Quechua 2 Seconds EASY III

QUECHUA 2 Seconds Camping Tent - 3 Person - Blue Instruction Manual

Model: 2 Seconds EASY III

1. PRODUCT OVERVIEW

The QUECHUA 2 Seconds Camping Tent is designed for quick and easy setup and takedown, ideal for up to three campers. This tent features an instant pitch mechanism and a specialized system for efficient folding. It offers a comfortable sleeping area with good ventilation and protection against various weather conditions.

2. SAFETY INFORMATION

- **Fire Safety:** Keep all flame and heat sources away from the tent fabric. The tent is made of flammable material and will burn if exposed to an open flame.
- **Ventilation:** Ensure adequate ventilation to prevent condensation and maintain air quality inside the tent. Do not block ventilation openings.
- **Weather Conditions:** In severe weather conditions such as strong winds or heavy snow, additional precautions may be necessary to secure the tent. Avoid using the tent during lightning storms.
- **Children:** Do not allow children to play with the tent's components unsupervised, especially during setup and takedown, to prevent injury.

3. INCLUDED COMPONENTS

Verify that all components are present before attempting to set up your tent:

- PU-coated polyester flysheet
- Breathable polyester bedroom (inner tent)
- Polyethylene groundsheet (integrated)
- Solid fiberglass poles (integrated into the instant pitch system)
- Stakes

4. SETUP INSTRUCTIONS (INSTANT PITCH)

The QUECHUA 2 Seconds tent features an instant pitch design, allowing for rapid deployment.

1. **Unpack:** Remove the tent from its carry bag. It will spring open automatically.
2. **Position:** Place the tent in your desired location. The tent is free-standing, meaning it does not require pegs to stand upright in calm conditions.
3. **Secure (Optional but Recommended):** For added stability, especially in windy conditions, use the provided stakes to secure the tent to the ground. Locate the loops at the base of the tent and use the stakes to anchor them.
4. **Open Entrance:** Unzip the D-shaped front flap to open the tent entrance.

5. FOLDING INSTRUCTIONS

The 2 Seconds tent is designed with a special system for easy and efficient folding back into its compact disc shape.

1. **Close and Clear:** Ensure all zippers are closed and the tent is empty of personal items.
2. **Follow the Arrows:** The tent fabric often has arrows or markings indicating the folding points. Follow these guides to collapse the tent.
3. **Twist and Fold:** Gently twist the tent's frame while bringing the sides together, forming a figure-eight shape. Continue to fold the tent into three concentric circles.
4. **Secure:** Once folded into a disc, use the integrated strap or the carry bag to secure it.

6. VENTILATION AND ENTRY/EXIT

The tent is equipped with features to enhance comfort and accessibility.

- **Entry/Exit:** The large D-shaped front flap with a single zipper provides easy access. The design allows entry and exit without disturbing other occupants.
- **Ventilation:** An upper rear air vent is located between the flysheet and the ground on each side of the tent. This design promotes air circulation and helps minimize condensation buildup. The overhang above the door allows the top part of the zipper to remain open for ventilation even during light rain.

Internal Features

The tent includes internal storage pockets for organizing small items.

7. CARE AND MAINTENANCE

- **Cleaning:** Hand wash the tent with mild soap and water. Do not machine wash or tumble dry. Avoid harsh detergents or bleach, as these can damage the fabric's waterproofing and UV protection.
- **Drying:** Always ensure the tent is completely dry before folding and storing to prevent mildew and odors. Air dry in a shaded area, away from direct sunlight.
- **Storage:** Store the tent in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Repairs:** For small punctures or tears, use a tent repair kit. For significant damage, contact Quechua customer support.

8. TROUBLESHOOTING

- **Condensation:** Condensation is a natural occurrence in tents. To minimize it, ensure all ventilation openings are clear and open. The breathable polyester inner tent helps prevent direct contact with

condensation on the flysheet.

- **Stability in Wind:** While free-standing, the tent should always be secured with stakes and guy lines (if applicable) in windy conditions to prevent it from being blown away or damaged.
- **Difficulty Folding:** If you encounter difficulty folding the tent, refer to the folding instructions and ensure you are following the correct twist and fold technique. Do not force the frame.

9. SPECIFICATIONS

Feature	Detail
Model Name	2 Seconds EASY III
Occupancy	3 Person (60 cm / person sleeping width)
Dimensions (Pitched)	Room: 180 cm (70.8") wide x 210 cm (82.6") length Max. Headroom: 104 cm (40.9")
