Bayrol Chlorifix Compact 1.2 kg - User Manual

Brand: Bayrol | Model: 1.2 kg

1. PRODUCT OVERVIEW

Bayrol Chlorifix Compact is a high-quality, fast-dissolving chlorine granulate designed for rapid disinfection and shock treatment of pool water. It comes in pre-portioned bags, making it easy to use for addressing water problems such as cloudiness or algae growth. This product quickly releases active chlorine to oxidize microorganisms and algae, restoring water clarity within hours. Its formulation includes isocyanuric acid to protect chlorine from UV degradation, making it particularly effective for outdoor pools.

Image 1.1: Bayrol Chlorifix Compact packaging, showing the box and a pre-portioned bag, positioned next to a clear blue swimming pool.

Key Features:

- **Easy Dosing:** Pre-portioned bags simplify application.
- **Effective Pool Cleaning:** Fast-dissolving chlorine granulate for shock treatment against cloudy and algae-infested pool water.
- **Rapid Action:** Releases a large amount of active chlorine quickly, oxidizing microorganisms and algae for clear water within hours.
- **UV Protection:** Contains isocyanuric acid to protect chlorine from UV rays, ideal for outdoor pools.
- **Quality Made in Europe:** Produced with modern technology ensuring high quality standards.

2. SAFETY INFORMATION AND WARNINGS

Always use biocidal products carefully. Read the label and product information before use. Adhere to all safety precautions to ensure safe handling and application of Chlorifix Compact.

