Ripack 2200 & 3000 Heat Gun 6' 8" Combo Extension Instruction Manual

Model: MSW-902-333370 (Part# 333371)

INTRODUCTION

This instruction manual provides essential information for the safe and effective use of your Ripack 2200 & 3000 Heat Gun 6' 8" Combo Extension. This extension is designed to enhance the reach and comfort when operating Ripack 2200 and 3000 series heat guns, particularly in hard-to-reach areas. Please read this manual thoroughly before installation and operation to ensure proper usage and to prevent damage to the equipment or injury.

SETUP AND INSTALLATION

The Ripack Combo Extension is designed for straightforward attachment to compatible Ripack heat guns. Follow these steps for proper installation:

1. **Ensure Safety:** Before beginning, ensure your Ripack heat gun is disconnected from its fuel source and is completely cool.
2. **Prepare Components:** Identify the heat gun, the extension tube, and the heat diffuser (nozzle) components.
3. **Attach Extension to Heat Gun:** Carefully align the connection end of the extension tube with the nozzle attachment point on your Ripack 2200 or 3000 heat gun. Twist or push firmly until it is securely seated. Refer to the diagram below for visual guidance.
4. **Attach Diffuser to Extension:** Once the extension is securely attached to the heat gun, attach the heat diffuser (nozzle) to the other end of the extension tube. Ensure it is also firmly in place.
5. **Verify Connection:** Gently tug on the extension and diffuser to confirm all connections are secure before use.

OPERATING INSTRUCTIONS

The 6' 8" Combo Extension allows for extended reach, making it ideal for applications such as shrink wrapping large objects like boats, machinery, or vehicles, where direct access with the heat gun alone would be difficult or require ladders.

1. **Safety First:** Always wear appropriate personal protective equipment (PPE), including heat-resistant gloves and eye protection, when operating the heat gun with or without the extension.
2. **Connect Fuel:** Once the extension is securely attached, connect your Ripack heat gun to its propane fuel source according to the heat gun's specific instructions.
3. **Ignite Heat Gun:** Follow the heat gun's manual for ignition procedures.

4. **Maintain Control:** Due to the increased length, the extension will alter the balance and leverage of the heat gun. Hold the heat gun firmly with both hands, if possible, to maintain control and direct the heat effectively.
5. **Even Heat Distribution:** Move the heat gun with the extension in a steady, sweeping motion to ensure even heat distribution over the material being worked on. Avoid concentrating heat in one spot for too long.
6. **Working at Height:** When working on elevated surfaces, ensure stable footing and be mindful of overhead obstacles. The extension is designed to reduce the need for ladders in many situations, but safety should always be prioritized.

MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your Ripack Combo Extension.

- **Cleaning:** After each use, allow the extension to cool completely. Wipe down the exterior with a clean, dry cloth to remove any dust, debris, or residue. Do not use abrasive cleaners or solvents.
- **Inspection:** Periodically inspect the extension tube and connection points for any signs of wear, cracks, bends, or damage. Ensure all connections remain tight and secure.
- **Storage:** Store the extension in a clean, dry place, away from extreme temperatures and direct sunlight. Protect it from impacts that could cause bending or damage.
- **Damaged Parts:** If any part of the extension appears damaged or compromised, do not use it. Contact Ripack customer support or an authorized service center for replacement parts or repair.

TROUBLESHOOTING

This section addresses common issues you might encounter with the Ripack Combo Extension. For issues related to the heat gun itself, refer to your heat gun's specific instruction manual.

- **Extension Feels Loose:**
 - Ensure the extension is fully seated and twisted/pushed into place on both the heat gun and the diffuser.
 - Inspect the connection points for any debris preventing a secure fit.

- If connections remain loose after inspection, the locking mechanism or components may be worn. Discontinue use and contact support.

- **Difficulty Attaching/Detaching:**

- Ensure the heat gun is cool before attempting to attach or detach the extension.
- Check for any obstructions or misalignment during attachment.
- Apply a small amount of appropriate lubricant (e.g., silicone spray, if recommended by manufacturer) to the connection points if they are stiff, but avoid getting lubricant into the heat path.

- **Visible Damage:**

- If the extension tube is bent, cracked, or otherwise damaged, **do not use it**. Using a damaged extension can be unsafe and may affect heat gun performance.
- Contact Ripack customer support for guidance on replacement parts.

SPECIFICATIONS

Product Name	Ripack 2200 & 3000 Heat Gun 6' 8" Combo Extension
Model Number	MSW-902-333370
Part Number	333371 (Old Part# 333370)
Extension Length	6 feet 8 inches (80 inches)
Product Dimensions (Packaged)	45 x 4 x 4 inches
Item Weight	4.4 pounds
Manufacturer	Ripack
Compatibility	Ripack 2200 and 3000 series heat guns

WARRANTY AND SUPPORT

For information regarding warranty coverage, technical support, or to purchase replacement parts for your Ripack Combo Extension, please contact the manufacturer directly or the authorized seller from whom you purchased the product. Keep your purchase receipt and model number handy when contacting support.

Manufacturer: Ripack

Seller: Mr. Shrinkwrap (as per product listing)
