## SETUP GUIDE

---

### Unpacking and Placement

1. Carefully remove the appliance from its packaging.
2. Place the air cooler on a firm, level surface. Ensure there is sufficient space around the unit for proper airflow (at least 20 cm from walls or furniture).
3. Ensure the power cord is not pinched or damaged.

### Filling the Water Tank and Using Cooling Packs

For optimal cooling performance, the water tank should be filled with clean water. You can also use the included cooling packs for enhanced cooling.

1. Pull out the water tank from the front of the unit.
2. Fill the tank with clean tap water. Do not exceed the 'MAX' fill line indicated on the tank.
3. For enhanced cooling, place the two included cooling packs in a freezer for several hours until completely frozen.
4. Once frozen, place the cooling packs into the water tank.
5. Carefully slide the water tank back into the unit until it clicks into place.
6. Connect the power plug to a suitable electrical outlet (220-240V, 50Hz).

### OPERATING INSTRUCTIONS

---

#### Control Panel and Remote Control

The appliance can be operated using the control panel on top of the unit or the included remote control. Ensure 2 x 1.5V AA batteries (not included) are inserted into the remote control.

#### Power On/Off

Press the **ON/OFF** button to turn the unit on or off.

#### Operating Modes

Press the **MODE** button to cycle through the available modes:

- **Normal Mode:** Provides a constant airflow at the selected speed.
- **Nature Mode:** Simulates a natural breeze by varying the fan speed intermittently.
- **Night Mode:** Operates similarly to Nature Mode but gradually reduces the fan speed until the unit

turns off, promoting a quiet sleeping environment.

## Speed Settings

Press the **SPEED** button to adjust the fan speed. There are 4 speed levels available.

## Oscillation Function

Press the **Wind Direction** button to activate or deactivate the horizontal oscillation function, which distributes air across a wider area.

## Timer Function

Press the **Timer/Preset** button to set the operating time. The timer can be set from 1 to 15 hours. The unit will automatically turn off once the set time has elapsed.

## Cooling Function

Press the **Cooling** button to activate the air cooling/humidifying function. This function uses water evaporation to cool and humidify the air.

## TARGETED REFRESHMENT

## MAINTENANCE AND CARE

Regular cleaning and maintenance will ensure the longevity and efficient operation of your air cooler.

- **Cleaning the Exterior:** Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Cleaning the Water Tank:** Regularly remove and clean the water tank to prevent mold and mildew growth. Rinse with clean water and dry thoroughly before reinserting.
- **Air Filter Cleaning:** The air filter should be cleaned periodically (e.g., every two weeks, depending on usage). Refer to the product diagram to locate and remove the filter. Rinse it under running water and allow it to air dry completely before reattaching.
- **Storage:** If storing the unit for an extended period, empty and clean the water tank, clean the filter, and ensure the unit is dry. Store in a cool, dry place.

## TROUBLESHOOTING

---

Before contacting customer support, please refer to the following table for common issues and their solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	No power supply.	Check if the power cord is securely plugged into a working outlet.
No cooling effect.	Water tank is empty or cooling function is off.	Fill the water tank and ensure the cooling function is activated. Use frozen cooling packs.
Weak airflow.	Air filter is dirty or air inlet/outlet is blocked.	Clean the air filter. Ensure there are no obstructions around the air inlet and outlet.
Unusual noise.	Unit is not on a level surface or internal component issue.	Place the unit on a flat, stable surface. If noise persists, contact customer support.
Remote control not working.	Batteries are dead or incorrectly inserted.	Replace batteries (2 x AA 1.5V) and ensure correct polarity.
