Rowenta ZR177005

Rowenta ZR177005 Microfiber Wipes for Explorer 80 Robot Vacuum Cleaners - User Manual

1. INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your Rowenta ZR177005 Microfiber Wipes. These wipes are designed to enhance the cleaning performance of your compatible Rowenta Explorer 80 Series robot vacuum cleaner by allowing simultaneous vacuuming and floor cleaning.

2. PRODUCT OVERVIEW

The Rowenta ZR177005 Microfiber Wipes are an accessory for specific Rowenta Explorer 80 Series robot vacuum cleaners. They are designed to be attached to the rear of the robot, enabling it to vacuum and clean floors in a single pass. Each pack contains two microfiber wipes.

Figure 1: Two blue Rowenta microfiber wipes, designed for floor cleaning with compatible robot vacuums.

Figure 2: Packaging for Rowenta Microfiber Mops, indicating compatibility with Explorer S80 series.

3. INSTALLATION AND SETUP

- 1. Identify the Attachment Area:** Locate the designated attachment area at the rear of your Rowenta Explorer 80 Series robot vacuum cleaner. This area is typically designed to securely hold the microfiber wipe.
- 2. Attach the Microfiber Wipe:** Carefully align the microfiber wipe with the attachment mechanism on the robot. Ensure it is securely fastened to prevent it from detaching during operation. The wipe should sit flat against the robot's base.
- 3. Prepare for Cleaning:** Once the wipe is attached, ensure it is clean and, if desired, slightly dampened for optimal cleaning performance on hard floors.

4. OPERATING INSTRUCTIONS

With the microfiber wipe correctly installed, your robot vacuum cleaner can now perform a dual function: vacuuming and cleaning your floors simultaneously. Simply operate your robot vacuum as usual according to its own instruction manual. The attached wipe will clean the floor surface as the robot moves.

5. MAINTENANCE

- Regular Cleaning:** After each cleaning cycle, remove the microfiber wipe from the robot and clean it. The wipes are designed to be easily removed and cleaned.
- Replacement Schedule:** For optimal cleaning performance and hygiene, it is recommended to replace the microfiber wipes every 6 months. Regular replacement ensures effective dirt removal and prevents the spread of debris.

6. COMPATIBILITY

These microfiber wipes (model ZR177005) are specifically designed for use with the following Rowenta Explorer 80 Series robot vacuum cleaners:

- Rowenta Explorer Série 80 RG776
- Rowenta Explorer Série 80 RR774
- Rowenta Explorer Série 80 RR775

Ensure your robot vacuum cleaner model is listed above for proper fit and function.

7. SPECIFICATIONS

Feature	Detail
Brand	Rowenta
Model Number	ZR177005
Color	Blue
Material	Plastic (for attachment), Microfiber (for wipe)
Item Weight	80 g
Product Compatibility	Rowenta Explorer 80 Series (RG776, RR774, RR775)
Key Features	Official Rowenta accessories, Easy to remove and clean

8. TROUBLESHOOTING

As these are accessory wipes, most operational issues will relate to the robot vacuum itself. However, if you experience issues directly related to the wipes:

- **Wipe not cleaning effectively:** Ensure the wipe is clean and not overly saturated or dry. Replace if worn out or past its recommended replacement period.
- **Wipe detaching during operation:** Verify that the wipe is correctly and securely attached to the robot's designated area. Check for any damage to the attachment mechanism on either the wipe or the robot.

9. SUPPORT AND WARRANTY

For further assistance, technical support, or information regarding product warranty, please refer to the main instruction manual of your Rowenta Explorer 80 Series robot vacuum cleaner or visit the official Rowenta website. Specific warranty details for accessory items may vary by region.

You can find more information and contact details on the official Rowenta website: www.rowenta.com
