## Vremi VRM010369N

# Vremi 3,000 Sq. Ft. Dehumidifier Instruction Manual

Model: VRM010369N | Brand: Vremi

## INTRODUCTION

Thank you for choosing the Vremi 3,000 Sq. Ft. Dehumidifier. This manual provides important information regarding the safe operation, installation, maintenance, and troubleshooting of your new appliance. Please read this manual thoroughly before operating the dehumidifier and retain it for future reference.

This Energy Star rated dehumidifier is designed to quietly and efficiently remove excess moisture from medium spaces and basements, helping to prevent mold, mildew, and improve air quality.

## SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

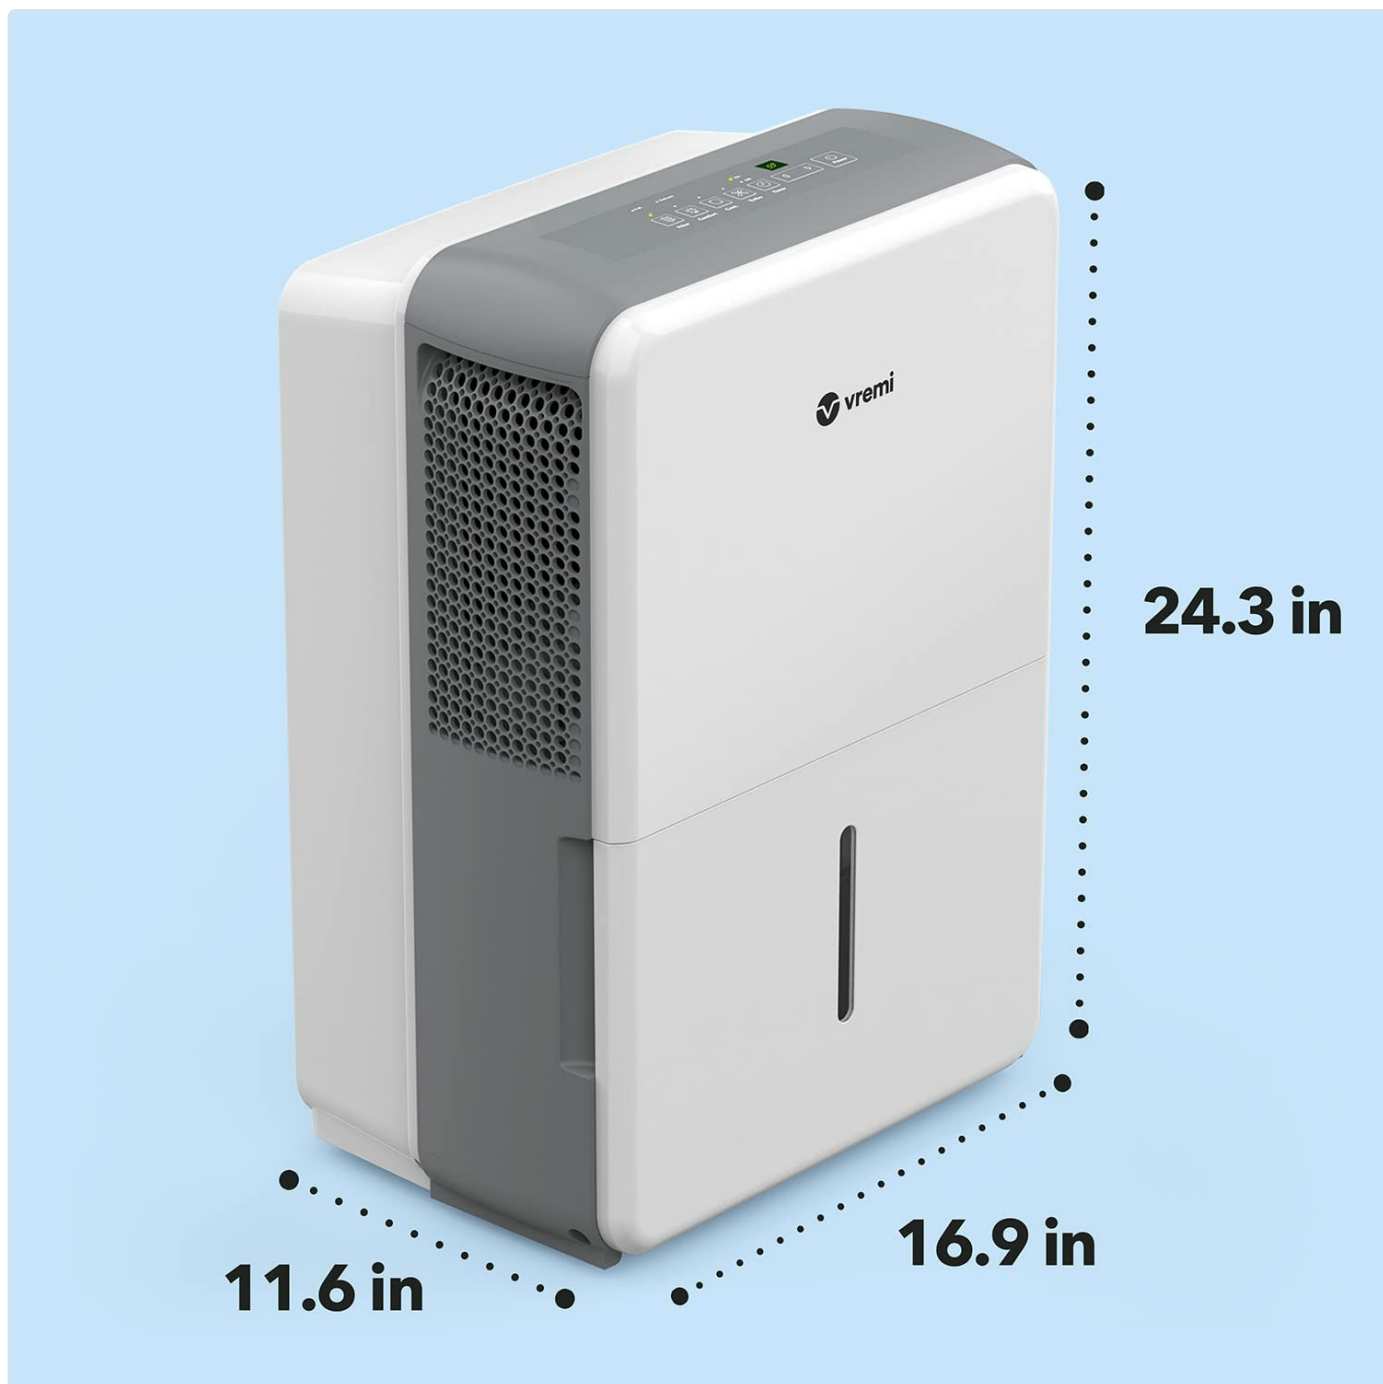

- Ensure the power supply matches the voltage requirements of the dehumidifier.
- Do not operate the dehumidifier with a damaged cord or plug.
- Do not place the unit near heat sources or in direct sunlight.
- Keep the unit on a stable, level surface to prevent tipping and water spillage.
- Allow at least 8 inches of space around the unit for proper air circulation.
- Do not immerse the unit, power cord, or plug in water or other liquids.
- Always unplug the dehumidifier before cleaning or performing any maintenance.
- Keep children and pets away from the unit during operation.

