SETUP

- 1. Unpack:** Carefully remove all components from the packaging.
- 2. Placement:** Place the scale platform on a firm, flat, and level surface. Ensure there is enough space for the item to be weighed and for the remote display unit.
- 3. Connect Display:** Plug the coiled cord from the weighing platform into the remote LCD display unit.
- 4. Power Options:**
 - **AC Adapter:** For continuous power, plug the included AC adapter into the display unit and then into a standard wall outlet.
 - **Batteries:** For portable use, insert 2 x AAA batteries (not included) into the battery compartment on the back of the display unit. Ensure correct polarity.
 - **USB Cable:** The scale can also be powered via the included USB cable connected to a USB power source. Note that the USB cable does not transfer data.
- 5. Initial Power On:** Press the 'ON/OFF' button on the display unit. The display will light up and show '0.00' or '0.0' once ready.

OPERATING INSTRUCTIONS

- Power On/Off:** Press the 'ON/OFF' button to turn the scale on or off.
- Select Unit:** Press the 'MODE' button to cycle through available weighing units: grams (g), kilograms (kg), ounces (oz), and pounds (lb). The selected unit will be displayed on the screen.
- Tare Function:** To weigh items in a container, first place the empty container on the platform. Press the 'TARE' button. The display will reset to zero. Now, add the items to be weighed into the container. The display will show the net weight of the items.
- Weighing Items:** Place the item(s) gently on the center of the weighing platform. Wait for the reading to stabilize. The display will show the weight. For items larger than the platform, the remote display allows for easy viewing.
- Auto Shut-off:** If powered by batteries, the scale will automatically shut off after 5 minutes of inactivity to conserve battery life. When plugged in via AC adapter or USB, the scale remains on.