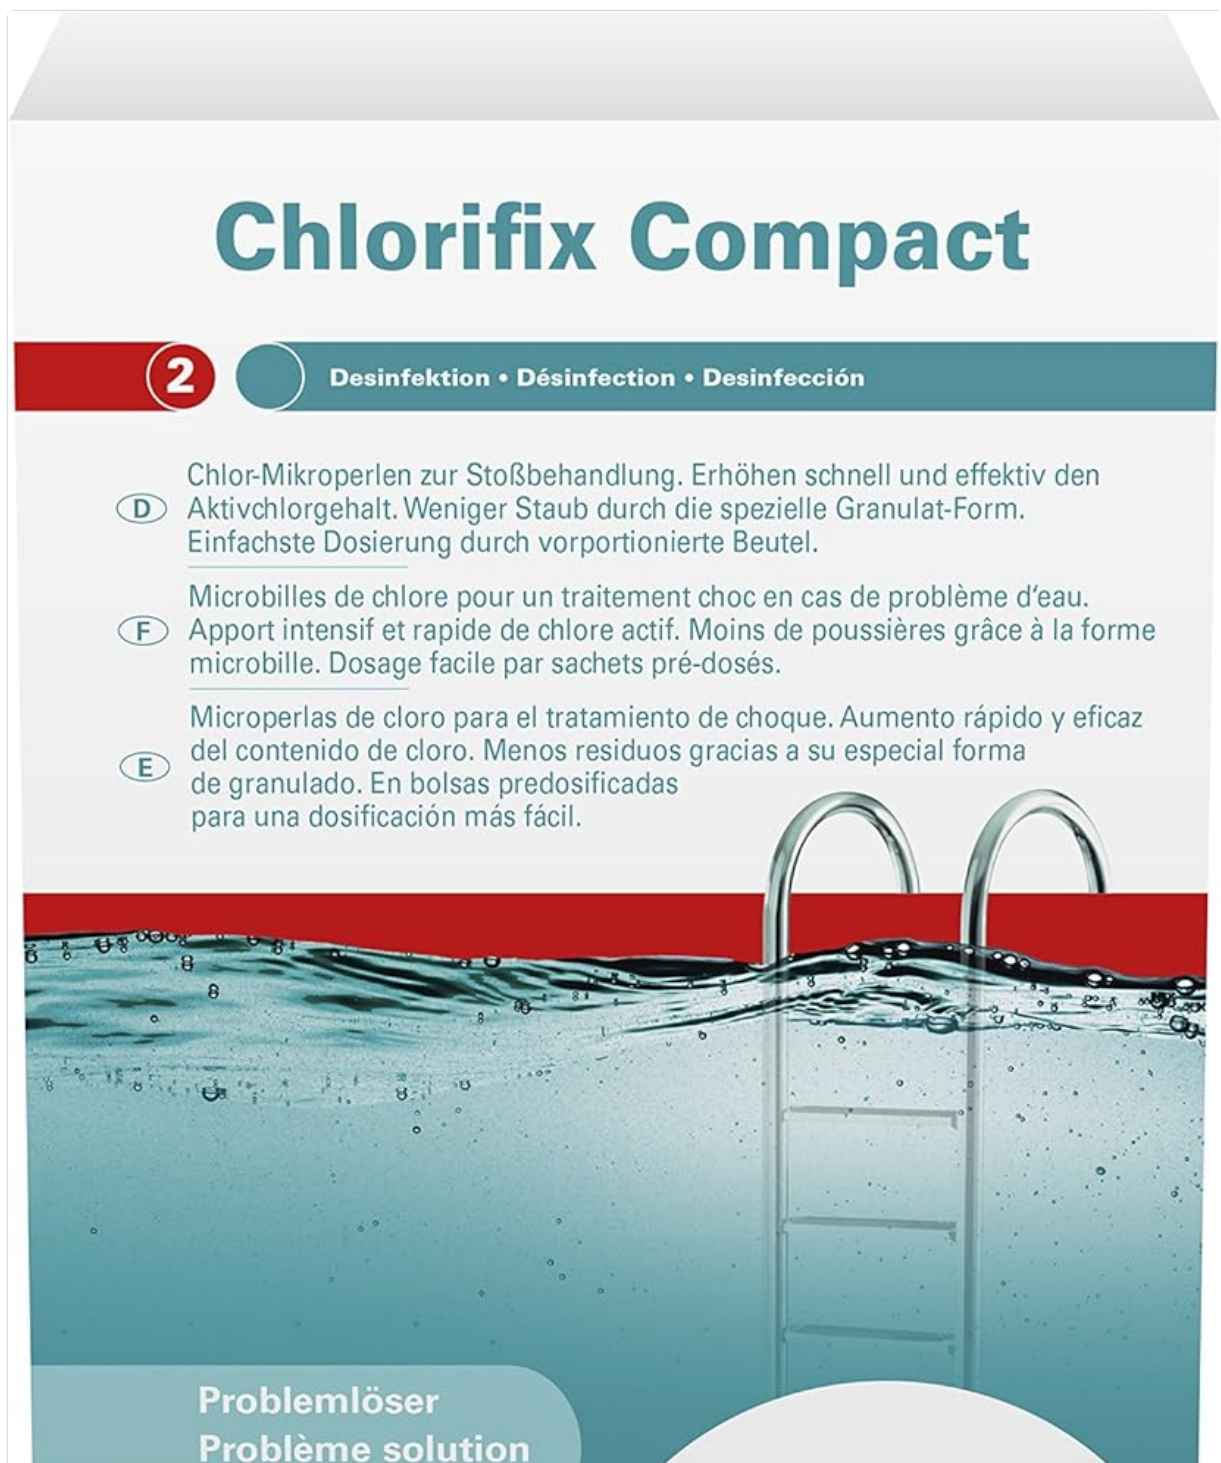

Hazard Statements:

- **H302:** Harmful if swallowed.
- **H319:** Causes serious eye damage.
- **H335:** May cause respiratory irritation.
- **H410:** Very toxic to aquatic life with long lasting effects.

Signal Word: Warning

Important Notes:

- **EUH301:** Contact with acids liberates toxic gas.
- **EUH206:** Warning! Do not use together with other products. May release dangerous gases (chlorine).
- Never throw Chloriklar tablets directly into the pool due to the risk of bleaching stains.
- Absolutely avoid contact with chlorine-unstable materials.
- Never place tablets in a dosing float or dosing station.

