## 4. SETUP AND ASSEMBLY

1. **Unpacking:** Carefully remove all components from the packaging. Keep the original packaging for future storage or transport.
2. **Head Sculpt Attachment:** Select either the shocked or angry head sculpt. Gently align the neck joint of the chosen head sculpt with the body's neck peg and press firmly until secure.

3. **Hand Attachment:** Choose from the four pairs of interchangeable armored hands. Align the wrist peg of the desired hand with the wrist joint on the figure's arm and push gently.
4. **Nano Gauntlet:** The Nano Gauntlet features six LED light-up Infinity Stones. To activate, locate the battery compartment (typically on the underside or inside the gauntlet) and insert the required batteries (type not

specified, usually button cells). Attach the Nano Gauntlet to the left arm. An additional gestured hand for the Nano Gauntlet (finger-snapping) can be interchangeable as desired.

7. **Diorama Base:** Position the figure securely on the battlefield-inspired diorama figure base for display.

## 5. OPERATION

1. **Posing:** The figure features over 20 points of articulation. Gently manipulate the joints to achieve desired poses. Avoid forcing joints beyond their natural range of motion to prevent damage.

2. **LED Light-Up Function:** Activate the LED light-up function on the Nano Gauntlet by pressing the designated button (refer to the gauntlet for button location). Ensure batteries are correctly installed for functionality.
3. **Interchangeable Parts:** Experiment with different head sculpts and hand gestures to recreate iconic

scenes or customize your display.

## 6. MAINTENANCE AND CARE

---

- **Cleaning:** Dust the figure regularly with a soft, dry cloth or a soft brush. For stubborn dirt, lightly dampen a cloth with distilled water and gently wipe. Avoid harsh chemicals, solvents, or abrasive materials, as these can damage the paint and finish.
- **Storage:** Store the figure away from direct sunlight, extreme temperatures, and high humidity. These conditions can cause material degradation, color fading, or warping.
- **Posing:** While the figure is highly articulated, prolonged extreme poses, especially those that stretch or compress the seamless body parts (such as elbows or knees), may lead to material deformation or damage over time. It is recommended to return the figure to a neutral pose for long-term display.
- **Handling:** Always handle the figure by its main body, avoiding excessive pressure on delicate accessories or joints.

## 7. TROUBLESHOOTING

---

- **LED Light-Up Function Not Working:**
  - Check if batteries are correctly installed with the proper polarity.
  - Ensure batteries are not depleted and replace if necessary.
  - Verify the activation button is functioning by gently pressing it.
- **Parts Not Fitting Securely:**
  - Ensure the correct parts are being used for the intended connection point.
  - Gently warm the connection point (e.g., with warm water or a hairdryer on a low setting, briefly) to make the plastic more pliable, then attempt to connect. Do not overheat.
  - If a peg is too loose, a small amount of clear nail polish or super glue on the peg, allowed to dry completely, can add thickness for a tighter fit.
