OPERATING INSTRUCTIONS

The Tek Styz PRO Stylus + Pen is a versatile 2-in-1 tool, combining a high-sensitivity stylus for touchscreens with a traditional ballpoint pen for writing on paper.

Using the Stylus Function

The stylus tip is located at one end of the pen and is designed for precise interaction with capacitive and resistive touchscreens.

1. **Identify Stylus Tip:** The stylus tip is a soft, rounded, conductive dome.
2. **Touchscreen Interaction:** Gently touch the stylus tip to your device's screen (e.g., Asus Transformer Book Trio) to navigate menus, select items, draw, or write. The high sensitivity ensures accurate input without applying excessive pressure.

3. **Compatibility:** This stylus is compatible with both capacitive (most common modern touchscreens) and resistive (older, pressure-sensitive screens) technologies.

Using the Ballpoint Pen Function

The opposite end of the device functions as a standard black ink ballpoint pen for traditional writing tasks.

1. **Access Pen Tip:** Remove the protective cap from the end opposite the stylus tip to reveal the ballpoint pen.
2. **Writing:** Use the pen for traditional writing on paper. The pen is pre-filled with black ink.
3. **Replace Cap:** Always replace the cap securely after use. This prevents the ink from drying out and protects the pen tip from damage.

MAINTENANCE

Proper care will extend the life and performance of your Tek Styz PRO Stylus + Pen.

- **Cleaning the Stylus Tip:** If the stylus tip becomes dirty or less responsive, gently wipe it with a soft, lint-free cloth. Do not use abrasive cleaners or harsh chemicals.
- **Protecting the Pen Tip:** Always replace the cap on the ballpoint pen end when not in use to prevent ink drying and tip damage.
- **Storage:** Store the pens in a cool, dry place away from direct sunlight and extreme temperatures.
- **Ink Refill:** The ink cartridge is not designed for user replacement. When the ink runs out, the pen portion will no longer function.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Stylus not responding on touchscreen.	Dirty stylus tip; screen protector interference; device screen issue.	Clean the stylus tip with a soft cloth. Ensure your device screen is clean. Test on another compatible device if possible.
Ballpoint pen not writing.	Ink has dried out; ink cartridge is empty.	Ensure the cap was replaced after last use. If the ink is depleted, the pen cannot be refilled.
