MAINTENANCE

To ensure optimal performance and longevity of your Weiser Halo Smart Lock, follow these maintenance guidelines:

- **Battery Replacement:** The lock requires 4 AA batteries. When the battery level is low, you will receive notifications through the Weiser app and potentially visual/audible alerts from the lock itself. To replace batteries, slide open the battery cover on the interior assembly, remove the old batteries, and insert new ones, ensuring correct polarity.
- **Cleaning:** Clean the touchscreen and exterior surfaces with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish.
- **Door Alignment:** Periodically check that your door and frame are properly aligned. Misalignment can cause the deadbolt to bind, leading to increased battery drain and reduced performance.

TROUBLESHOOTING

If you encounter issues with your Weiser Halo Smart Lock, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lock not responding / Dead battery	Batteries are depleted.	Replace all 4 AA batteries with new, high-quality alkaline batteries.
Lock frequently goes offline / Wi-Fi connectivity issues	Weak Wi-Fi signal; Router too far; Network interference.	Ensure the lock is within range of your Wi-Fi router. Consider a Wi-Fi extender if necessary. Check for network interference from other devices. Restart your router.
Keypad not responding to touch	Secure mode activated; Accidental touches prevented.	If 'Secure Mode' is enabled, the keypad may require a specific sequence (e.g., 4+6) to activate. Disable this feature in the app if not desired. Ensure hands are clean and dry.
Deadbolt binds or does not extend fully	Door/frame misalignment; Latch not installed correctly.	Check door and frame alignment. Ensure the strike plate is properly aligned with the deadbolt. Verify the latch was installed with the correct orientation.
Cannot add or delete user codes	Lock is offline; App synchronization issue.	Ensure the lock is connected to Wi-Fi and online in the Weiser app. Try closing and reopening the app.

For further assistance, refer to the Weiser app's help section or contact Weiser customer support.

SMARTKEY SECURITY

THE ONLY LOCK YOU CAN RE-KEY IN SECONDS

What is SmartKey?
SmartKey™ is a technology that allows you to re-key a lock in just seconds, while improving security without removing the lock from the door.

How Does It Work?
SmartKey™ has a patented side-loading bar technology that replaces the traditional pin and tumbler design. This new design includes "BumpGuard™" for improved security against lock bumping, an attack technique that can defeat traditional pin and tumbler locks.

SUPERIOR SECURITY
All of our SmartKey locks are tested by an independent laboratory (ANSI) on a grade scale, with Grade 1 being good, and Grade 3 being the best.

ANSI Grade Deadbolts
Deadbolt locks are rated by an independent laboratory (ANSI) on a grade scale, with Grade 1 being good, and Grade 3 being the best.

How does SmartKey re-key?
All of our SmartKey deadbolts are ANSI rated and approved. In our Collections family of products, many of our SmartKey deadbolts are rated as Grade 1 - providing you with the very best residential security on the market and ensuring the highest level of pick resistance available.