## PRODUCT OVERVIEW

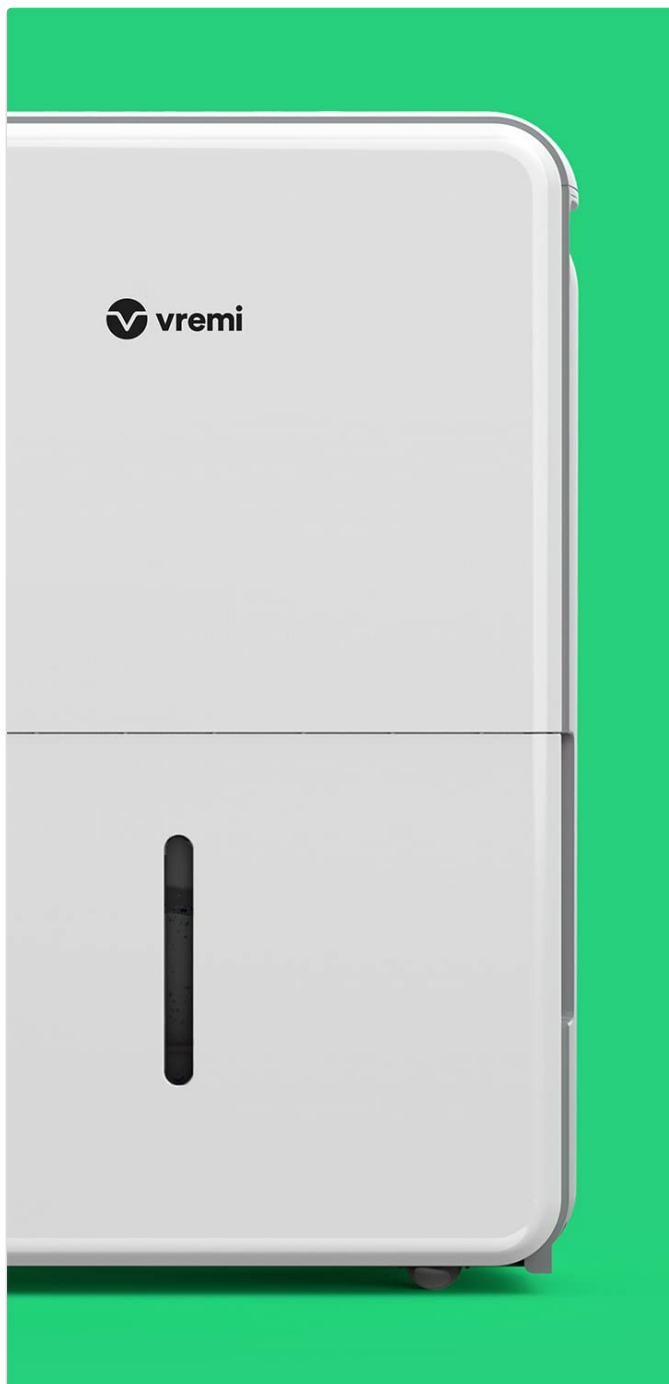

The Vremi Dehumidifier is designed for effective moisture removal with user-friendly features.

Front view of the Vremi Dehumidifier, showcasing its sleek, modern design and water level indicator.

Dimensions of the dehumidifier: approximately 24.3 inches in height, 16.9 inches in depth, and 11.6 inches in width, indicating its compact footprint.

**Quiet.  
Efficient.  
Portable.**

The dehumidifier is designed to be quiet, efficient, and portable, making it suitable for various living spaces. It is Energy Star certified for energy efficiency.

---

## Removable Water Tank.

The unit features a conveniently removable water tank for easy emptying and cleaning.

