3. SETUP

Follow these steps to set up your Targus 9-in-1 USB C HUB:

1. **Connect to Host Device:** Plug the integrated USB-C cable from the hub into an available USB-C port on your laptop, tablet, or smartphone. Ensure the USB-C port on your host device supports DisplayPort Alternate Mode (Alt Mode) and Power Delivery for full functionality.
2. **Power Delivery (Optional):** If your host device requires charging, connect your original USB-C power adapter to the USB-C PD port on the hub. The hub supports up to 60W power pass-through.
3. **Connect Peripherals:**
 - **HDMI Display:** Connect an HDMI cable from your monitor or TV to the HDMI port on the hub.
 - **Ethernet:** Connect an Ethernet cable from your router or modem to the Gigabit Ethernet port on the hub.
 - **USB Devices:** Plug your USB-A peripherals (e.g., mouse, keyboard, external hard drive) into the USB-A ports.
 - **Memory Cards:** Insert SD or microSD cards into the respective slots.
 - **Audio:** Connect headphones or speakers to the 3.5mm audio jack.

The hub is generally plug-and-play and does not require additional driver installation for most operating systems.

4. OPERATING INSTRUCTIONS

Once connected, the Targus 9-in-1 USB C HUB operates automatically. Here are specific instructions for each function:

- **USB-C Power Delivery:** When a power adapter is connected to the hub's USB-C PD port, power will be passed through to charge your host device. Ensure your power adapter meets the power requirements of your device.
- **HDMI Output:** Your host device should automatically detect the external display. You may need to adjust display settings (e.g., resolution, extended/mirrored display) in your operating system's display preferences. The hub supports up to 4K@30Hz.
- **Gigabit Ethernet:** The wired network connection will be established automatically. Check your network settings if you experience connectivity issues.
- **USB-A Ports:** Connect any USB 2.0 or USB 3.0 (5Gbps) compatible devices. These ports are suitable for data transfer and connecting peripherals like keyboards, mice, and external storage.

- **SD/microSD Card Readers:** Insert your memory cards into the corresponding slots. They will appear as removable drives on your host device, allowing you to transfer files. Do not insert both SD and microSD cards simultaneously if the hub only supports one at a time (check product specifications if unsure, but typically they are separate slots).
- **3.5mm Audio Jack:** Connect standard 3.5mm headphones or speakers. Your operating system should automatically switch audio output to the connected device.

Proper care and maintenance will extend the lifespan of your Targus 9-in-1 USB C HUB:

- **Cleaning:** Disconnect the hub from all devices before cleaning. Use a soft, dry, lint-free cloth to wipe the surface. Do not use liquid cleaners, aerosols, or solvents.
- **Storage:** Store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the hub or subjecting it to strong impacts. Do not bend or twist the integrated USB-C cable excessively.
- **Heat Generation:** It is normal for the hub to generate some heat during operation, especially when multiple ports are in use or when charging a device via Power Delivery. Ensure the hub has adequate ventilation and is not covered to prevent excessive heat buildup. If the hub becomes excessively hot to touch, disconnect it and allow it to cool down.
