JUBEST HANDLE03

JUBEST 8-3/5" Sliding Barn Door Handle User Manual

Model: HANDLE03

1. PRODUCT OVERVIEW

The JUBEST 8-3/5" Sliding Barn Door Handle is designed for various door types, including barn doors, cupboard doors, closet doors, sliding doors, pocket doors, bi-fold doors, cabinets, and drawers. Constructed from premium carbon steel with a matte black powder-coated surface, this handle offers durability and resistance to rust.

Easy to Install

Stylish Handle

No Sharp Edge

Easy to Clean

Image 1.1: Key features of the JUBEST Sliding Barn Door Handle, highlighting ease of installation, stylish design, absence of sharp edges, and ease of cleaning.

Key Features:

- **Superior Quality:** Made from premium carbon steel with a matte black powder-coated finish for durability and rust resistance.
- **Easy Installation:** Designed for direct surface mounting without the need for door grooving.
- **Versatile Use:** Suitable for a wide range of residential and commercial applications.
- **Ergonomic Design:** Features no sharp edges for safe handling.

2. PACKAGE CONTENTS

Before beginning installation, please verify that all components are present in the package:

- 1x Finger Pull Handle
- 2x Mounting Screws
- 1x Hex Key (for screws)

- 1x Installation Manual (this document)

PACKAGE INCLUDE

Image 2.1: Contents of the JUBEST handle package, including the handle, screws, and hex key.

3. INSTALLATION INSTRUCTIONS

This pull handle is designed for direct surface mounting, eliminating the need to create a groove or deepening in the door itself. Follow these steps for a secure installation:

1. **Prepare the Door Surface:** Ensure the door surface where the handle will be mounted is clean and dry.
2. **Position the Handle:** Place the finger pull handle on the desired location on the door. Use a pencil to mark the positions for the two screw holes.
3. **Drill Pilot Holes:** Using an appropriate drill bit (slightly smaller than the screw diameter), carefully drill pilot holes at the marked positions. Ensure the pilot holes are drilled straight and perpendicular to the door surface to prevent the screws from stripping or sitting unevenly.
4. **Attach the Handle:** Align the handle with the pilot holes. Insert the provided screws through the handle's mounting holes and into the pilot holes.

5. **Tighten Screws:** Use the included Hex Key to tighten the screws firmly. Do not overtighten, as this may damage the door or the handle.

6. **Verify Stability:** Gently pull on the handle to ensure it is securely attached to the door.

The handle is suitable for doors 1-1/4 inches (31.75mm) and thicker.

Image 3.1: Illustration of the handle's surface-mount installation, demonstrating that no door grooving is required.

4. OPERATING INSTRUCTIONS

The JUBEST Sliding Barn Door Handle is designed for simple and effective operation. To open or close your door, grasp the handle firmly and apply gentle, consistent pressure in the desired direction. The flush design allows for smooth movement of sliding doors without obstruction.

Applications:

This handle is versatile and can be used in various settings:

- Barn Doors

- Cupboard Doors
- Closet Doors
- Sliding Doors
- Pocket Doors
- Bi-fold Doors
- Cabinets
- Drawers
- Furniture
- Kitchen Applications

WIDELY USE

BEDROOM

KITCHEN

LIVING ROOM

CLOSET

5. MAINTENANCE

The JUBEST Sliding Barn Door Handle is designed for low maintenance due to its durable construction and finish. To ensure its longevity and appearance:

- **Cleaning:** Wipe the handle periodically with a soft, damp cloth to remove dust and grime. Avoid abrasive cleaners or harsh chemicals, as these can damage the matte black powder-coated surface.
- **Inspection:** Periodically check the mounting screws for tightness. If they become loose, retighten them using the Hex Key to ensure the handle remains secure.
- **Rust Prevention:** The carbon steel construction with powder coating provides rust resistance. For optimal protection, avoid prolonged exposure to excessive moisture or corrosive environments.

Image 5.1: Details on the handle's construction, emphasizing high-quality steel, rust-proof powder coating, and safe, non-sharp edges.

6. TROUBLESHOOTING

If you encounter any issues with your JUBEST Sliding Barn Door Handle, please refer to the following common concerns:

- **Handle Feels Loose:**

Solution: Check the mounting screws. If they are loose, use the provided Hex Key to tighten them. Ensure pilot holes were drilled straight during installation to allow screws to sit flush and securely.

- **Difficulty Sliding Door:**

Solution: Ensure the handle is not obstructing the door's movement. Verify that the door track and rollers are clean and free of debris. The handle itself is designed to be flush and should not impede sliding.

- **Scratches or Damage to Finish:**

Solution: Avoid using abrasive materials or harsh chemicals for cleaning. For minor cosmetic issues, touch-up paint suitable for matte black powder-coated surfaces may be used, though it is recommended to test in an inconspicuous area first.
