2. SAFETY INFORMATION

Adherence to safety guidelines is crucial for preventing injury and damage to the product. Please observe the following:

- **Weight Limit:** Always adhere to the maximum weight limit of 1000 lbs for this bed frame. Exceeding this limit can compromise structural integrity and lead to collapse.
- **Mattress Use:** Do not use the bed frame without appropriate bedding materials, such as a mattress, to prevent entrapment risks and ensure proper support.
- **Assembly:** Ensure all components are correctly assembled and tightened before use. Periodically check and re-tighten all connections.
- **Children and Pets:** Keep small parts and packaging materials away from children and pets during assembly to prevent choking hazards.
- **Placement:** Place the bed frame on a flat, stable surface to prevent wobbling or tipping.

3. SETUP & ASSEMBLY

The Allewie Queen Size Platform Bed Frame is designed for easy and quick assembly, typically completed within 30 minutes. All necessary hardware is included and conveniently packaged within one carton.

3.1. Unpacking and Component Identification

Carefully unpack all components from the carton. Lay them out on a clean, soft surface (like a carpet) to prevent scratches. Verify that all parts listed in the included instruction sheet are present. Refer to the diagrams below for component identification.

3.2. Assembly Steps (General Guidance)

1. **Frame Assembly:** Connect the side rails and footboard to the headboard using the provided hardware. Ensure all connections are secure but do not fully tighten until all major components are aligned.
2. **Center Support Installation:** Attach the center support beam(s) and legs to the frame. These are crucial for mattress stability and weight distribution.
3. **Slat Installation:** Position the wooden slats across the frame. The slats are designed with Velcro fixation for quick installation and to prevent noise. Ensure each slat is firmly attached to the Velcro strips on the frame.
4. **Final Tightening:** Once all components are in place and aligned, fully tighten all screws and bolts. Do not overtighten.

4. USAGE

Your Allewie Queen Size Platform Bed Frame is designed for optimal comfort and support. Follow these guidelines for proper use:

- **Mattress Compatibility:** This platform bed frame is suitable for all types of mattresses, including spring, memory foam, latex, and hybrid mattresses. A box spring is optional and not required for proper support.
- **Mattress Height:** The frame accommodates mattresses with a recommended height of 10-14 inches for optimal aesthetic and functional integration with the headboard. If using a mattress and box spring combination, the total height should also be within this range.
- **Weight Distribution:** Ensure weight is distributed evenly across the bed frame. Avoid concentrating heavy loads in one small area.

5. MAINTENANCE

Regular maintenance will help preserve the appearance and structural integrity of your bed frame:

- **Cleaning:** Wipe the upholstered fabric surfaces with a dry cloth to remove dust and light debris. For spills, blot immediately with a clean, dry cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts and screws to ensure they remain tight. Retighten any loose connections to maintain stability and prevent squeaks.
- **Slat Inspection:** Check the wooden slats for any signs of damage or displacement. Ensure the Velcro fixation remains secure to prevent movement and noise.

6. TROUBLESHOOTING

If you encounter issues with your bed frame, refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|--|--|---|
| Bed frame is wobbly or unstable. | Loose hardware connections. Uneven floor surface. | Ensure all bolts and screws are fully tightened. If the floor is uneven, use furniture pads or shims under the legs to level the frame. |
| Squeaking noises from the frame. | Loose slats or frame connections. Friction between components. | Check that all wooden slats are properly seated and the Velcro is securely attached. Re-tighten all frame bolts. Apply a small amount of lubricant (e.g., silicone spray) to points of friction if necessary. |
| Mattress sagging or not fully supported. | Damaged or displaced slats. Exceeded weight limit. | Inspect all slats for damage and ensure they are correctly positioned and secured. Verify that the combined weight on the bed does not exceed the 1000 lbs limit. |