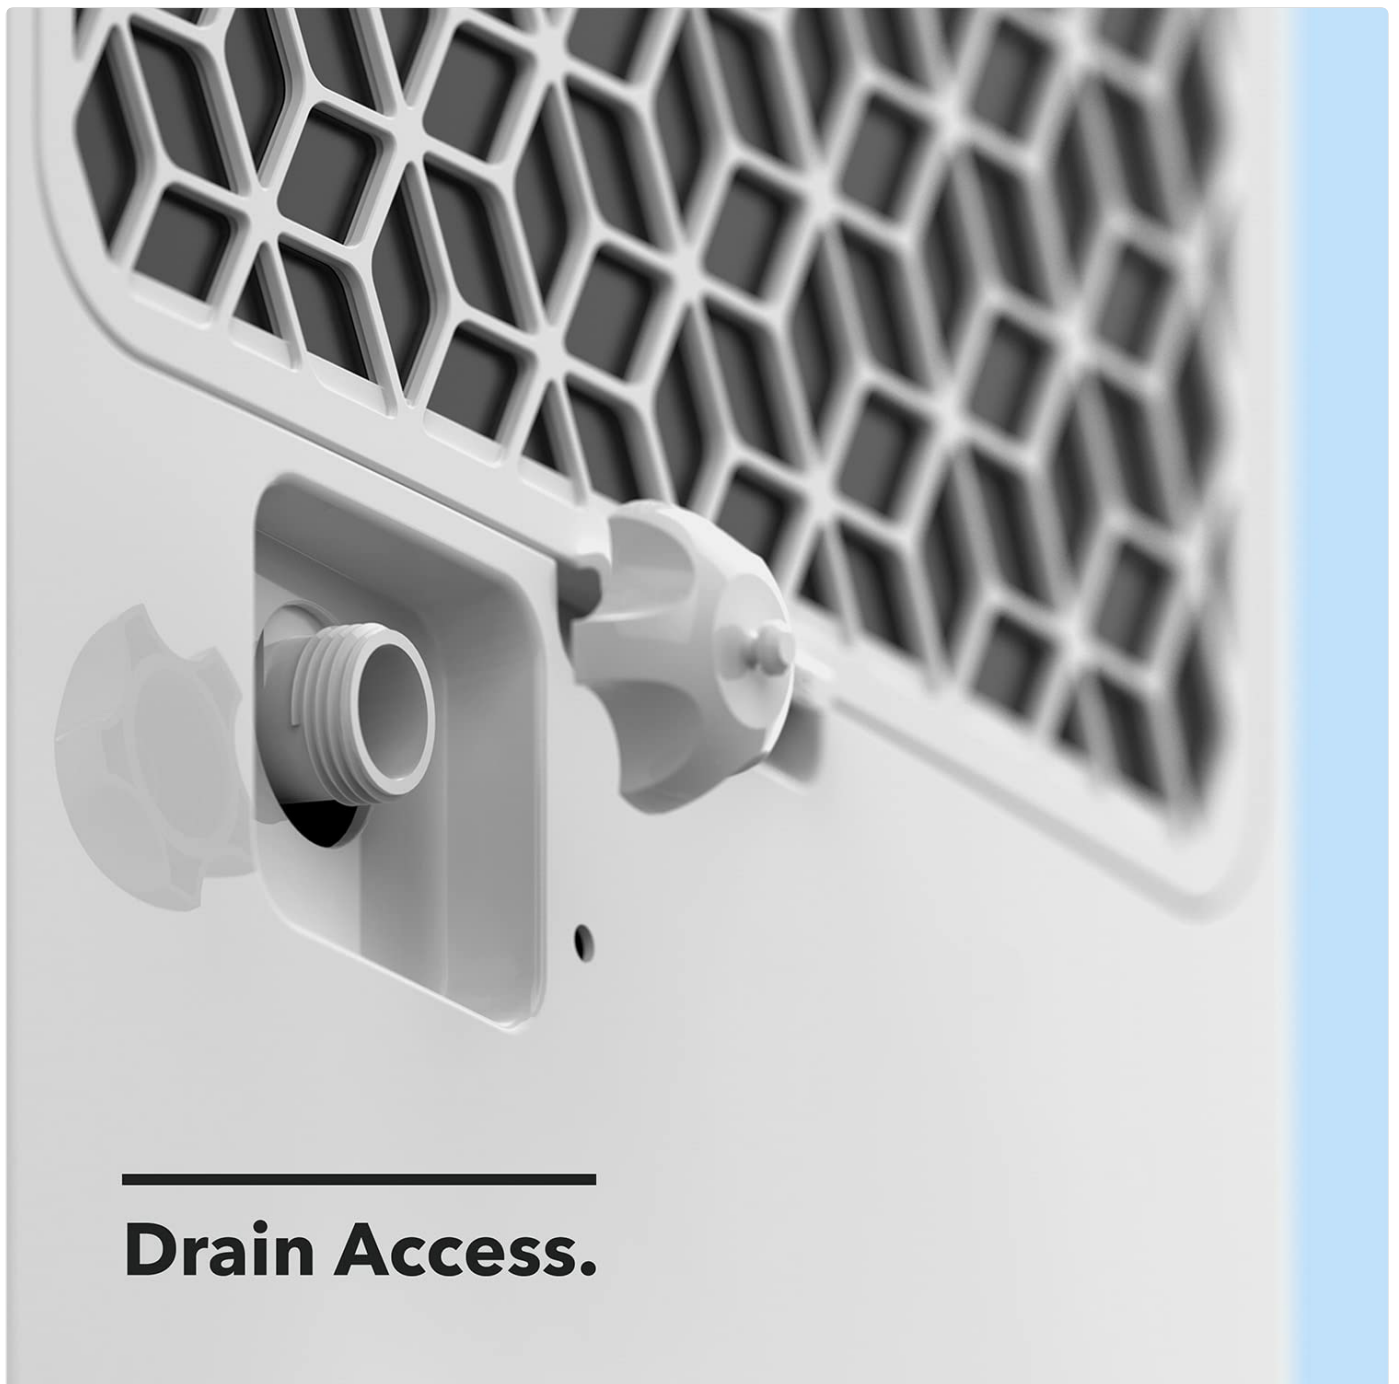

# 35 Pint

## 1,500–3,000 ft<sup>2</sup> Room

50 Pint 2012 DOE Standard

The control panel displays the unit's 35-pint capacity, suitable for rooms ranging from 1,500 to 3,000 square feet, based on 2012 DOE standards.

