3. SETUP

The Callez USB Headset offers plug-and-play simplicity, requiring no drivers for most compatible devices.

3.1 Connecting the Headset

1. Locate an available USB port on your computer (PC, Laptop, Mac).
2. Insert the USB plug of the headset into the USB port.
3. The system should automatically detect and install the necessary drivers.

Windows 7

Windows 8

Windows 10

Windows XP

Vista

Mac OS X

Plug-and-play Simplicity

Plug the USB headset into any Windows PC or Mac and start making clearer hands-free calls right away

5. MAINTENANCE

To ensure the longevity and optimal performance of your Callez USB Headset, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the headset. Do not use liquid cleaners or aerosols.
- **Storage:** Store the headset in a cool, dry place when not in use. Avoid extreme temperatures.
- **Cable Care:** Do not pull on the cable to disconnect the headset. Always grasp the USB plug. Avoid sharp bends or kinks in the cable.
- **Ear Cushions:** The soft ear cushions are designed for comfort. While durable, consider purchasing covers to protect them from wear and tear, especially with daily and long-term use.

6. TROUBLESHOOTING

If you encounter issues with your Callez USB Headset, please refer to the following common solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Headset not recognized by computer	Incorrect USB port, driver issue, or system settings.	Try a different USB port. Restart your computer. Manually select "USB Audio Device" in your computer's sound settings (refer to Section 3.2).
No audio from headset	Volume too low, speaker muted, or incorrect output device selected.	Increase volume using inline controls or computer settings. Ensure speaker is not muted via inline control. Verify "USB Audio Device" is selected as the output device.
Microphone not working	Microphone muted, incorrect input device selected, or microphone boom not positioned correctly.	Ensure microphone is not muted via inline control. Verify "USB Audio Device" is selected as the input device. Adjust the flexible mic boom closer to your mouth.
Poor audio quality (static, breaking up)	Loose connection, interference, or faulty cable.	Ensure the USB plug is securely inserted. Try a different USB port. Avoid placing the cable near other electronic devices that may cause interference. If the issue persists, the cable may be damaged.
