UpStart Components Dishwasher Bottom Door Gasket Replacement Manual

For Kenmore/Sears 587.15263900 and AP5809675 Compatible Models

INTRODUCTION

This manual provides instructions for the installation, maintenance, and troubleshooting of the UpStart Components 809006501 Dishwasher Bottom Door Gasket. This replacement part is designed for compatibility with Kenmore/Sears 587.15263900 and AP5809675 models, among others. Please read these instructions carefully before proceeding with installation to ensure proper function and safety.

Note: This is an UpStart Components brand replacement part and is not an OEM product. All mentions of brand names or model descriptions are made strictly to illustrate compatibility. This product is not affiliated with any original manufacturers.

SAFETY INFORMATION

- **Disconnect Power:** Always disconnect the dishwasher from its power source (unplug or turn off circuit breaker) before attempting any repairs or maintenance.
- **Wear Protective Gear:** Wear appropriate protective gear, such as gloves, to prevent injury during installation.
- **Sharp Edges:** Be aware of potential sharp edges inside the dishwasher during the removal and installation process.
- **Water Spills:** Have towels ready to absorb any residual water that may spill during the process.
- **Professional Assistance:** If you are unsure about any step, consult a qualified appliance technician.

PACKAGE CONTENTS

- 1 x UpStart Components Dishwasher Bottom Door Gasket (Model AP-809006501-DL723)

Components

INSTALLATION INSTRUCTIONS

This section outlines the general steps for replacing a dishwasher bottom door gasket. Specific steps may vary slightly depending on your dishwasher model. Always refer to your appliance's original service manual if available.

Tools Required:

- Flathead screwdriver or putty knife (for old gasket removal)
- Clean cloth
- Mild detergent (optional, for cleaning)

Step-by-Step Guide:

1. Prepare the Dishwasher:

Ensure the dishwasher is completely disconnected from its power supply. Open the dishwasher door fully.

2. Locate the Old Gasket:

The bottom door gasket is typically located along the bottom edge of the dishwasher door opening, where the door seals against the tub. It may be tucked into a channel.

3. Remove the Old Gasket:

Carefully pull the old gasket out of its channel. You may need to use a flathead screwdriver or putty knife to gently pry it out, working your way around the entire bottom edge. Dispose of the old gasket properly.

Image 2: A close-up view of the replacement gasket, showing its shape and material.

4. Clean the Gasket Channel:

With the old gasket removed, thoroughly clean the channel where the new gasket will sit. Remove any debris, food particles, or residue using a clean cloth and, if necessary, a mild detergent. Ensure the channel is dry before proceeding.

5. Install the New Gasket:

Begin by aligning one end of the new gasket with the channel. Gently press the gasket into the channel, working your way around the bottom edge of the dishwasher opening. Ensure the gasket is fully seated and secure in the channel. Do not stretch the gasket excessively during installation.

Image 3: A side view of the gasket, illustrating its profile for proper seating.

6. Test the Seal:

Once the new gasket is fully installed, close the dishwasher door firmly. Reconnect the dishwasher to its power supply. Run a short cycle and carefully check for any leaks around the bottom of the door. If leaks occur, open the door, inspect the gasket's seating, and adjust as necessary.

MAINTENANCE

Regular maintenance can extend the life of your dishwasher gasket and prevent leaks.

- **Regular Cleaning:** Periodically inspect and clean the bottom door gasket. Use a damp cloth and mild detergent to wipe away any food particles, grease, or residue that may accumulate.
- **Inspect for Damage:** Routinely check the gasket for any signs of wear, cracks, tears, or hardening. A damaged gasket should be replaced promptly to prevent leaks.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners or harsh chemicals on the gasket, as these can degrade the material.

TROUBLESHOOTING

Issue: Dishwasher Leaks from the Bottom of the Door

- **Gasket Not Seated Properly:** Open the door and carefully inspect the entire length of the bottom door gasket. Ensure it is fully and evenly seated in its channel. Press firmly along the gasket to secure it.
- **Debris on Gasket:** Food particles or other debris caught between the gasket and the dishwasher tub can

prevent a proper seal. Clean the gasket and the sealing surface thoroughly.

- **Damaged Gasket:** If the gasket is torn, cracked, or hardened, it will not form an effective seal and needs to be replaced.
- **Door Latch Issue:** Ensure the dishwasher door latches securely, applying even pressure across the gasket. A loose latch can prevent a tight seal.
- **Overfilling/Suds:** Excessive detergent or an issue with the water inlet valve can cause overfilling or excessive suds, leading to water escaping. Use the correct amount of detergent.

SPECIFICATIONS

Feature	Detail
Brand	UpStart Components
Part Number	AP-809006501-DL723
Compatible Part Numbers	809006501, AP5809675, 154576501, 154759101, 154297601, 154297602, 154297603, 154588201, 3290453, PS9495545
Compatibility	Kenmore/Sears 587.15263900 and other models using listed part numbers
Material	Durable, high-quality material
