

## ASTRO Gaming A50

# ASTRO Gaming A50 Wireless Headset and Base Station User Manual

## INTRODUCTION

---

This manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your ASTRO Gaming A50 Wireless Headset and Base Station. Designed for an immersive audio experience on Xbox One and PC, the A50 delivers high-fidelity sound and clear communication. Please read this manual thoroughly to ensure optimal performance and longevity of your device.

## PACKAGE CONTENTS

---

- ASTRO Gaming A50 Wireless Headset
- ASTRO A50 Base Station
- USB Power Cable
- Optical Cable (for Xbox One setup, if required)
- User Manual (this document)

## SETUP

---

Follow these steps to set up your ASTRO Gaming A50 Wireless Headset and Base Station for use with your Xbox One or PC.

### 1. Initial Charging

Place the A50 Headset onto the Base Station. Ensure the headset is properly seated on the charging contacts. The Base Station's battery indicator will show the charging status. A full charge provides over 15 hours of battery life.

### 2. Connect the Base Station

Connect the supplied USB Power Cable from the Base Station to an available USB port on your Xbox One or PC. The Base Station will power on automatically.

### 3. Select Platform Mode

On the back of the Base Station, locate the PC/Xbox switch. Slide the switch to the appropriate platform (Xbox for Xbox One, PC for computer use).

#### **4. Xbox One Connection (Optional Optical Cable)**

For optimal audio on Xbox One, connect the supplied Optical Cable from the Base Station's OPTICAL IN port to the Xbox One's optical audio output port. This provides Dolby Digital Surround Sound. If your Xbox One does not have an optical port, audio will be delivered via USB.

#### **5. PC Connection**

When connected to a PC, the USB cable provides both power and audio. Ensure the Base Station is set to PC mode. You may need to select the 'ASTRO A50 Game' as your default playback device and 'ASTRO A50 Voice' as your default communication device in your sound settings.

#### **6. ASTRO Command Center Software**

Download and install the ASTRO Command Center software from the official ASTRO Gaming website. This software allows you to update firmware, customize EQ presets, adjust microphone settings, and manage other audio preferences. Regular firmware updates are recommended for best performance.

The ASTRO Gaming A50 Wireless Headset resting on its charging Base Station, illustrating the primary components.

## OPERATING INSTRUCTIONS

---

Familiarize yourself with the controls and features of your A50 Headset for an enhanced gaming experience.

### Power On/Off

To power on the headset, slide the power switch located on the right earcup. To power off, slide the switch back to the off position. The headset will also power off automatically when placed on the Base Station.

## Game:Voice Balance

The A50 features dedicated buttons on the right earcup to adjust the balance between game audio and voice chat. Press the **Game** button to increase game volume and decrease chat volume, or the **Voice** button to increase chat volume and decrease game volume.

## Master Volume Control

A volume wheel on the right earcup allows you to adjust the overall master volume of the headset.

## EQ Presets

Cycle through different equalizer presets by pressing the EQ button on the right earcup. These presets can be customized using the ASTRO Command Center software.

## Microphone Functionality

The microphone is located on the left earcup. To mute the microphone, simply flip it up. To unmute, flip it down. The microphone offers clear voice communication.

## Dolby Audio

The A50 supports Dolby Audio, delivering a cinematic, high-resolution gaming audio experience. For Xbox versions, Dolby Atmos provides object audio for a more accurate and immersive sound experience.

## MAINTENANCE

---

Proper care and maintenance will help extend the life and performance of your ASTRO A50 Headset.

### Cleaning

Wipe the headset and Base Station with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials. For ear cushions, gently wipe with a damp cloth if necessary, ensuring they are completely dry before use.

### Battery Care

To maximize battery lifespan, avoid fully discharging the headset frequently. Place the headset on the Base Station when not in use to keep it charged. The lithium-ion battery is designed for 15+ hours of use per charge.

### Mod Kit Compatibility

The A50 Wireless Headset (Gen 4) is compatible with optional A50 Mod Kits. These kits allow for customization with synthetic leather headband and ear cushions, which can improve noise isolation. Refer to the Mod Kit instructions for installation.

## TROUBLESHOOTING

---

If you encounter issues with your ASTRO Gaming A50 Headset, refer to the following common solutions.

### No Audio or Microphone Functionality

- **Check Power:** Ensure both the headset and Base Station are powered on.

- **Verify Connections:** Confirm the USB cable is securely connected to both the Base Station and your console/PC. If using an optical cable, ensure it is firmly connected.
- **Platform Mode:** Check that the PC/Xbox switch on the Base Station is set to the correct platform.
- **Default Audio Device (PC):** On PC, ensure 'ASTRO A50 Game' is set as your default playback device and 'ASTRO A50 Voice' as your default communication device in Windows sound settings.
- **Microphone Mute:** Ensure the microphone is flipped down to unmute.

### Charging Issues

- **Proper Seating:** Ensure the headset is correctly seated on the Base Station's charging contacts. The Base Station's LED indicators should show charging status.
- **USB Power:** Verify the USB cable is providing power to the Base Station. Try a different USB port or cable if necessary.

### Connectivity Problems / Disconnections

- **Re-pairing:** If the headset loses connection, try re-pairing it with the Base Station. Place the headset on the Base Station, then press and hold the Dolby button on the headset and the power button on the Base Station simultaneously for a few seconds until the pairing indicator lights flash.
- **Interference:** Move the Base Station away from other wireless devices that may cause interference.

### Firmware Updates

Always ensure your headset and Base Station firmware are up to date using the ASTRO Command Center software. Firmware updates often resolve performance issues and introduce new features.
