SETUP AND ASSEMBLY

Follow these steps to assemble your fishing rod rack. Assembly is required and can be completed with basic tools.

How to Install

Step 1

Insert the slide columns into the sockets of the base rods.

Step 2

Slide the baffles into the slots on the base rods.

Step 3

Slide the shelves with grooves and tighten the screws in the appropriate position.

Step 4

Complete the installation.

Step 3 details sliding shelves with grooves and tightening screws. Step 4 shows the completed assembly.

1. **Step 1:** Insert the slide columns into the sockets located on the base rods. Ensure they are securely seated.
2. **Step 2:** Slide the baffles into the designated slots on the base rods. These baffles help secure the rods.
3. **Step 3:** Position the shelves with their grooves onto the columns. Tighten the screws in the appropriate positions to secure the shelves.
4. **Step 4:** Once all components are attached and tightened, the installation is complete.

OPERATING INSTRUCTIONS

The OUKANING fishing rod rack is designed for efficient and organized storage of your fishing rods. It features a high capacity and adjustable height for various rod lengths.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and appearance of your fishing rod rack.

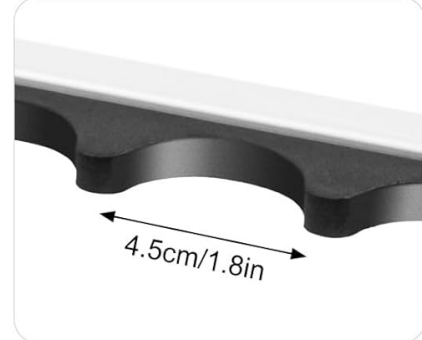

Cleaning

The aluminum alloy material and design make the rack easy to clean. Use a soft, damp cloth to wipe down the surfaces. Avoid abrasive cleaners or harsh chemicals that could damage the finish.

Component Care

- **EVA Grooves:** The soft and elastic EVA grooves are designed to prevent scratching your fishing rods. Periodically check these grooves for wear and tear.
- **Protective Nylon Cups:** The protective nylon cups at the base prevent water or other debris from entering the frame. Ensure these cups are intact and free of blockages.

TROUBLESHOOTING

This section addresses common issues you might encounter with your fishing rod rack.

- **Instability:** If the rack feels unstable, ensure all screws are tightened securely and the rack is placed on a flat, level surface. Recheck the assembly steps to confirm all components are correctly installed.
- **Difficulty Adjusting Height:** If the shelves are difficult to adjust, ensure the ABS adjusting knob is fully loosened before attempting to slide the shelves. Check for any debris in the grooves that might impede movement.
- **Scratched Rods:** If rods are getting scratched, inspect the EVA grooves for damage or displacement. Replace any worn-out EVA material if necessary.
