verify that the vehicle's battery is charged and providing 12V power.
- Inspect the vehicle's turn signal fuse.

- **Turn Signals Flashing Too Fast (Hyper-flashing):**

- LED turn signals draw less power than traditional incandescent bulbs, which can cause the vehicle's flasher relay to interpret a bulb outage, resulting in hyper-flashing.
- This can typically be resolved by installing a load resistor (not included) in parallel with each LED turn signal or by replacing the stock flasher relay with an LED-compatible flasher relay (not included).

- **Turn Signals Not Flashing (Solid On):**

- This can also be caused by incompatibility with the vehicle's flasher relay. Consider installing a load resistor or an LED-compatible flasher relay.

## 9. WARRANTY AND SUPPORT

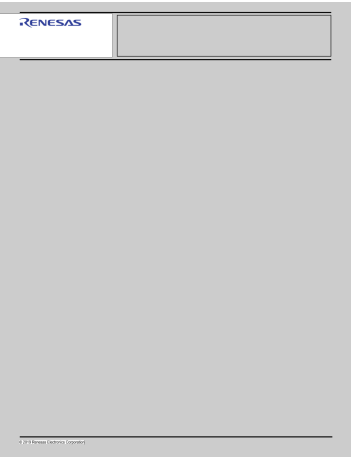

For warranty information or technical support, please refer to the purchase documentation or contact the seller directly. Keep your proof of purchase for any warranty claims.

### Terms and Conditions of SingSaver Exclusive: March Madness Grand Lucky Draw (the "Promotion")

1. Customers who successfully apply for an Eligible Product via SingSaver during the Promotion Period and complete the requirements set out herein will have a chance to receive a Lucky Draw Gift (each as defined herein).

#### 2. Promotion Period

- a. 15 March 2023 – 2 April 2023, both days inclusive, unless otherwise stated.

#### 3. Eligible Customers

In order to be eligible for a chance to receive a Lucky Draw Gift and to participate in the "Biggie Customer", a user is required to, during the Promotion Period:

- Be a Resident of Singapore.
- Submit an application for an Eligible Product through SingSaver as a main cardholder/buyer/holder/buyer owner during the Promotion Period through <https://www.singsaver.com.sg/eligibility> or <https://www.singsaver.com.sg/eligibility> during the Promotion Period.
- Create a SingSaver account on the SingSaver Website.
- Fully complete and submit the SingSaver Rewards Registration form (which shall be sent to the email address used to create the SingSaver account) within 14 days after completing their application for the Eligible Product.
- Have their application for the Eligible Product approved by the Product Provider as or before the Eligible Product Approval Date specified in Class 7, where the approval date is not and unconsidered.
- Fulfill any applicable specific requirements for the type of Eligible Product applied for as stated in Class 7 below and:
- Be online and present on SingSaver's Instagram (@singsaver\_sg) LIVE stream on 19 Jul 2023, from where winners of the Lucky Draw Gifts will be drawn and announced.

#### 4. Product Provider and Eligible Products

- a. For the purposes of the Promotion, Product Provider, Eligible Products and Lucky Draw Chances are as follows:

| Product Type            | Product Provider        | Eligible Products                                               | Lucky Draw Chances |

PRESS RELEASE

10-17-16

Proceeds from Line 6 'Mad T Party' Guitars to Be Donated in Support of MusiCares

Four customized JTV-49 and JTV-49S Varian guitars used by Mad T Party band at Disney California Adventure will be sold to help raise money for MusiCares

CALABASAS, Calif.— October 16, 2017 — Line 6, Inc. today announced that it is donating all proceeds from the sale of four customized JTV-49 and JTV-49S Varian® electric guitars previously used by Mad T Party at Disney California Adventure Park, which ended its limited time show in 2016. The proceeds from the sale will support the nonprofit organization MusiCares, which provides critical assistance to members of the music community.

Inspired by Tim Burton's Alice in Wonderland, the Mad T Party was a nighttime event that featured live musical performances, dancing, aerial acts, and more. The JTV-49 and JTV-49S Varian guitars used in the performance feature custom artwork by Disney artists, and are now for sale in the Line 6 online store.

"We are pleased to help support MusiCares in their initiative to provide critical assistance for music people in times of need," said Marcia Ryle, President, Line 6. "These custom Varian guitars represent a unique piece of Disney history, and will offer guitarists unmatched versatility, craftsmanship, and playability."

The Mad T Party band covered songs by a wide range of artists from different musical genres, including Bruno Mars, the Beatles, Maroon 5, Prince, Green Day, Lady Gaga, and more. The Mad T Party initially ran from 2012 to 2014, and then returned for the Diamond 60<sup>th</sup> Anniversary Celebration at Disneyland Resort from May 2015 through March 2016. When the show returned in 2015, the band's guitarist requested Varian JTV-49 as a way to quickly access the wide range of sounds and alternate tunings for which the Varian HD technology is known.

The JTV-49 and JTV-49S Varian guitars feature lightweight alder 5-piece bodies, one-piece maple necks with rosewood or maple fingerboards, precision components, and the highest-quality pickups. Custom wood to master luthier James Tyler's specs, Varian HD technology gives players instant access to the sounds of highly coveted, classic electric guitars, as well as sounds one would normally not expect to hear from an electric guitar, such as harp, slide, or 12-string acoustic. Alternate tunings, normally requiring a minute-long exercise on the tuning pegs, can be set and recalled at the touch of a knob.
