SportDOG YT-300

SportDOG Brand YardTrainer 300 Remote Trainer

Model: YT-300

INTRODUCTION

The SportDOG Brand YardTrainer 300 is a versatile remote training system designed to enhance communication and control with your canine companion. This system allows for effective training up to 300 yards, offering static stimulation, vibration, and tone options to suit various training needs and dog temperaments. Its durable, waterproof design ensures reliable performance in diverse environments.

PRODUCT COMPONENTS

The SportDOG YardTrainer 300 system includes a remote transmitter and a collar receiver, both designed for durability and ease of use.

3 Safe & Effective Stimulation Methods

**STATIC
STIMULATION**

TONE

VIBRATION

The system offers three distinct stimulation methods: static stimulation, tone, and vibration, providing versatile training options.

SETUP

Charging the System

The YardTrainer 300 system is powered by rechargeable lithium-ion batteries. Ensure both the Remote Transmitter and Collar Receiver are fully charged before initial use. Connect the provided charge cable to the charging jacks on both units and plug into a power source. A full charge typically takes approximately 2 hours. The charge indicator light will change when fully charged.

Fitting the Collar Receiver

Fitting the Collar Receiver

∴ The Collar should fit snugly, ensuring the probes don't rub your dog's skin

∴ Only one finger should fit under the strap

∴ Recheck fit after several minutes of wear

Proper fitting of the collar is crucial for effective and humane training. The collar should fit snugly, ensuring the probes make consistent contact with your dog's skin without causing discomfort.

- The collar should fit snugly, ensuring the probes don't rub your dog's skin.
- Only one finger should fit comfortably under the strap.
- Recheck the fit after several minutes of wear to ensure it remains secure and comfortable.
- The collar is suitable for dogs 8 pounds or larger with neck sizes 5" - 22".

Turning On/Off

To turn on the Collar Receiver, press and hold the power button until the indicator light illuminates. To turn off, press and hold the power button until the indicator light turns off. The Remote Transmitter typically powers on automatically when a button is pressed.

OPERATING INSTRUCTIONS

The SportDOG YardTrainer 300 offers instant correction, which is vital for effective dog training. This means there is no

delay between pressing a button on the remote and the collar activating.

Stimulation Levels and Modes

The system provides seven levels of static stimulation, along with vibration and tone options. The intensity dial on the remote allows you to easily adjust the static stimulation level.

- **Tone:** Emits an audible beep. Useful for warning or positive reinforcement.
- **Vibration:** Provides a tactile vibration. Can be used as a gentle reminder or precursor to static stimulation.
- **Static Stimulation:** Delivers a mild static pulse. Adjustable through seven levels to match your dog's temperament and training needs.

Training Freedom and Range

Experience the freedom of training your pet with an extended range of up to 300 yards. This allows you to maintain control over your dog whether at home, in the yard, or at the park, ensuring consistent obedience training and recreational opportunities.

MAINTENANCE

Battery Care

The system uses rechargeable lithium-ion batteries. For optimal performance, it is recommended to charge both the transmitter and receiver daily, or as needed, especially before extended training sessions. The battery life is approximately 12 hours of continuous use.

Waterproof Design (DryTek Technology)

The YardTrainer 300 is engineered with DryTek technology, making it waterproof and submersible up to 25 feet. This ensures durability and functionality even in wet conditions.

The YardTrainer 300 is designed with DryTek technology, making both the transmitter and receiver waterproof and submersible up to 25 feet. After use in water, wipe down the units to ensure longevity. Regularly inspect the charging port for debris and keep it clean and dry.

Cleaning and Storage

Clean the collar and contact points regularly with a damp cloth to prevent skin irritation on your dog. Store the unit in a dry place at room temperature when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not responding to remote.	Low battery on either unit, out of range, or units not paired.	Charge both units fully. Ensure you are within the 300-yard range. Repair the transmitter and receiver if necessary (refer to pairing instructions in the full user manual).
Dog not responding to stimulation.	Collar not fitted properly, contact points too short, or stimulation level too low.	Ensure the collar is snug with probes making good skin contact (one finger fit). Use longer contact points if your dog has thick fur. Increase the stimulation level gradually.
Battery not holding a charge.	Battery degradation over time, or improper charging habits.	Ensure units are charged daily or after each use. If the issue persists, contact SportDOG customer support for battery replacement options.

SPECIFICATIONS

Model Name: YardTrainer 300

Model Number: YT-300

Range: Up to 300 yards

Stimulation Types: 7 levels of static, vibration, tone

Waterproof: Yes, DryTek technology, submersible up to 25 feet

Batteries: Rechargeable Lithium-Ion (included)

Battery Life: Approximately 12 hours of continuous use

Dog Size: Suitable for dogs 8 pounds or larger

Neck Size: 5" - 22"

Included Components: Remote Transmitter, Collar Receiver, Charge Cable, Long Contact Points, Lanyard, Test Light Tool

Item Weight: 12 ounces (total package)

Manufacturer: Radio Systems Corporation

Date First Available: May 12, 2020