---

## Drain Access.

A close-up view of the drain access port, allowing for continuous drainage via a hose (not included).

---

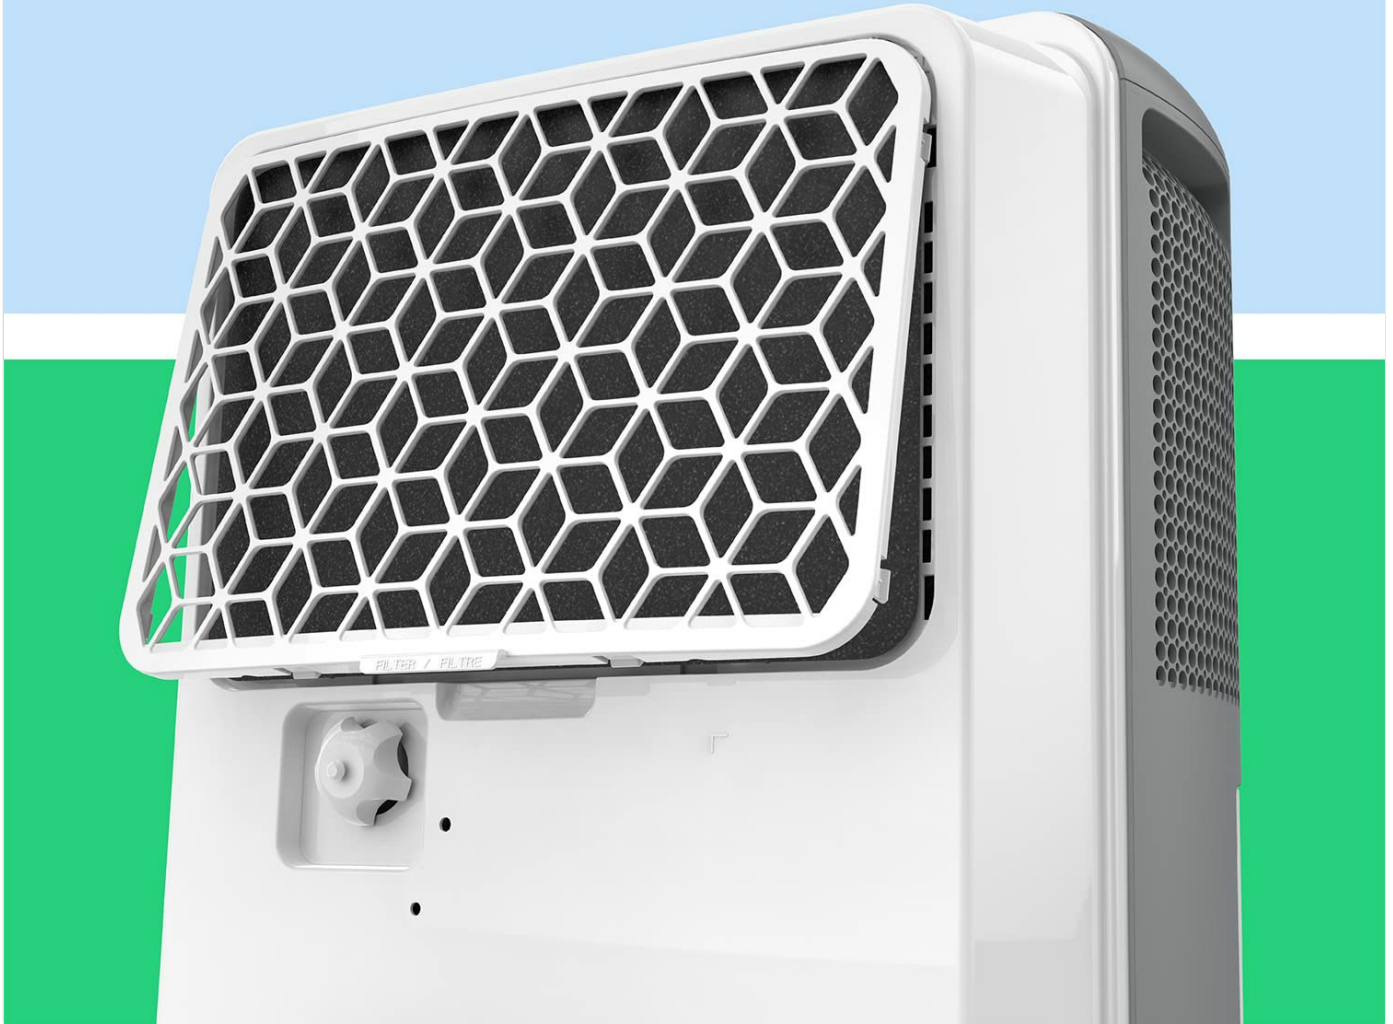

## Wheels For Easy Mobility.

Equipped with wheels for easy mobility, allowing the unit to be moved effortlessly between rooms.

---

## Easy To Clean Filter.

The air filter is easily accessible and designed for simple cleaning, ensuring optimal performance.

### SETUP

1. **Unpacking:** Carefully remove the dehumidifier from its packaging. Retain the packaging materials for future storage or transport.
2. **Placement:** Place the dehumidifier on a firm, level surface in a location where the ambient temperature will not fall below 41°F (5°C) or exceed 95°F (35°C). Ensure there is at least 8 inches (20 cm) of space on all sides of the unit for proper air circulation. Do not block the air inlet or outlet.
3. **Power Connection:** Plug the power cord into a grounded electrical outlet. Ensure the outlet meets the electrical requirements specified on the unit's rating label.
4. **Initial Use:** For optimal performance, allow the unit to stand upright for at least 24 hours before plugging it in if it has been stored or transported on its side.

### OPERATING INSTRUCTIONS

Familiarize yourself with the control panel (refer to image of control panel in Product Overview section).

- **Power Button:** Press to turn the unit ON or OFF.
- **Humidity Setting:** Use the Up/Down arrows to set your desired humidity level. The unit will operate until the room humidity reaches the set level.
- **Comfort Mode:** Activates a preset humidity level for optimal comfort.
- **Continuous Mode:** The unit will run continuously regardless of the humidity level. This mode is ideal for very damp conditions or when using continuous drainage.
- **Turbo Mode:** Increases the fan speed to maximum for faster moisture removal.
- **Timer Function:** Set a timer for the unit to automatically turn ON or OFF after a specified number of hours.
