

VEMONT VE-3108

VEMONT 5-in-1 USB C Hub Instruction Manual

MODEL: VE-3108

Introduction

Thank you for choosing the VEMONT 5-in-1 USB C Hub. This versatile multiport adapter is designed to expand the connectivity of your USB-C enabled devices, such as laptops, MacBooks, and iPads. It provides essential ports including Gigabit Ethernet, three USB 3.0 data ports, and a 100W Power Delivery charging port, allowing for simultaneous data transfer, network connection, and device charging.

Features

- **5-in-1 USB C Hub:** Expands a laptop's USB C to 5 ports (3 USB 3.0 data hub ports, 1 Gigabit Ethernet port, 1 Power Delivery charging port) that can be used simultaneously.
- **USB C to Gigabit Ethernet:** Supports RJ45 1000M Ethernet for stable and faster wired network connections, backward compatible with 100Mbps/10Mbps RJ45 LANs.
- **Power Delivery Charging:** The 100W Power Delivery charging port allows you to charge your computer, MacBook Pro, or other Type-C device while transferring data. For devices like Chromecast with Google TV, a power source of 45W or more is recommended for sufficient power.
- **High-Speed Data Transfer:** 3 USB 3.0 ports sync data at speeds up to 5Gbps, which is up to 10 times faster than USB 2.0. Also backward compatible with USB 2.0.
- **Plug and Play:** No software or driver installation required for most operating systems.

Figure 1: Overview of the VEMONT 5-in-1 USB C Hub connected to a laptop, showing the Type-C male connector, Gigabit Ethernet port, 3 USB 3.0 ports, and Type-C PD charging port.

Setup & Installation

1. **Connect the Hub to Your Device:** Plug the USB-C male connector of the VEMONT hub into the USB-C port on your laptop, MacBook, iPad, or other compatible device.
2. **Connect Peripherals:**
 - **USB 3.0 Devices:** Insert your USB 3.0 compatible devices (e.g., flash drives, external hard drives, keyboards, mice) into the three blue USB 3.0 ports on the hub.
 - **Ethernet Cable:** Connect an RJ45 Ethernet cable from your router or modem to the Gigabit Ethernet port on the hub for a wired network connection.
 - **Power Adapter:** If your host device requires charging or if you are connecting high-power consumption devices, connect a compatible USB-C Power Delivery charger (up to 100W) to the USB-C PD charging port

on the hub.

5-in-1

Operating Instructions

The VEMONT 5-in-1 USB C Hub operates on a plug-and-play basis. Once connected, your operating system should automatically detect the hub and its connected devices.

- **Using USB 3.0 Ports:** Connect your USB 3.0 compatible devices to the blue USB 3.0 ports for high-speed data transfer. These ports are ideal for external storage, keyboards, mice, and other USB peripherals.
- **Using Gigabit Ethernet:** Plug an Ethernet cable into the RJ45 port to establish a stable and fast wired internet

connection. This is particularly useful in areas with unreliable Wi-Fi or for tasks requiring high bandwidth.

- **Using Power Delivery (PD) Port:** Connect your USB-C power adapter to the PD port to charge your host device while using the hub. This port supports up to 100W power delivery, ensuring your device remains charged during intensive use.

RJ 45 Gigabit Ethernet

Stable and rapid Internet access of up to 1Gbps

Figure 4: The RJ45 Gigabit Ethernet port provides stable and rapid internet access of up to 1Gbps, with backward compatibility for 10/100Mbps networks.

Figure 5: The 100W Power Delivery port enables instant charging for your compatible USB-C device while the hub is in use.

Maintenance

To ensure the longevity and optimal performance of your VEMONT 5-in-1 USB C Hub, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe the surface of the hub. Avoid using liquid cleaners or aerosols, as they may damage the device.
- **Storage:** Store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the hub or subjecting it to strong impacts. Do not force connectors into ports.
- **Cable Care:** Do not bend or twist the integrated USB-C cable excessively to prevent internal damage.

Figure 6: The hub features a space-grade aluminum shell designed for better and quicker heat dissipation, ensuring intelligent temperature control during operation.

Troubleshooting

If you encounter issues with your VEMONT 5-in-1 USB C Hub, please refer to the following common troubleshooting steps:

- **Device Not Recognized:**

- Ensure the hub's USB-C connector is fully inserted into your host device.
- Try connecting the hub to a different USB-C port on your device.
- Verify that your host device's USB-C port supports USB Power Delivery and DisplayPort Alt Mode (if applicable for video output, though this model does not have video output).

- **Slow Data Transfer:**

- Confirm that your connected USB devices and cables are USB 3.0 compatible for optimal speeds.
- Avoid connecting multiple high-bandwidth devices simultaneously if you experience slowdowns.

- **Charging Issues:**

- Ensure your USB-C power adapter is connected to the hub's PD port and is capable of delivering sufficient power (e.g., 100W).
- Check if your host device supports charging via its USB-C port.
- For devices like Chromecast with Google TV, ensure the power source is 45W or more.

- **Ethernet Connection Problems:**

- Check that the Ethernet cable is securely connected to both the hub and your router/modem.
- Verify that your network settings on your host device are configured correctly for a wired connection.
- Restart your router/modem and your host device.

Specifications

Feature	Description
Product Dimensions	4.17 x 1.38 x 0.59 inches
Item Weight	3.2 ounces
Item Model Number	VE-3108
Brand	VEMONT
Color	Space gray
Hardware Interface	USB Type C
Special Feature	Plug and Play
Compatible Devices	Laptops
