BoxWave ClearTouch Crystal

BoxWave ClearTouch Crystal Screen Protector User Manual

For Paradox TM70 Touch

1. Product Overview

The BoxWave ClearTouch Crystal Screen Protector is designed to provide superior protection for your Paradox TM70 Touch device while maintaining optimal screen clarity and touch sensitivity. This high-quality film shields your screen from scratches, dust, and daily wear, ensuring your device's display remains pristine.

2. Key Features

- **Perfect Fit:** Precision-cut to match the exact dimensions of your Paradox TM70 Touch, ensuring full coverage and compatibility.
- **Crystal Clarity:** Boasts an ultra-high 99% visual transparency, providing a glass-like viewing experience with vibrant colors and no loss of resolution.
- **Strength and Stability:** Constructed from high-grade Polyethylene Terephthalate (PET) for enhanced durability, effectively protecting your screen from scratches and dust.

- **Clean Application:** Features a glueless adhesive that bonds perfectly to your screen without leaving any sticky residue upon removal.
- **Reusability:** Designed with installation forgiveness, allowing for reuse and reinstallation if needed.

3. What's Included

Each package of the BoxWave ClearTouch Crystal Screen Protector contains the following items:

- Two (2) ClearTouch Crystal Screen Protectors
- One (1) ClearTouch Applicator Card
- One (1) Microfiber Cleaning Cloth

Image: The included accessories: an applicator card, a microfiber cleaning cloth, and a dust removing sticker, essential for a clean installation.

4. Setup and Installation

Follow these steps for optimal installation of your ClearTouch Crystal Screen Protector:

1. **Clean Your Device Screen:** Use the included microfiber cleaning cloth to thoroughly clean the Paradox TM70 Touch screen. Ensure there are no dust particles, smudges, or fingerprints. For stubborn marks, a screen cleaner designed for electronics can be used sparingly.
2. **Remove Dust:** Use a dust-removing sticker (if included or available) to lift any remaining dust particles from the screen surface. This is a critical step for a bubble-free installation.
3. **Peel Back Layer 1:** Carefully peel back a small portion of the protective film labeled "Layer 1" from one end of the screen protector. Avoid touching the adhesive side.

4. **Align and Apply:** Align the exposed adhesive edge of the screen protector with one edge of your device's screen. Once aligned, slowly and steadily lower the rest of the screen protector onto the screen, peeling off "Layer 1" as you go. Use the applicator card to gently push out air bubbles as you apply.
5. **Smooth Out Bubbles:** If air bubbles appear, use the applicator card to push them towards the nearest edge of the screen protector. Apply firm, even pressure.
6. **Remove Layer 2:** Once the screen protector is fully applied and smoothed, carefully peel off the top protective film labeled "Layer 2".
7. **Final Adjustment:** The special low-tack adhesive may take a short time to fully adhere around the edges. Any small air gaps around the edges should clear out within approximately 2 days of regular use.

5. Operating and Usage

Once installed, the BoxWave ClearTouch Crystal Screen Protector operates seamlessly with your Paradox TM70 Touch. It is designed to:

- Maintain full touch screen sensitivity and responsiveness.
- Preserve the original display clarity and color vibrancy.
- Provide an invisible layer of protection against daily wear and tear.

You can continue to use your device as normal, enjoying the added peace of mind that your screen is protected.

6. Maintenance

To keep your ClearTouch Crystal Screen Protector clean and clear:

- Use the included microfiber cleaning cloth to gently wipe away smudges, fingerprints, and dust.
- For more persistent marks, lightly dampen the microfiber cloth with water or a screen cleaner specifically designed for electronics. Avoid harsh chemicals or abrasive materials.
- Do not apply excessive pressure when cleaning, as this could potentially dislodge the protector or damage the screen underneath.

7. Troubleshooting

Air Bubbles After Installation

Small air bubbles are common immediately after installation. The special low-tack adhesive of the ClearTouch Crystal screen protector requires a short period to fully adhere. Most small air gaps will naturally clear out within approximately 2 days of regular use. For larger bubbles, gently lift the nearest edge of the protector and reapply, using the applicator card to push the air out as you lay it back down.

Dust Under the Protector

If dust particles are trapped under the protector, carefully lift the nearest corner of the screen protector. Use a dust-

removing sticker or a piece of tape to gently dab the dust off both the screen and the adhesive side of the protector. Reapply the protector slowly, smoothing it down with the applicator card.

Protector Not Sticking Properly

Ensure the screen was thoroughly cleaned before application. Oils or residues can prevent proper adhesion. If the protector is not adhering well, it may be due to improper cleaning or damage to the adhesive layer. In such cases, you may need to use the second protector provided in the pack.

8. Specifications

Attribute	Detail
Brand	BoxWave
Model	ClearTouch Crystal
Compatible Device	Paradox TM70 Touch
Material	Polyethylene Terephthalate (PET)
Special Feature	Scratch Resistant
Screen Surface Description	Glossy
Clarity	99%
Number of Items	2
Item Weight	1.6 ounces
ASIN	B085Z69Z9X
Date First Available	March 11, 2020

9. Warranty and Support

For any questions, concerns, or support regarding your BoxWave ClearTouch Crystal Screen Protector, please contact BoxWave Corporation directly. While specific warranty details are not provided in this manual, BoxWave is committed to customer satisfaction.

You can typically find support contact information on the product packaging or by visiting the official BoxWave website. Please have your product model (ClearTouch Crystal) and device model (Paradox TM70 Touch) ready when contacting support.
