When closing, ensure all moving parts are gently pressed back into their original positions to avoid damage.

5. MAINTENANCE

Proper care will ensure the longevity and appearance of your die-cast model.

- **Cleaning:** Use a soft, dry cloth to gently wipe away dust. For stubborn dirt, a slightly damp cloth with plain water can be used, followed immediately by a dry cloth. Avoid abrasive cleaners or solvents, as these can damage the paint and finish.
- **Storage:** Store the model in a cool, dry place away from direct sunlight and extreme temperature fluctuations. Display cases are recommended to protect against dust and accidental damage.
- **Handling:** Always handle the model by its main body. Avoid gripping delicate parts like mirrors, antennas, or spoilers, as these can break easily.

6. TROUBLESHOOTING

Most issues with die-cast models relate to handling and environmental factors.

- **Loose Parts:** If a small part becomes loose, it may be reattached using a small amount of model-safe adhesive. Exercise caution and ensure proper alignment.
- **Paint Chipping/Scratches:** Minor paint imperfections can sometimes be touched up with model paint, but this requires skill. Prevention through careful handling and storage is the best approach.
- **Stiff Moving Parts:** If doors, hood, or trunk become stiff, do not force them. A very small amount of silicone lubricant applied with a toothpick to the hinge mechanism might help, but proceed with extreme caution to avoid paint damage.
