PRODUCT OVERVIEW

The VIVOHOME Bird Bath with Solar Fountain provides a welcoming water source for birds in your garden. This unit combines a durable bird bath with a solar-powered fountain pump, designed for easy assembly and maintenance. Its weather-resistant construction ensures longevity in various outdoor conditions.

Key Features:

- **Integrated Bird Bath & Fountain:** Features a 20-inch wide bowl and a solar fountain with detachable rods to secure the pump and prevent splashing.
- **Durable Construction:** Made from quality polyresin with an antique finish, resistant to sun, rain, and freezing.
- **Enhanced Stability:** A 15-inch wide base and hollow support pole can be filled with gravel or sand for added stability, complemented by 3 ground stakes.
- **Bird-Friendly Design:** The bowl offers ample space with grip holes for secure perching, gently sloped edges for easy access, and a 2.4-inch depth suitable for drinking and bathing.
- **Solar-Powered Fountain:** Includes a solar pump with 4 interchangeable nozzles for various water effects. The pump operates on sunlight, features adjustable spray height, and an auto shut-off mechanism to prevent dry running.
- **Simple Assembly & Cleaning:** Designed for quick, tool-free assembly and easy cleaning with a twist-off bowl.

Weather Resistance

The bird bath is designed to withstand various weather conditions, including sun, wind, and snow, ensuring durability.

Bird-Friendly Design

Grip holes for secure perching

Grip holes for secure perching

Features a bird-friendly design with a 20-inch wide basin, grip holes for secure perching, and an ideal 2.4-inch depth for birds to drink and bathe comfortably.

SETUP INSTRUCTIONS

1. Bird Bath Assembly

1. Unpack all components: bird bath bowl, pedestal, base, and solar fountain kit.
2. Screw the pedestal onto the base. Ensure it is tightened securely.
3. Screw the bird bath bowl onto the top of the pedestal.
4. For enhanced stability, fill the hollow support pole and/or the base with gravel, sand, or water. Use the three included ground stakes to further secure the bird bath in place, especially in windy conditions.

• Twist to Remove Bowl

• Refresh Water Easily

Easy to Clean

1-Minute Assembly

4 Simple Parts, No Tools Required

The bird bath assembles quickly in four simple steps without the need for tools.

2. Solar Fountain Setup

1. Insert the four detachable rods into the connectors on the underside of the solar fountain pump.
2. Attach the rods to the designated slots within the bird bath bowl. This secures the fountain in the center of the bowl.
3. Select your desired nozzle from the four provided options and insert it into the front outlet of the pump.
4. Place the assembled solar fountain into the bird bath bowl.

Easy Fountain Setup

Step 1

- Insert Rod into Connector

Step 2

- Attach to Fountain Slot

Step 3

- Secure All 4 Rods

Step 4

- Insert Nozzle into Front Outlet

Follow these steps to easily set up the solar fountain pump and secure it within the bird bath bowl.

Watch this video for a visual guide on assembling the VIVOHOME Bird Bath with Solar Fountain.

OPERATING INSTRUCTIONS

The solar fountain operates automatically when exposed to sufficient sunlight. No external power source or batteries are required.

Solar Power Operation:

- Ensure the solar panel on the pump is clean and receives direct sunlight for optimal performance.
- The fountain will begin to spray water once the solar panel is activated by sunlight.
- The spray height and intensity will vary based on the amount of direct sunlight received.
- The pump features an auto shut-off function that activates when water levels are too low, protecting the pump from dry running and extending its lifespan.

Solar Fountain with 4 Spray Patterns

The solar fountain offers four distinct spray patterns, providing gentle water effects that attract birds without startling them.

Nozzle Selection:

Experiment with the four included nozzles to achieve different water spray patterns and heights. Choose a nozzle that provides a gentle flow suitable for birds and minimizes water loss due to splashing or wind.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your bird bath and solar fountain.

