## Maxxter Maxxter Web Cam ACT-BCAM-01 USB

# Maxxter Web Cam ACT-BCAM-01 USB User Manual

Model: ACT-BCAM-01 | Brand: Maxxter

## INTRODUCTION

This user manual provides comprehensive instructions for the Maxxter Web Cam ACT-BCAM-01 USB. This compact and versatile camera is designed for various recording needs, offering high-definition video capture and ease of use. Please read this manual thoroughly before operating the device to ensure proper functionality and safety.

## SAFETY INFORMATION

- Do not expose the device to extreme temperatures, humidity, or direct sunlight.
- Avoid dropping or subjecting the device to strong impacts.
- Keep the device away from water and other liquids. It is not waterproof.
- Do not attempt to disassemble or modify the device. This will void the warranty.
- Use only the provided USB cable for charging and data transfer.

## PACKAGE CONTENTS

Please check the package contents upon unboxing. The standard package should include:

- Maxxter Web Cam ACT-BCAM-01 USB Unit
- USB Cable
- User Manual (this document)
- Mounting Bracket/Clip

# Product Overview

Image: Front and side view of the Maxxter Web Cam ACT-BCAM-01 USB, showing the lens and control buttons.

Image: Top-down view of the Maxxter Web Cam ACT-BCAM-01 USB, highlighting the button layout.

Image: Diagram illustrating key features such as 140-degree wide viewing angle, night vision, motion detection, support for storage cards, and the 360-degree adjustable bracket. Dimensions are also shown.

## Key Components:

- **Lens:** High-definition camera lens for video recording.
- **USB Port:** For charging and data transfer.
- **MicroSD Card Slot:** For expandable storage (card not included).
- **Power/Mode Button:** To turn the device on/off and switch between modes.
- **Record Button:** To start and stop recording.
- **Indicator Lights:** Provide status feedback (e.g., power, recording, charging).

## SETUP

### 1. Charging the Device:

1. Connect the small end of the USB cable to the camera's USB port.
2. Connect the other end of the USB cable to a USB power adapter (not included) or a computer's USB port.
3. The indicator light will show charging status (e.g., solid red while charging, off when fully charged).

### 2. Inserting a MicroSD Card:

1. Ensure the camera is turned off.
2. Locate the MicroSD card slot on the side of the camera.
3. Gently insert a MicroSD card (Class 10 or higher, up to 32GB recommended) into the slot until it clicks into place.
4. To remove, push the card in slightly until it springs out.

## OPERATING INSTRUCTIONS

### Power On/Off:

- **To Power On:** Press and hold the Power/Mode button for 2-3 seconds. The indicator light will illuminate.

- **To Power Off:** Press and hold the Power/Mode button for 5-6 seconds until the indicator light turns off.

## Video Recording:

1. Ensure the camera is powered on and a MicroSD card is inserted.
2. Press the Record button once to start video recording. The indicator light will flash.
3. Press the Record button again to stop recording. The indicator light will stop flashing and return to standby mode.

## Motion Detection Recording:

This feature allows the camera to record only when motion is detected, conserving battery and storage space.

1. While in standby mode, press the Power/Mode button twice quickly to enter motion detection mode. The indicator light will change (refer to device specific light pattern).
2. The camera will automatically start recording when motion is detected and stop when motion ceases.
3. To exit motion detection mode, press the Power/Mode button once.

## Connecting to Computer:

To access recorded files, connect the camera to your computer using the provided USB cable. The camera will appear as a removable disk drive.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth. Do not use liquid cleaners or solvents.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Battery Care:** For optimal battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use for extended periods.

## TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|---|---|---|
| Camera does not turn on. | Low battery; Device malfunction. | Charge the camera for at least 2 hours. If still unresponsive, contact support. |
| Cannot record video. | No MicroSD card; Card full or corrupted; Incorrect card format. | Insert a MicroSD card. Check card capacity. Format the card (FAT32) on a computer. Try a different card. |
| Computer does not recognize the camera. | Faulty USB cable; Driver issue; Incorrect connection mode. | Try a different USB port or cable. Restart your computer. Ensure the camera is powered on when connected. |
| Poor video quality. | Low light conditions; Dirty lens; Incorrect settings. | Ensure adequate lighting. Clean the camera lens. |
