Technical Precision 3304-470

Technical Precision Replacement Part 3304-470

INSTRUCTION MANUAL FOR EZGO, CUSHMAN, AND TEXTRON VEHICLES

1. Introduction

This manual provides essential information for the proper installation, operation, and maintenance of your Technical Precision 3304-470 replacement part. This component is designed as a direct replacement for specific EZGO, Cushman, and TEXTRON vehicle models. Please read this manual thoroughly before proceeding with installation to ensure safe and correct usage.

2. Product Overview

The Technical Precision 3304-470 is an electrical replacement component. It is supplied as a single unit.

2.1 What's in the Box

- 1 x Technical Precision 3304-470 Replacement Part

2.2 Product Image

This image displays the Technical Precision 3304-470 replacement part. It is an electrical component, likely a sensor or switch, featuring a black cylindrical body with a metal pin at one end, connected to a black insulated wire. The wire terminates in a light yellow, multi-pin electrical connector. This component is designed for integration into the vehicle's

3. Safety Information

- Always disconnect the vehicle's battery before attempting any electrical work to prevent electric shock or damage to the vehicle.
- Wear appropriate personal protective equipment, such as safety glasses and gloves.
- Ensure the vehicle is stable and cannot move during installation.
- If you are unsure about any step, consult a qualified technician.

4. Setup and Installation

This replacement part is intended for direct installation into compatible EZGO, Cushman, and TEXTRON vehicles. Follow the vehicle manufacturer's service manual for specific removal and installation procedures for the component being replaced.

4.1 General Installation Steps

1. **Prepare the Vehicle:** Park the vehicle on a level surface, engage the parking brake, and turn off the ignition. Disconnect the negative terminal of the vehicle's battery to cut off power.
2. **Locate the Original Part:** Identify the component that needs to be replaced within your vehicle. Refer to your vehicle's service manual for its exact location.
3. **Remove the Original Part:** Carefully disconnect any electrical connectors and mounting hardware securing the original part. Note the orientation and connection points for reassembly.
4. **Install the New Part:** Position the Technical Precision 3304-470 replacement part in the same location and orientation as the original. Secure it with the appropriate mounting hardware.
5. **Connect Electrical Wiring:** Connect the electrical connector of the new part to the vehicle's wiring harness. Ensure a secure and proper connection.
6. **Reconnect Battery:** Once the new part is securely installed and all connections are made, reconnect the negative terminal of the vehicle's battery.

5. Operation Verification

After installation, perform the following steps to verify proper function:

1. Turn the vehicle's ignition to the 'ON' position (do not start the engine/motor unless instructed by the vehicle manual).
2. Observe for any warning lights or error codes related to the replaced component.
3. If the part is a sensor, check the corresponding system's readings or functionality as per your vehicle's service manual.
4. If the part is a switch, test its activation and the resulting action.
5. If any issues arise, refer to the Troubleshooting section or consult a professional.

6. Maintenance

The Technical Precision 3304-470 replacement part is designed for durability and minimal maintenance. However, periodic inspection can help ensure its longevity and proper function:

- **Visual Inspection:** Periodically check the part and its connections for any signs of wear, corrosion,

or damage.

- **Cleanliness:** Keep the area around the part clean and free from excessive dirt, debris, or moisture.
- **Connection Integrity:** Ensure electrical connections remain tight and free from corrosion.

7. Troubleshooting

If you encounter issues after installing the 3304-470 replacement part, consider the following:

- **No Function/Incorrect Reading:**
 - Verify all electrical connections are secure and correctly seated.
 - Check for any blown fuses in the vehicle's electrical system that might affect the component.
 - Ensure the vehicle's battery is fully charged and providing adequate voltage.
 - Confirm the part is correctly installed in its intended location and orientation.
- **Intermittent Operation:**
 - Inspect wiring for any signs of damage, fraying, or loose connections.
 - Check for corrosion on terminals or connectors.

If troubleshooting steps do not resolve the issue, it is recommended to consult a professional vehicle technician or contact Technical Precision customer support.

8. Specifications

Attribute	Detail
Brand	Technical Precision
Model Number	3304-470
Manufacturer Part Number	3304-470
ASIN	B086C9MFMD
Compatibility	EZGO, Cushman, TEXTRON (specific models)
Unit per sale	1
Date First Available	June 12, 2019

9. Warranty and Support

For information regarding warranty coverage, terms, and conditions for the Technical Precision 3304-470 replacement part, please refer to the documentation provided with your purchase or contact Technical Precision directly. For technical assistance or support, please visit the official Technical Precision website or contact their customer service department.
