## Cangaroo CAR SEAT PILOT

# Cangaroo Pilot Child Car Seat Instruction Manual

Model: CAR SEAT PILOT | Groups 0+/1/2/3 (0-36 kg) with ISOFIX

## 1. INTRODUCTION AND SAFETY INFORMATION

Thank you for choosing the Cangaroo Pilot Child Car Seat. This manual provides essential information for the correct installation, safe use, and maintenance of your car seat. Please read these instructions carefully before use and keep them in a safe place for future reference. Failure to follow these instructions may compromise your child's safety.

The Cangaroo Pilot car seat is designed for children from birth up to 36 kg, covering Groups 0+/1/2/3. It features ISOFIX connectivity for secure installation and a 360-degree rotation function for convenience.

### Important Safety Warnings:

- Always ensure the car seat is correctly installed and secured in the vehicle before placing your child in it.
- Never leave your child unattended in the car seat.
- Ensure the harness is properly adjusted and snug against your child's body, without twisting.
- Do not use the car seat if it has been involved in an accident, even if there is no visible damage. Internal damage may compromise its safety.
- Follow the weight and age guidelines for each installation group.
- Refer to your vehicle's owner's manual for information on child restraint system installation.

## 2. PRODUCT OVERVIEW

The Cangaroo Pilot car seat offers versatility and safety for your child's journey. Key features include:

- **ISOFIX System:** For rigid and secure attachment to your vehicle's ISOFIX anchor points.
- **360-Degree Rotation:** Allows easy access for placing and removing your child, and effortless switching between rear-facing and forward-facing positions.
- **Deep Padding:** Provides enhanced comfort and side impact protection.
- **Multi-Group Use:** Suitable for Group 0+ (0-13 kg), Group 1 (9-18 kg), Group 2 (15-25 kg), and Group 3 (22-36 kg).

### 3. SETUP AND INSTALLATION

---

The Kangaroo Pilot car seat can be installed using either the ISOFIX system or the vehicle's 3-point seat belt, depending on the child's weight group and vehicle compatibility.

#### 3.1. ISOFIX Installation (Groups 0+/1, 0-18 kg)

For children from birth up to 18 kg, ISOFIX installation is recommended for maximum security. Ensure your vehicle is equipped with ISOFIX anchor points.

1. **Extend ISOFIX Connectors:** Locate the ISOFIX release button (often red or grey) on the car seat base. Press it and pull the ISOFIX connectors outwards until they fully extend.
2. **Attach to Vehicle:** Align the ISOFIX connectors with your vehicle's ISOFIX anchor points. Push the car seat firmly until both connectors click securely into place. Green indicators should appear on both connectors, confirming correct attachment.
3. **Push Back:** Push the car seat firmly against the vehicle seat back to remove any slack.
4. **Check Security:** Tug on the car seat to ensure it is rigidly fixed and does not move excessively.

### **3.2. Seat Belt Installation (Groups 0+/1/2/3, 0-36 kg)**

For all groups, the car seat can also be installed using the vehicle's 3-point seat belt. Specific belt routing varies for rear-facing (Group 0+) and forward-facing (Groups 1/2/3) positions.

1. **Rear-Facing (Group 0+, 0-13 kg):** Position the car seat rear-facing. Route the vehicle's 3-point seat belt through the designated blue belt guides on the car seat. Ensure the lap belt is tight across the child's lap and the diagonal belt passes through the guide at the back of the seat. Fasten the seat belt buckle.
2. **Forward-Facing (Groups 1/2/3, 9-36 kg):** Position the car seat forward-facing. Route the vehicle's 3-point seat belt through the designated red belt guides. For Group 1, use the car seat's internal harness. For Groups 2/3, the child is secured directly by the vehicle's 3-point seat belt, with the car seat acting as a booster.
3. **Check Security:** Ensure the vehicle seat belt is taut and the car seat is firmly secured.

## 4. OPERATING INSTRUCTIONS

---

### 4.1. 360-Degree Rotation

The Kangaroo Pilot car seat features a 360-degree rotation function for ease of use.

1. **Unlock Rotation:** Locate the rotation release lever or button on the front or side of the car seat base. Press or pull it to unlock the rotation mechanism.
2. **Rotate Seat:** Gently rotate the car seat to the desired position (e.g., towards the car door for child placement, or to switch between rear-facing and forward-facing).

3. **Lock Position:** Ensure the seat clicks back into a locked position once rotated. Never drive with the seat unlocked or in an intermediate rotation position.

## 4.2. Harness Adjustment

The 5-point harness system must be correctly adjusted for your child's safety and comfort.

1. **Loosen Harness:** Press the harness release button (usually located at the front of the seat, under a flap) and pull the shoulder straps outwards.
2. **Place Child:** Place your child in the car seat.
3. **Buckle Harness:** Bring the two buckle tongues together and insert them into the central buckle until they click.
4. **Tighten Harness:** Pull the harness adjustment strap (located at the front of the seat) until the harness is snug against your child's body. You should not be able to pinch any slack in the shoulder straps.
5. **Adjust Shoulder Height:** The shoulder straps should be at or just below your child's shoulders for rear-facing, and at or just above for forward-facing. Adjust the headrest and shoulder strap height as needed.

## 4.3. Recline Positions

The car seat offers multiple recline positions for your child's comfort. Locate the recline adjustment lever (usually at the front or side of the base) and adjust to the desired angle. Ensure the seat is securely locked in the chosen recline position before driving.

# 5. MAINTENANCE

---

## 5.1. Cleaning the Fabric Covers

The fabric covers can be removed for cleaning. Refer to the care label on the fabric for specific washing instructions. Typically, they can be hand-washed or machine-washed on a delicate cycle with mild detergent and cold water. Do not bleach, tumble dry, or iron.

## 5.2. Cleaning the Plastic Parts

Wipe plastic parts with a damp cloth and mild soap. Do not use abrasive cleaners or solvents.

## 5.3. Harness and Buckle Care

Inspect the harness straps and buckle regularly for wear or damage. Clean the buckle by rinsing it with warm water if it becomes sticky. Do not use lubricants.

# 6. TROUBLESHOOTING

---

- **Car seat feels loose after installation:** Recheck all installation steps. Ensure ISOFIX connectors are green and fully engaged, or that the vehicle seat belt is taut and correctly routed through all guides. Push the car seat firmly into the vehicle seat.
- **Harness is difficult to tighten/loosen:** Check for any twists in the harness straps. Ensure the harness release button is fully pressed when loosening. Clean the buckle if it feels sticky.
- **Seat does not rotate:** Ensure the rotation release lever/button is fully engaged. Check for any obstructions around the base.
- **Child is uncomfortable:** Adjust the recline position, headrest height, and harness tightness. Ensure no clothing is bunched up under the harness.

If you encounter issues not covered here, please contact Cangaroo customer support.

## 7. SPECIFICATIONS

---

<b>Brand</b>	Cangaroo
<b>Model Number</b>	CAR SEAT PILOT
<b>Product Dimensions (L x W x H)</b>	45 x 45 x 66 cm
<b>Maximum Supported Weight</b>	36 Kilograms
