SETUP AND ASSEMBLY

Assembly of the Zinus Van Bed Frame is designed to be straightforward. It is recommended to assemble with two people for ease, though it can be done by one person.

Step-by-Step Assembly:

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface (like a rug or blanket) to prevent scratches.
2. **Identify Parts:** Match each part to the corresponding labels in the instruction diagram. All parts are clearly labeled.
3. **Assemble Frame:** Connect the side rails and crossbars using the provided bolts and the Allen wrench/ratchet. Do not fully tighten bolts until the entire frame is assembled.
4. **Attach Legs:** Securely attach the bed legs to the frame.
5. **Install Slats:** Place the steel slats onto the designated supports on the frame. Ensure they are evenly spaced and securely fastened if applicable. The slats are designed with foam pads to minimize noise.
6. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts.
7. **Safety Check:** Gently shake the assembled frame to ensure stability.

MAINTENANCE

- **Cleaning:** Wipe the metal frame with a damp cloth and mild detergent. Avoid abrasive cleaners that may damage the finish.

- **Relocation:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame or your flooring.

TROUBLESHOOTING

- **Squeaking Noises:**

- Ensure all bolts are securely tightened.
- Verify that the mattress is properly seated on the foam-padded slats.
- Check for any loose connections or components.

- **Instability/Wobbling:**

- Re-check all connections and ensure they are fully tightened.
- Confirm that the bed frame is on a level surface.

- **Missing Parts:**

- Carefully re-check all packaging materials.
