## SETUP AND INSTALLATION

This toilet paper holder can be installed using two methods: drilling or drill-free adhesive mounting. Choose the method that best suits your needs.

### Method 1: Drill-Free Installation (Recommended for smooth, non-porous surfaces)

- Prepare the Surface:** Clean the desired wall surface thoroughly with a cloth and alcohol. Ensure the surface is dry, smooth, and free from dust, grease, or moisture.
- Apply Adhesive:** Peel one side of the protective film from the provided 3M adhesive pad. Carefully align and press this side onto the mounting plate of the toilet paper holder. Ensure a firm, even application.

3. **Mount to Wall:** Peel the remaining protective film from the adhesive pad. Position the holder against the cleaned wall surface and press firmly for at least 30 seconds. Apply consistent pressure across the entire mounting plate.
4. **Curing Time:** Allow the adhesive to cure for **48 hours** before placing any weight on the holder or attaching accessories. This ensures maximum adhesion strength.

#### **Method 2: Screw-Mount Installation (Hardware not included)**

1. **Mark Drilling Points:** Hold the mounting plate against the wall at the desired installation height. Use a pencil to mark the positions for drilling through the pre-drilled holes on the plate.

2. **Drill Holes:** Using an appropriate drill bit for your wall type, drill holes at the marked positions. Insert wall anchors if necessary.
3. **Secure Holder:** Align the mounting plate with the drilled holes and secure it to the wall using screws (not supplied). Ensure the holder is firmly attached.

## OPERATING INSTRUCTIONS

---

To use the toilet paper holder, simply slide a standard-sized toilet paper roll onto the open arm. The design accommodates most common roll sizes without a cover, allowing for easy replacement.

## CARE AND MAINTENANCE

To maintain the appearance and longevity of your SENSEA Toilet Paper Holder, follow these simple care instructions:

- Clean regularly with a soft, damp cloth.
- Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the brushed chrome finish.
- Dry the holder immediately after cleaning to prevent water spots.

## TROUBLESHOOTING

- **Holder feels loose (Drill-Free Installation):** Ensure the 48-hour curing time was observed. If the surface was not properly cleaned or is porous, the adhesive may not bond effectively. Re-clean the surface and apply a new adhesive pad, or consider screw-mount installation.
- **Holder feels loose (Screw-Mount Installation):** Check if the screws are tightened securely. If the wall anchors are damaged or the holes are too large, replace the anchors or relocate the holder.

- **Difficulty inserting toilet paper roll:** Ensure you are using a standard-sized toilet paper roll. The holder is designed for common dimensions.
