7. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your vacuum cleaner.

7.1 Emptying the Dust Tank

Empty the dust tank after each use or when the MAX fill line is reached. Press the dust tank release button and carefully detach it. Open the tank's bottom lid to dispose of collected dirt. Reattach the tank securely.

7.2 Cleaning Filters

The vacuum cleaner uses a cyclonic filtration system. Regularly clean the filters to maintain suction power. Remove the filters from the dust tank and tap them to remove dust. If necessary, rinse them with water and allow them to air dry completely before reinserting.

7.3 Cleaning the Jalisco Brush

Periodically check the Jalisco brush for tangled hair or debris. To clean, remove the brush roll from the brush head. Use scissors or a brush cleaning tool to remove any obstructions. Reinsert the brush roll, ensuring it clicks into place.

7.4 Battery Care

To prolong battery life, avoid completely draining the battery before recharging. Store the vacuum cleaner in a cool, dry place when not in use for extended periods.
