SafeCo Brands 2-BH005 Keys User Manual

Model: **2-BH005** | Brand: **SafeCo Brands**

INTRODUCTION

This manual provides essential information for the proper use and maintenance of your SafeCo Brands 2-BH005 Keys. These keys are specifically designed for use with JL Industries Fire Extinguisher Cabinets, models 99G and 999G. Each purchase includes two (2) keys, ensuring you have a spare or can provide access to authorized personnel.

SafeCo Brands is committed to providing high-quality, reliable products. These keys are original SafeCo Brands products, not copies or duplicates, ensuring optimal performance and security for your fire extinguisher cabinets.

Figure 1: Two gold-colored SafeCo Brands 2-BH005 keys. These keys are designed for specific JL Industries fire extinguisher cabinets, featuring a distinct shape and the "SafeCo Brands" engraving on the head.

IMPORTANT SAFETY INFORMATION

Adherence to the following safety guidelines is crucial for the effective and safe operation of fire extinguisher cabinets and the use of these keys:

- Always follow local fire safety regulations and building codes regarding fire extinguisher placement and accessibility.
- Ensure the fire extinguisher cabinet is unlocked and easily accessible at all times, unless specific security protocols require temporary locking.
- Do not store any flammable materials or unauthorized items inside the fire extinguisher cabinet.
- Always use the fire extinguisher according to its manufacturer's instructions. These keys provide access to the cabinet, not instructions for extinguisher use.
- Keep keys in a secure, yet easily retrievable location known to all authorized personnel.

SETUP

The SafeCo Brands 2-BH005 keys are designed for immediate use with compatible JL Industries Fire Extinguisher Cabinets (models 99G and 999G). No assembly or prior setup of the keys themselves is required.

1. **Identify Cabinet Compatibility:** Verify that your fire extinguisher cabinet is a JL Industries model 99G or 999G. These keys are specifically cut for the locks on these models.
2. **Locate Keyhole:** Identify the keyhole on the fire extinguisher cabinet's lock mechanism.
3. **Insert Key:** Gently insert the 2-BH005 key into the keyhole. Do not force the key if it does not slide in smoothly.

OPERATING INSTRUCTIONS

Once the key is inserted into the compatible JL Industries cabinet lock:

1. **To Unlock:** Turn the key clockwise approximately 90 degrees (a quarter turn) until the lock mechanism disengages. The cabinet door should now be able to open.
2. **To Lock:** Close the cabinet door. Insert the key and turn it counter-clockwise approximately 90 degrees until the lock mechanism engages and the door is secured. Remove the key.

Always ensure the cabinet is securely locked or unlocked as required by your facility's safety protocols.

MAINTENANCE

Proper care of your SafeCo Brands 2-BH005 keys will ensure their longevity and reliable performance:

- **Cleaning:** If the keys become dirty, wipe them with a soft, dry cloth. Avoid using abrasive cleaners or harsh chemicals, which can damage the finish.
- **Storage:** Store keys in a dry place, away from extreme temperatures or corrosive environments. Keep them separate from other keys to prevent wear and tear.
- **Avoid Bending:** Do not attempt to bend or modify the keys. Bending can alter the key's cut, rendering it ineffective or causing damage to the lock.

- **Lubrication:** The keys themselves do not require lubrication. If the cabinet lock mechanism becomes stiff, consult the JL Industries cabinet manual for appropriate lock maintenance.

TROUBLESHOOTING

If you encounter issues while using your SafeCo Brands 2-BH005 keys, consider the following:

Problem	Possible Cause	Solution
Key does not insert fully into the lock.	Incorrect key for the cabinet; obstruction in keyhole; bent key.	Verify cabinet model (JL Industries 99G or 999G). Check keyhole for debris and carefully remove if present. Inspect key for any bends or damage. Use the spare key if available.
Key turns but lock does not engage/disengage.	Lock mechanism malfunction; key worn or damaged.	Try the second key provided. If the issue persists, the lock mechanism on the cabinet may require professional inspection or replacement.
Key is difficult to turn.	Lack of lubrication in lock; minor key damage; debris in lock.	Do not force the key. Consult the JL Industries cabinet manual for recommended lock lubrication. Ensure the key is clean and free of foreign material.

SPECIFICATIONS

Brand	SafeCo Brands