Cleaning the Bird Bath:

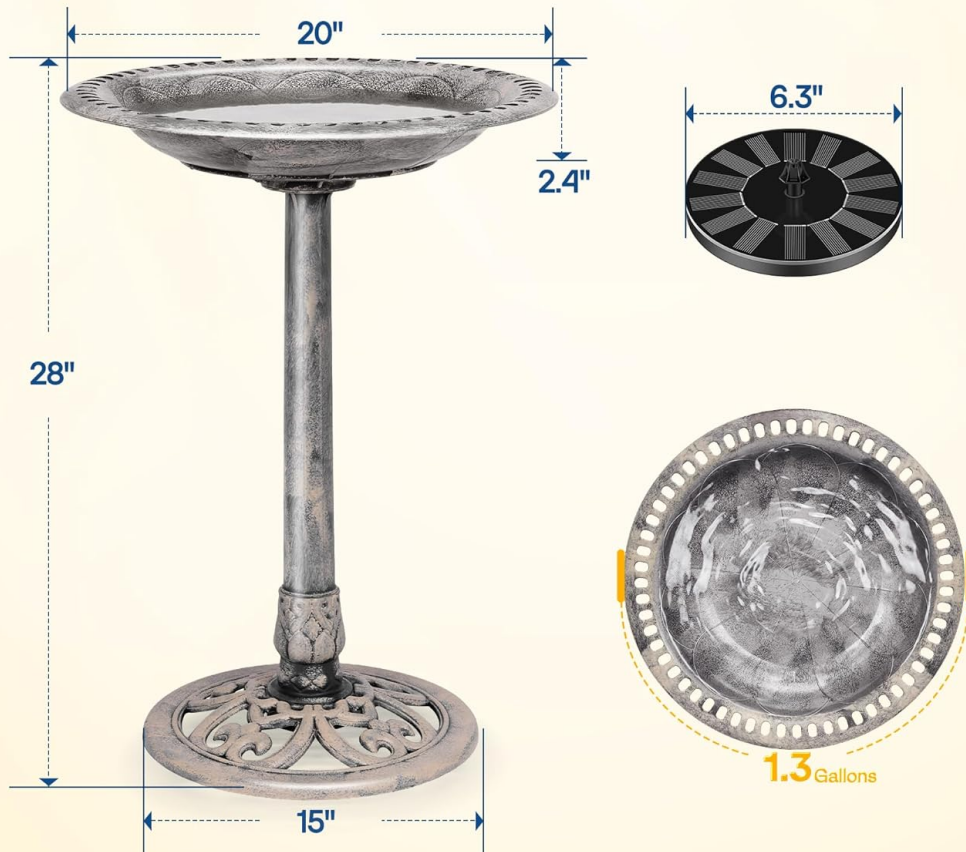

1. To clean the bowl, simply twist it off the pedestal. There is no need to remove the fountain rods or base.
2. Empty any old water and debris.

3. Clean the bowl with water and a soft brush or cloth. Avoid harsh chemicals that could harm birds.
4. Rinse thoroughly and refill with fresh, clean water.

Specifications

Product Dimensions: **20*20*28inch**

Product Weight: **5.8 lb**

The bird bath bowl is designed to twist off easily, simplifying the process of refreshing water and cleaning.

Solar Pump Care:

- Periodically clean the solar panel to ensure maximum sunlight absorption. Wipe it with a damp cloth to remove dust, dirt, or bird droppings.
- Regularly check and clean the pump filter to prevent clogging from debris, algae, or bird 'dirt'. A clogged filter can reduce water flow or stop the pump from working.
- Ensure the water level in the bird bath is always sufficient to keep the pump fully submerged.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Fountain not spraying or weak spray	Insufficient sunlight; Clogged pump filter or nozzle; Low water level.	Ensure solar panel receives direct sunlight. Clean the pump filter and nozzle. Refill the bird bath to ensure the pump is fully submerged.
Water drains too quickly	High spray setting; Wind causing splash-out; Bowl too shallow for spray intensity.	Switch to a nozzle with a gentler spray pattern. Choose a lower spray setting if available. Consider adding small, clean gravel or river rocks to the bottom of the bowl to reduce water depth and minimize splash-out.
Bird bath is unstable or tips over	Base is too light; Not properly secured.	Fill the hollow pedestal and/or base with gravel, sand, or water for added weight. Use the provided ground stakes to anchor the bird bath firmly into the ground.

SPECIFICATIONS

Feature	Detail
Model Number	VH082-GYR
Color	Gray
Material	Polypropylene, Resin
Product Dimensions (L x W x H)	20" x 20" x 28"
Item Weight	4.4 Pounds
Power Source	Solar Powered
Bowl Diameter	20 inches
Bowl Depth	2.4 inches
Base Diameter	15 inches
