## PRODUCT OVERVIEW

---

The LINCO 8884SB is a versatile accessory designed to enhance your mobile photography and videography. It functions as both a stable tripod and an extendable selfie stick, offering flexibility for various shooting scenarios.

### Key Features:

- **Dual Functionality:** Easily switch between selfie stick and tripod modes by attaching or detaching the center bar from the three legs.
- **User-Friendly Phone Holder:** Designed for single-hand control with enhanced soft grips to securely hold your smartphone.
- **Bluetooth Remote Control:** Capture photos and videos wirelessly.
- **Wide Compatibility:** Supports Apple, Samsung, and other smart cell phones.
- **Extendable Design:** Extends up to 52 inches for various perspectives.
- **Reinforced Tripod Base:** Provides stability and durability.

# 52inch EXTENDABLE

With the flexibility of our 20"-52" extendable tripod, you can effortlessly adjust the perspective and composition of your shots, giving your photographs a unique and captivating visual appeal.

## SETUP INSTRUCTIONS

---

### 1. Assemble the Phone Mount and Ball Head:

1. Screw the 360° Ball Head onto the top of the tripod pole.
2. Attach the Phone Mount to the 360° Ball Head. Ensure it is securely tightened.

Image: Diagram showing two methods for installing the phone mount onto the ball head, allowing for both horizontal and vertical phone orientation.

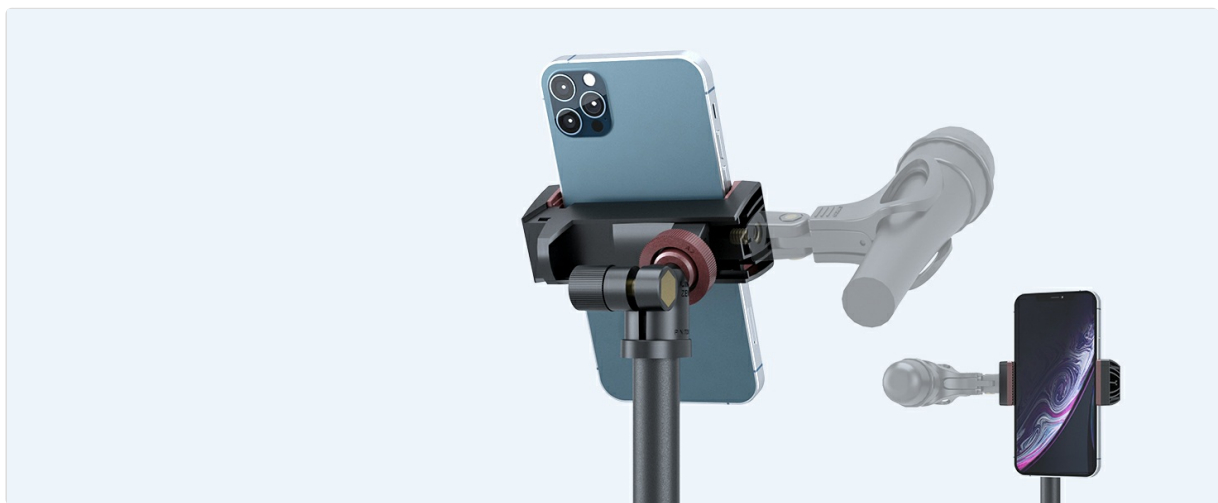

Image: A smartphone securely held in the phone mount, which is attached to the top of the selfie stick, ready for use.

## 2. Insert Your Smartphone:

1. Gently pull apart the clamps of the phone mount.
2. Place your smartphone between the clamps, ensuring it is centered and held firmly. The mount is compatible with phones between 2.2 and 3.5 inches wide.

# EFFORTLESS PHONE MOUNTING

Enjoy a seamless setup experience with the phone clamp's easy-to-install design, allowing you to focus on capturing moments rather than struggling with complicated attachments.

Image: A hand demonstrating the easy installation of a smartphone into the spring-loaded phone clamp, showing its universal compatibility with various phone models.

### 3. Pair the Bluetooth Remote:

1. Ensure the Bluetooth remote has a working battery (1 CR123A battery included).
2. Turn on the remote control using the power switch.
3. On your smartphone, navigate to Bluetooth settings and enable Bluetooth.
4. Look for a device named 'AB Shutter3' or similar in the list of available devices and select it to pair.
5. Once paired, the remote is ready to use for capturing photos and videos.

# CAPTURE FUN MOMENTS TOGETHER

Wireless remote, enabling you to capture spontaneous and fun moments with ease.

**33ft**  
Remote Control Range

Image: A hand holding the Bluetooth remote control, with a smartphone mounted on the tripod in the background, indicating wireless control.

## OPERATING INSTRUCTIONS

---

## 1. Switching Between Modes:

- **Tripod Mode:** Extend the three legs at the base of the pole until they are fully spread and stable on a flat surface. Adjust the height by loosening the clamps on the extendable sections, pulling them to the desired length, and then tightening the clamps securely.
- **Selfie Stick Mode:** Collapse the tripod legs and secure them together. The pole can be extended to your desired length for handheld use.

Image: Illustration showing how the tripod base can be detached from the main pole for compact storage or reattached for tripod functionality.

Image: A person skiing while holding the LINCO 8884SB in selfie stick mode, capturing a dynamic shot.

## 2. Adjusting Phone Orientation:

The 360° Ball Head allows for flexible positioning of your smartphone:

- Loosen the knob on the ball head to adjust the angle and rotation of your phone.
- Tighten the knob once the desired orientation (portrait or landscape) and angle are achieved.

# 360° FLEXIBLE SHOOTING

Explore creative possibilities by easily tilting and rotating the phone camera holder, enabling you to capture unique shots from any angle.

Image: The LINCO 8884SB tripod with a smartphone mounted, demonstrating the 360-degree rotation and tilt capabilities of the ball head for flexible shooting angles.

Image: A close-up view illustrating the tilting function of the phone mount on the ball head, allowing for vertical angle adjustments.

Image: A close-up view illustrating the rotational function of the phone mount on the ball head, enabling easy switching between portrait and landscape modes.

### 3. Using the Bluetooth Remote:

- Once paired, open your smartphone's camera application.
- Press the appropriate button on the remote (usually marked with a camera or video icon) to trigger the shutter for photos or start/stop video recording.
- The remote has an effective range of approximately 33 feet (10 meters).

## MAINTENANCE

- **Cleaning:** Wipe the tripod and remote with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures. Ensure all parts are collapsed and secured before storage.
- **Battery Replacement:** If the Bluetooth remote's performance degrades, replace the CR123A battery.
- **Inspection:** Periodically check all screws, clamps, and joints for tightness. Tighten any loose components to maintain stability.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
Bluetooth remote not pairing	Remote is off; battery is low; Bluetooth on phone is off; remote is already paired to another device.	Ensure remote is on. Replace battery. Turn on phone's Bluetooth. Unpair from other devices. Restart phone and remote.
Tripod unstable	Legs not fully extended; clamps not tightened; uneven surface; exceeding weight limit.	Fully extend legs. Tighten all clamps. Place on a flat, stable surface. Ensure phone weight is within 1.45 lbs limit.
Phone mount not holding phone securely	Phone size outside range (2.2-3.5 inches); mount not tightened.	Verify phone width. Ensure phone is centered. Check if the mount is securely attached to the ball head.

Issue	Possible Cause	Solution
Extendable pole sections slide down	Clamps not tightened sufficiently.	Ensure all section clamps are firmly tightened after extending the pole to the desired height.
