## Cruz 936-006

# Cruz Optiplus FIX Kit 936-006 Instruction Manual

Model: 936-006

## 1. INTRODUCTION

This manual provides essential information for the proper installation, safe operation, and maintenance of your Cruz Optiplus FIX Kit 936-006. This kit is designed to securely attach a Cruz Optiplus roof rack system to specific vehicle models. Please read these instructions thoroughly before beginning installation to ensure correct assembly and safe use.

For additional support or information, please visit the official [Cruz website](#).

## 2. SAFETY INFORMATION

Always prioritize safety during installation and use. Failure to follow these instructions can result in property damage, personal injury, or accidents.

- Ensure all components are correctly installed and tightened according to the instructions.
- Do not exceed the maximum load capacity specified for your vehicle or the roof rack system.
- Regularly check all fasteners and connections for tightness, especially after the first few miles of driving and periodically thereafter.
- Distribute the load evenly on the roof rack.
- Be aware of increased vehicle height and width when carrying loads, especially when entering garages or low-clearance areas.
- Consult your vehicle's owner's manual for any specific recommendations or restrictions regarding roof rack installation.

## 3. PACKAGE CONTENTS

Verify that all components listed below are present in your Cruz Optiplus FIX Kit 936-006 package before beginning installation. If any parts are missing or damaged, please contact your retailer or Cruz customer support.

*Image 1: The packaging box for the Cruz Optiplus FIX Kit 936-006. The box is white with the blue "CRUZ" logo prominently displayed.*

The kit typically includes:

- Specific mounting brackets (4 units)
- Rubber pads or protective sheets (4 units)
- Fasteners (bolts, washers, nuts)
- Installation tool (e.g., Allen key, if required)
- Instruction leaflet (this manual provides detailed guidance)

## 4. SETUP AND INSTALLATION

Follow these steps carefully to install the Cruz Optiplus FIX Kit 936-006 onto your vehicle. This kit is designed for specific vehicle models; ensure compatibility before proceeding.

1. **Prepare the Vehicle:** Clean the roof area where the fix points will be installed. Ensure the surface is dry and free of debris. Identify the designated fix points on your vehicle's roof, usually indicated by small covers or pre-drilled holes.
2. **Attach Protective Pads:** Apply the provided rubber pads or protective sheets to the vehicle's roof at each fix point. These pads protect the vehicle's paintwork and provide a secure grip.
3. **Position Mounting Brackets:** Place the specific mounting brackets from the kit onto the protective pads, aligning them with the vehicle's fix points. Ensure the orientation of each bracket matches the vehicle's contours and the roof rack's base feet.
4. **Secure Brackets:** Insert the fasteners (bolts) through the brackets and into the vehicle's fix points. Hand-tighten all bolts initially to ensure proper alignment.
5. **Install Roof Bars (if applicable):** If you are installing the entire roof rack system, attach the Cruz Optiplus roof bars to the installed fix kit brackets according to the roof bar's specific instructions.
6. **Final Tightening:** Using the appropriate tool (e.g., torque wrench if specified, or Allen key), tighten all fasteners securely. Refer to the torque specifications provided in the roof rack system manual or the kit's leaflet if available. Do not overtighten.
7. **Final Check:** After installation, gently pull and push on the installed fix kit and roof bars to ensure they are firmly secured and do not wobble.

**Note:** Specific vehicle models may have unique installation requirements. Always consult your vehicle's owner's manual and any supplementary instructions provided with the Cruz Optiplus roof rack system.

## 5. OPERATING INSTRUCTIONS

Once the Cruz Optiplus FIX Kit 936-006 is correctly installed and secured, it forms the foundation for your Cruz Optiplus roof rack system. The "operation" of this fix kit primarily involves ensuring its continued secure attachment and proper integration with the roof bars.

- **Load Distribution:** Always distribute any load carried on the roof rack evenly across the bars and within the specified weight limits.
- **Regular Checks:** Before each trip, especially when carrying a load, visually inspect the fix kit and roof bars for any signs of loosening, damage, or wear.
- **Driving Considerations:** Adjust your driving style when carrying loads on the roof. Avoid sudden braking, acceleration, or sharp turns. Be mindful of crosswinds.

## 6. MAINTENANCE

Proper maintenance ensures the longevity and safe performance of your Cruz Optiplus FIX Kit 936-006.

- **Cleaning:** Clean the components periodically with mild soap and water. Avoid harsh chemicals or abrasive cleaners that could damage the finish or materials.
- **Inspection:** Regularly inspect all parts for signs of wear, corrosion, cracks, or deformation. Pay close attention to rubber components for deterioration.
- **Fastener Tightness:** Re-check the tightness of all bolts and fasteners at least once a month, or more frequently if the roof rack is used often or carries heavy loads.
- **Storage:** If the roof rack system is removed for extended periods, store the fix kit components in a dry, protected environment to prevent corrosion and damage.

## 7. TROUBLESHOOTING

This section addresses common issues you might encounter with your Cruz Optiplus FIX Kit 936-006.

| Problem                                   | Possible Cause                                                  | Solution                                                                                                                                             |
|-------------------------------------------|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Kit does not fit vehicle.                 | Incorrect kit for vehicle model.                                | Verify the kit's compatibility with your specific vehicle make, model, and year. Contact your retailer if incorrect.                                 |
| Components feel loose after installation. | Fasteners not tightened sufficiently or incorrect installation. | Re-check all fasteners and ensure they are tightened according to instructions. Review installation steps.                                           |
| Noise or whistling from roof rack.        | Improperly installed components or aerodynamic issues.          | Ensure all components are tightly secured. Check for any gaps or misalignments. Consider adding wind fairings if available for your roof bar system. |
| Damage to vehicle paintwork.              | Protective pads not used or improperly placed.                  | Ensure protective pads are correctly positioned between the kit components and the vehicle surface. Avoid overtightening.                            |
