4. SETUP

4.1 Connecting the Audio Cables

The bopmen Y71 headphones offer versatile connectivity with two different cable types:

1. **3.5mm to 3.5mm Audio Cable:** Use this cable for connecting to devices with a standard 3.5mm audio jack, such as smartphones, tablets, and laptops. This cable typically includes an in-line microphone and controls.
2. **3.5mm to 6.35mm Coiled Audio Cable:** This cable is ideal for professional audio equipment like guitar amplifiers, mixing consoles, and high-end stereo systems that use a 6.35mm (1/4 inch) jack. Insert the 3.5mm end into the headphone's 3.5mm port and the 6.35mm end into your audio source.

To connect, simply insert the appropriate end of the cable firmly into the corresponding port on the headphone (either the 3.5mm or 6.35mm port, located on different earcups) and the other end into your audio source.

Image: Illustration of the dual 3.5mm and 6.35mm jack inputs on the headphones, demonstrating their compatibility with various devices.

4.2 Shareport Technology

The Shareport feature allows two people to listen to the same audio source simultaneously. Connect one end of the 3.5mm cable to your audio source and the other end to one of the headphone's input jacks. Then, connect the 3.5mm end of the coiled cable to the other input jack on the first headphone, and the 6.35mm end to a second pair of headphones (or vice-versa depending on the second headphone's input). This enables audio sharing without the need for a splitter.

音楽シェア機能

1 台の機器のステレオ音楽を複数の人と同時に楽しむことができます。

5. OPERATING THE HEADPHONES

5.1 Wearing the Headphones

Identify the 'L' (Left) and 'R' (Right) indicators located inside each earcup. Place the headphones on your head with the correct earcup over each ear. The headband is designed for automatic adjustment to ensure a comfortable and secure fit.

5.2 Adjusting the Headband

The headband features an adjustable mechanism. Gently slide the earcups up or down along the headband to find the most comfortable position that fits your head size. The padded headband ensures comfort during prolonged use.

5.3 Folding for Storage

The earcups can be folded inwards towards the headband for compact storage and portability. This feature makes them convenient for travel or when not in use. Always store them in the provided carrying pouch to protect them from dust and damage.

6. MAINTENANCE

6.1 Cleaning

To maintain the condition of your headphones:

- Wipe the ear pads and headband with a soft, dry cloth.
- Do not use harsh chemicals, cleaning solvents, or strong detergents.
- Avoid getting moisture into any openings.

6.2 Storage

When not in use, store the headphones in the provided carrying pouch to protect them from dust, scratches, and physical damage. Avoid storing them in extreme temperatures or high humidity.

7. TROUBLESHOOTING

If you encounter any issues with your bopmen Y71 headphones, please refer to the following common solutions:

Problem	Possible Cause	Solution
No sound or low volume	Cable not fully inserted; incorrect audio source selected; device volume too low.	Ensure cables are securely connected to both headphones and audio source. Check audio source settings and increase volume.
Sound distortion or poor quality	Damaged cable; audio source issue; high volume causing clipping.	Try a different audio cable. Test with another audio source. Reduce the volume on your device.
Microphone not working (if using 3.5mm cable with mic)	Cable not fully inserted; device microphone settings.	Ensure the 3.5mm cable is fully inserted. Check your device's audio input settings to ensure the external microphone is selected.