- **Water Tank Full Indicator:** An indicator light will illuminate when the water tank is full, and the unit will automatically shut off. Empty the tank to resume operation.
- **Continuous Drainage:** For continuous operation without emptying the tank, attach a standard garden hose (not included) to the drain access port on the back of the unit. Ensure the hose is sloped downwards to a suitable drain.

## MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your dehumidifier.

- **Cleaning the Air Filter:** The air filter should be cleaned every two weeks or more frequently depending on usage and air quality. Refer to the image of the easy-to-clean filter in the Product Overview section.
  - a. Remove the filter from the back of the unit.
  - b. Wash the filter with warm, soapy water. Rinse thoroughly.
  - c. Allow the filter to air dry completely before reinserting it.
- **Emptying the Water Tank:** When the tank is full, carefully slide it out, empty the collected water, and slide it back into place until it clicks.
- **Cleaning the Unit Exterior:** Wipe the exterior with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** If storing the unit for an extended period, ensure the water tank is empty and clean, and the filter is clean and dry. Coil the power cord neatly and store the unit in a cool, dry place.

## TROUBLESHOOTING

Before contacting customer support, please refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	No power; Power cord not plugged in; Water tank full or not properly seated.	Check power outlet; Ensure power cord is securely plugged in; Empty and re-seat the water tank.
Unit is running but not collecting water.	Room temperature too low; Humidity level already low; Air filter clogged.	Ensure room temperature is above 41°F (5°C); Adjust desired humidity setting lower; Clean the air filter.
Unit is noisy.	Unit not on a level surface; Air filter clogged; Obstruction in fan.	Place unit on a level surface; Clean the air filter; Check for and remove any obstructions.
Frost appears on coils.	Room temperature too low.	The unit has an auto-defrost function. If frost persists, increase room temperature.
