Braun Series 5 Electric Shaver Replacement Head Instruction Manual

Model: 53B (Item Model Number: 4210201263074)

Brand: Braun

1. SETUP: ATTACHING YOUR NEW SHAVER HEAD

The Braun Series 5/6 shaver head is designed for easy attachment, ensuring a seamless transition to renewed shaving performance. Always ensure your shaver is turned off before handling the shaver head.

Replace every **18 months**
to maintain your best shave

Made in Germany 53B

Image: Braun Series 5/6 Electric Shaver Replacement Head 53B in its packaging, highlighting its compatibility and the recommendation to replace every 18 months.

Installation Steps:

1. **Remove the Old Head:** Depending on your specific Braun Series 5 or 6 shaver model, either press the release buttons located on the sides of the shaver head or gently pull the head upwards from the shaver body until it detaches.
2. **Align the New Head:** Take your new Braun Series 53B replacement head. Align the head with the shaver body, ensuring the correct orientation.
3. **Securely Attach:** Gently press the new head down onto the shaver body until you hear or feel a click, indicating it is securely locked into place. Ensure there is no wobble.

2. OPERATING YOUR SHAVER WITH THE NEW HEAD

The Braun Series 53B replacement head is engineered to restore your shaver's cutting performance to its optimal level. It features a precise cutting system designed for efficiency and comfort.

Key Features for Shaving:

- **Cutting Elements:** The head incorporates two specialized foils and a central trimmer section. This design is effective at capturing and cutting various hair types, including flat-lying hairs and longer stubble, which

can often be challenging for standard foils alone.

- **SensoFlex System (Series 6 models):** For shavers with the SensoFlex system, the head is designed to adapt to your facial contours with minimal pressure, providing a close and comfortable shave while reducing skin irritation.
- **Power Modes:** Your shaver may offer different power modes (e.g., standard, turbo). Select the mode that best suits your beard density and desired shaving speed. The turbo mode provides increased power for denser growth.

For best results, shave against the direction of hair growth, stretching your skin taut with your free hand to ensure a smooth surface.

3. MAINTENANCE: CLEANING AND CARE

Proper maintenance of your Braun shaver head is vital for prolonging its lifespan and ensuring consistent performance. Regular cleaning prevents the buildup of hair and debris that can impede the cutting elements.

Cleaning Instructions:

- **Daily Rinse:** After each shave, with the shaver turned on, rinse the shaver head under warm running water. This helps flush out most hair clippings and shaving residue.
- **EasyClean Feature:** The Braun Series 5/6 EasyClean generation allows for cleaning without removing the cassette. Water flows through the cutting elements, cleaning them effectively.
- **Thorough Cleaning:** Periodically, or if you notice reduced performance, remove the shaver head from the shaver body. Tap the head gently to dislodge any loose hair. You may use a small cleaning brush (often included with the shaver) to carefully remove stubborn hair and debris from the foils and cutter block.
- **Drying:** After cleaning, allow the shaver head to air dry completely before reattaching it to the shaver body or storing it. Do not wipe the foils with a towel, as this can damage them.

Replacement Recommendation: Braun recommends replacing your shaver's foil and cutter block every 18 months. This ensures that the cutting parts remain sharp and effective, providing you with the best possible shave and preventing discomfort from worn blades.

4. TROUBLESHOOTING COMMON ISSUES

If you encounter issues with your Braun Series 5/6 shaver after replacing the head, consider the following:

- **Less Comfortable Shave:** If your shave feels less comfortable or causes irritation, it is likely due to worn cutting parts. The 18-month replacement recommendation is crucial for maintaining comfort and efficiency.
- **Reduced Shaving Performance:** A dull or damaged shaver head will not cut hairs effectively. Ensure your replacement head is genuine Braun and not damaged. Also, verify that the head is securely attached to the shaver body.
- **Hair Pulling/Tugging:** This is a strong indicator of a worn or damaged shaver head. Replace the head immediately if you experience this.
- **Shaver Not Turning On/Charging Issues:** These issues are typically related to the shaver's main body or power source, not the replacement head. Refer to your main Braun shaver's instruction manual for troubleshooting power and charging problems.

5. SPECIFICATIONS

Feature	Detail
---------	--------

Brand	Braun
Model Name	Braun Series 5 53B Electric Shaver Head Replacement
Item Model Number	4210201263074
Product Dimensions	3.15 x 0.79 x 5.79 inches; 0.53 ounces
Special Feature	Cassette Style Complete
Recommended Uses For Product	Beard
Manufacturer	Procter & Gamble
Date First Available	May 9, 2020

6. WARRANTY & SUPPORT