Chlorifix Compact

2 Desinfektion • Désinfection • Desinfección

D Chlor-Mikroperlen zur Stoßbehandlung. Erhöhen schnell und effektiv den Aktivchlorgehalt. Weniger Staub durch die spezielle Granulat-Form. Einfachste Dosierung durch vorportionierte Beutel.

F Microbilles de chlore pour un traitement choc en cas de problème d'eau. Apport intensif et rapide de chlore actif. Moins de poussières grâce à la forme microbille. Dosage facile par sachets pré-dosés.

E Microperlas de cloro para el tratamiento de choque. Aumento rápido y eficaz del contenido de cloro. Menos residuos gracias a su especial forma de granulado. En bolsas predosificadas para una dosificación más fácil.

3. PREPARATION AND SETUP

Before applying Bayrol Chlorifix Compact, ensure your pool is prepared for treatment. This typically involves checking and adjusting basic water parameters if necessary, and ensuring the circulation system is operational.

- Ensure the pool's circulation pump is running.
- For best results, apply the product in the evening after swimming activity has ceased.
- Ensure good ventilation if applying in an enclosed space.

4. OPERATING INSTRUCTIONS

Follow these instructions carefully for effective treatment of your pool water with Bayrol Chlorifix Compact.

Dosage:

- In case of water problems, add one bag of Chlorifix Compact per 20 m³ (20,000 liters) of pool water.

Application:

1. Ensure the circulation pump is running.
2. Open one pre-portioned bag of Chlorifix Compact.
3. Directly add the contents of the bag into the pool water. It is recommended to do this in the evening after swimming.
4. Allow the circulation pump to run for at least 12 hours after adding the product.

Chlorifix Compact is suitable for all filter types and pool sizes.

5. POST-TREATMENT AND MAINTENANCE

After applying Chlorifix Compact, it is important to continue proper pool maintenance to ensure lasting water quality.

- After the 12-hour circulation period, check the water parameters, especially the chlorine and pH levels.
- Adjust pH levels to the ideal range (7.0-7.4) if necessary, as this affects chlorine effectiveness.
- Regularly clean your pool filter to remove oxidized contaminants.
- Continue with your regular disinfection routine to maintain hygienic water.
- Store unused Chlorifix Compact in a cool, dry place, away from direct sunlight and out of reach of children and pets.

6. TROUBLESHOOTING COMMON WATER PROBLEMS

Chlorifix Compact is designed to address common pool water issues. Here's how it helps with typical problems:

Problem	Description / Cause	Chlorifix Compact Solution
Green Water	Caused by algae growth, often due to insufficient chlorine or high pH.	Provides a rapid shock of active chlorine to kill algae and restore water clarity.
Cloudy Water	Suspended particles, organic matter, or bacterial growth.	Oxidizes organic contaminants and microorganisms, making water clear.
Low Chlorine Levels	Insufficient disinfection, leading to bacterial growth.	Quickly raises the active chlorine content to effective disinfection levels.

7. PRODUCT SPECIFICATIONS

Specification	Detail
Product Dimensions	13.5 x 10 x 19 cm
Part Number	1133613
Drive Type	AC
Manufacturer	BAYROL
Model Number	1.2 kg
ASIN	B0852RTQFB
Available on Amazon.de since	23. February 2020
Brand	Bayrol
Item Weight	1.2 Kilograms
Form	Granular
Product Benefits	Algae control
Number of Items	1

8. WARRANTY INFORMATION

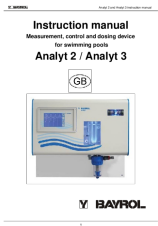

No specific warranty information is provided for this product in the available documentation. For details regarding product guarantees or returns, please refer to the retailer's policy or contact Bayrol directly.

9. CUSTOMER SUPPORT

For further assistance, product inquiries, or technical support, please visit the official Bayrol store or contact Bayrol customer service through their official channels.
