4. Operating Instructions

After installing the new battery, it is crucial to properly charge it before first use.

- **Initial Charge:** Place the handset on its charging base. Allow the battery to charge continuously for at least 12-15 hours, even if the phone indicates a full charge sooner. This initial charge helps to condition the battery for optimal performance.
- **Regular Charging:** For daily use, return the handset to its charging base when not in use. This ensures the battery remains charged and ready.
- **Battery Indicator:** Monitor your phone's battery indicator. Recharge the battery when the indicator shows low power to prevent complete discharge, which can shorten battery life.

5. Maintenance

Proper care and maintenance will extend the life of your replacement battery:

- **Temperature:** Avoid exposing the battery to extreme temperatures (very hot or very cold), as this can degrade performance and shorten lifespan. Store and use the phone at room temperature.
- **Cleaning:** Keep the battery contacts and the phone's charging contacts clean and free of dust or debris. Use a dry, soft cloth for cleaning.
- **Storage:** If the phone will not be used for an extended period, remove the battery and store it in a cool, dry place. Charge the battery periodically (e.g., every 3-6 months) to prevent deep discharge.

6. Troubleshooting

If you encounter issues with your replacement battery, consider the following common solutions:

- **Phone Not Turning On:** Ensure the battery is correctly installed and fully charged. Verify that the battery connector is securely attached.
- **Short Battery Life:** Ensure the initial 12-15 hour charge was completed. Over time, all rechargeable batteries experience reduced capacity. If the issue persists shortly after installation, ensure the phone's charging base is functioning correctly.

- **Charging Issues:** Check that the handset is properly seated on the charging base and that the base is connected to a working power outlet. Clean the charging contacts on both the handset and the base.
- **Intermittent Power:** Re-seat the battery to ensure a firm connection.

If these steps do not resolve the issue, please refer to the customer support section.
