OPERATING

This Hot Wheels vehicle is designed for free-rolling play on flat surfaces or Hot Wheels tracks. It does not require batteries or external power.

- Place the car on a smooth, flat surface or a compatible Hot Wheels track.
- Gently push the car forward to make it roll. The low-friction axles and wheels allow for smooth movement.
- For optimal performance on tracks, ensure the track pieces are securely connected and free of obstructions.

MAINTENANCE

To keep your Hot Wheels car in good condition, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the car with a soft, dry cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, as these may damage the paint or decals.
- **Storage:** Store the car in a cool, dry place away from direct sunlight and extreme temperatures to prevent fading or material degradation.
- **Handling:** Handle the car by its body, avoiding excessive pressure on the wheels or axles to prevent bending or breakage.

TROUBLESHOOTING

Hot Wheels vehicles are generally robust. If you encounter any issues, consider the following:

- **Car not rolling smoothly:** Check the wheels and axles for any trapped debris (e.g., hair, lint). Gently remove any obstructions. Ensure the axles are not bent.
- **Damage:** If the car sustains damage from impact, inspect for broken or loose parts. Small parts may pose a choking hazard for young children.
